Re: Docket # 99P 4613

Dear Madame/Sir:

Re: docket # 99P 4613, I am strongly in support of banning BGH.

Monsanto's research was faulty and Monsanto purposely lied about it. Their protein formula is not an exact version of the natural pituitary extract from a cow. They did not reveal this until after approval.

BGH poses a health risk to humans and causes massive suffering to cows.

I want to see it banned.

Thank you.

Sincerely,

Susan Gordon
