Rockville, Maryland 20857

Dear Commissioner Henney:

I have recently become aware of the problem that bacteria are becoming resistant to the antibiotics that are currently being used to treat people against infections. Part of the problem is that livestock have been routinely fed antibiotics to speed up growth, making bacteria resistant to them.

Therefore, I am urging you to prohibit livestock producers from routinely adding medically important antibiotics to animal feed to promote growth.

Sincerely yours,

Anthony Cammarano
