Michael A. Friedman, MD  
Acting Commissioner  
FDA

Dear Dr. Friedman,

As a mother of two young children and a member of Mothers and Others for a Livable Planet, I demand that the FDA suspend Monsanto's license to sell rBGH immediately. Tens of thousands of consumers will not allow our children to be exposed to genetically engineered hormones.

It is up to you to put a halt to this product being unleashed upon us with its inevitable ill-health impacts. On a personal level, I am educating everyone I know on this issue, and you will be receiving their letters soon.

Will you continue to jeopardize our children's health or will you take action? I look forward to hearing from you as soon as possible.

98P-1194

Sincerely,  
Deborah M. Gillen C716  
Deborah M. Gillen
