Washington, D.C. 20204

Dear Dr. Yetley:

Notice is hereby given pursuant to the requirements of Section 403(r)(6)(21 U.S.C. 343(r)(6) of the Federal Food, Drug and Cosmetic Act of statements of nutritional support which have been made on the label and/or in the labeling in connection with the marketing of the dietary supplement SX ENHANCER. SX ENHANCER was first marketed with these statements of nutritional support on Monday, January 3, 2000. The statements of nutritional support are as follows:

“Naturally supports increased blood flow for improved sexual function”

“Improve your sexual performance with a complete formula that combines clinically tested ingredients. **L-arginine** is an amino acid that helps produce nitric oxide which causes blood vessels to dilate, allowing for greater blood flow to the sex organs. More calcium in the blood stream may increase the amount of nitric oxide that is produced. These natural ingredients collectively enhance your body’s ability to function sexually and increase energy levels.

Very truly yours,

MASON VITAMINS, INC.
