Ms. Jane Henney, MD
Commissioner FDA
Rockville MD 20857

Dear Commissioner Henney:

Congratulations on your appointment. I am confident you will do your very best.

My reason for writing you at this time, has to do with another attempt by Americas audiologists to control our countrys citizens . They are persistent. Of course, money is the motivating force, and money has a strange effect on ones actions.

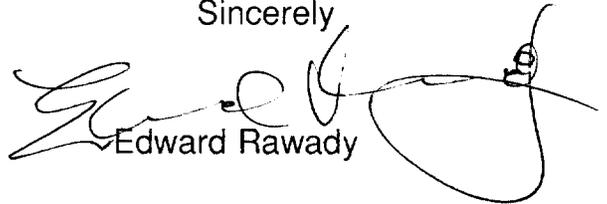

The audiologists renewed attempt at gaining complete control of the hearing aid business, comes as no surprise. They like the optometrists want it all. The costs for hearing instruments is outrageous with out the interference of an audiologist. It adds insult to injury.

I am hearing impaired, and have been using hearing aids for over twenty years. I have never had or needed the advice of an audiologist. Nor do I expect to use on in the foreseeable future

My life is over controlled with out further efforts being ramed down my throat.

Speaking for those who feel as I do, please, we do not need further controls. Licensing has been granted to optometrists, and audiologists, they have been licensed to steal, and they do ! It has gone way beyond reality.

Sincerely,

Edward Rawady
