Re: Docket #99P-4613

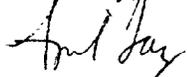

To whom it may concern:

I recently learned that a petition has been filed with your agency to ban the use of Bovine Growth Hormone in dairy cows. I have personally seen how this hormone affects these cows, often leading to Mastitis, where the cow's udders are abnormally large and infected. No animal should have to endure this kind of agony nor should consumers be subjected to such additives in their dairy products.

Therefore, I urge your agency to immediately act on the above referenced docket so that BGH will never again be given to cows.

Thank you.

Sincerely,

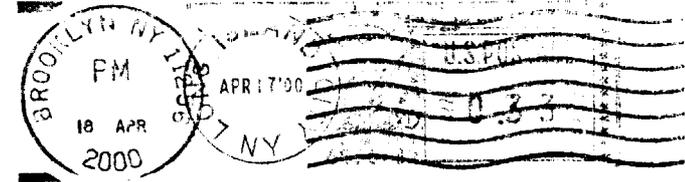

April Lang
