Dear Commissioner Henney,

I am writing to request that you support legislation requiring clear labeling of all genetically engineered foods (Docket No. 00P-1211/CP1).

I strongly oppose genetic engineering of foods, but I realize that it's unlikely that this process can be completely stopped. However, I believe that American consumers should be able to choose whether or not they eat GE products. Currently it is impossible to know whether or not foods have been genetically engineered.

Thank you very much,

Michelle Barnhart
