Attention FDA

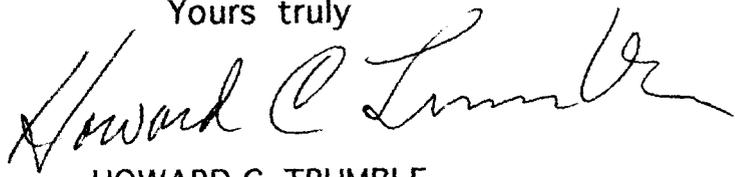

It came to my attention that the FDA is being asked to take away my right to choose where to buy my hearing aids and instead I would be forced to have a medical exam or hearing tests. I do not want this to happen. I have been perfectly satisfied with my experience of mail order hearing aids, they are much less expensive and in many cases superior to what audiologists tell you.

There are many reasons for people to choose when and if they need a hearing aid and who should provide this. Persons with a long term hearing loss should be allowed to continue in the way they have bought in the past without governmental interference.

For instance some people are physically unable to drive to various appointments, others have had bad experiences with get "rich quick" prescribers and that is why they choose mail order instruments.

I don't feel that the FDA should take away anyone's right to decide for themselves on my medical exams and treatment. Please do not pass this bill.

Yours truly
