Re: Olestra

Dear Doctor Henney,

I have been asked by the Center of Science in the Public Interest to write a letter regarding my physical reaction after eating the Lay's Potato Chips made with olestra. They were very tasty but I developed terrible abdominal pains after eating them. The problem lasted several days and was quite severe.

I believe the public should be cautioned with a very visible warning on the front of the packages chips of the possibility of severe cramping and diarrhea.

Yours truly,

  
Virginia Goetz
