Commissioner Jane Henney, M.D.  
FDA  
FDA Dockets Management Branch (HSA-305)  
5630 Fishers Lane, Room 101  
Rockville, MD 20852

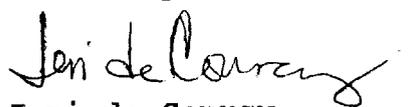

Dear Dr. Henney:

Docket Number 00P-1211/CP1 is of utmost importance to me and my family. The FDA must require biotech firms to provide safety testing and environmental review prior to marketing genetically "engineered" foods and must require labelling on those food products.

I believe the biotech firms have been allowed to experiment without safeguards for our health and the health of our environment for too long. Please put an end to that unregulated, unsupervised research and, please, give us the chance to choose what we eat by giving us clear labelling.

Thank you for your time and consideration.

Sincerely,

  
Jeri de Courcy
