RE: Docket No. 00P-1211/CP1

Dear Commisioner Henney,

I'm writing this letter concerning the docket #00P-1211/CP1) in the hopes that the FDA will develop pre-market testing and mandatory labeling of genetically altered foods.

The effects of genetic engineering are still in a preliminary state, unknown to most, so how can you say that it isn't either more toxic, or even more beneficial to the human body. Either way the public should have the right to decide what is put into their bodies. They should also be able to easily access information on genetic testing, especially on food and medicines.

Although your work has helped awareness we must continue to allow the public the right to choose. And to do so, they must have the facts at hand, or in hand at the store.

Sincerely

Joseph Daevs
