Dear Dr. Henney:

Please start now to collect and report data on the quantity of antibiotics used in U.S. agriculture! The overuse of antibiotics is contributing to the emergence of untreatable diseases! We need reliable data on the use of antibiotics in agriculture in order to devise an effective strategy to reduce antibiotic use!

Please establish a reporting system to learn about the quantity of antibiotics used in our agriculture. There is a rise in antibiotic resistance that needs to be combatted! Thank you.

Sincerely,
M. Ruth Niswander
