

To whom it may concern: In reference to 12/26/00  
Docket Number 98P-0151/CP1. Why would  
anyone allow sick food to pass and be served  
at our family table to make us sick. Why is it  
when they see an animal is plown and sick they  
can't ~~simply~~ <sup>remove</sup> be there at a proper <sup>312</sup> ~~3034~~ <sup>312</sup> way? ~~3034~~ proper  
remove it and dispose of the ~~animal~~ <sup>312</sup> meat should not even be used for dog  
food. Is that why our Pets get cancer too? I  
suppose they can't move downed animals humanely  
so what do they do? Push them with tractors or drag  
them? I'm afraid for my children. Fast Food chains scare  
me. We are warned even to wash our hands after  
handling meat and wash the counter with disinfectant  
after meat has been placed on it. What is it coming to?  
This is madness! Mad Cow Disease Perhaps <sup>Guru</sup> mercer
