Category	Individual		
Comments for FDA General			
Questions			
1. Is the proposed collection of information necessary for the proper performance of FDA's functions? Will the information have practical utility?		I fell that making the morning after pill avalibel over the counter would be a very positive course of action so that women could have more control over there bodies, and I also beleve that if women could us the morning after pill to prevent pregnancy they would not be put in a positon where they need to deal with an unwanted pregnancy.
