

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1

- All GE foods should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

(Additional Personal Comments:) *it's a very basic right that i know + choose what i put into my body. without complete labeling, there is no way for me to know. i read labels !!*

*at the very least, make labeling mandatory. also - complete study should take place before any of this stuff is put out there - in the fields or in the market place.*
