

Docket # OOD - 1598  
DON - 1396

Dear Commissioner,

I understand the pressure to serve

the interests of corporations - much of public & media attention tends to focus on the health of the economy.

However I do not believe that this is more important than the health of our nations populace.

Please will you support measures to test and

label genetically-engineered foods.

Labeling should be required simply for the sake of the public's right to know what is in our food (ala ingredients + bioengineering)

Sincerely, Alan Zilber

OGN-13.96
