Dear FDA Commissioner

3118 '02 FEB 14 00:37

I am aghast at your (FDA's) proposed regulations for genetically engineered food and crops.

There is overwhelming public support for stronger government regulations regarding these products. You should not be in the business of protecting corporations and agribusinesses from the expense involved in testing and labelling these products.

American citizens have a right to make informed choices about the foods we purchase and eat.

These proposed regulations stink!
At the least there should be extensive safety testing and labelling of all GE food products
I personally would prefer a moratorium on planting and sale of GE food products until this happens.

C388

00D-1598 Consumers have a right to protection from this enforced manipulation of food products.

DO YOUR JOB - WHICH IS
TO REPRESENT THE INTERESTS
OF ALL AMERICAN CITIZENS -
NOT JUST BUSINESS INTERESTS
THAT REPRESENT THE FEW.
PLEASE
FIX - AMEND THESE
PROPOSED GE REGULATIONS
