Re: Genetically Engineered Food

Please consider seriously the  
following comments:

- All GE foods and food ingredients should be labeled so that the public is informed and has a choice.
- GE foods should not be presumed to be safe and should be subject to mandatory, pre-market safety testing.
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

These also reflect our feelings  
in this important matter!

Yours truly,

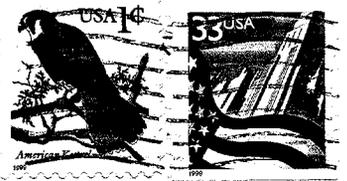

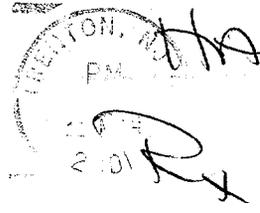

*S. Hall*
