DEAR FDA,

I am writing to express my opposition to the FDA's new proposed rule and guidance on genetically engineered (GE) foods. Based on the information I have read in journals and magazines as well as scientists I have spoken to, the FDA's voluntary labeling and notification proposals are inadequate to protect human health and the environment. What's more, they violate my right as a citizen to know what it is I am purchasing and eating.

I fully support the following:

- All GE foods and food ingredients **MUST** be labeled so I am informed and have a choice.
- GE foods should not be assumed to be safe and should be subject to mandatory premarket safety testing.
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

Sincerely,

Tracy Basile
