

The spoof score at the hamburger factory with a deadly virus strain named when it was released, then added to the hamburger.

Playing God w/ GE is deadly. You just can't out-argue God & get away with it.

Dear FDA, with it, whose side are you on?

Ms. Stanchfield, DC.

DEAR FDA, with it, whose side are you on?
 I am writing to express my opposition to the FDA's new proposed rule and guidance on genetically engineered (GE) foods. The agency's voluntary labeling and notification proposals are totally inadequate to protect human health, the environment, and my right to know. I fully support the following:

- All GE foods and food ingredients should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be safe and should be subject to mandatory pre-market safety testing.
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.
