To whom it may concern:

I have recently learned that the FDA is planning to remove all current labeling requirements for irradiated food. The information I have is that the FDA has approved irradiation for essentially all foods, including fruits and vegetables.

I truly wish that the FDA would stop playing dumb with the American and world public. The FDA knows full well that people have massively protested the failure to distinguish and label both irradiated and genetically engineered foods. I as a consumer have a right to know whether or not my food has been tampered with. I do not want to purchase or consume doctored, manipulated, irradiated, zapped or poisoned food. There are millions who agree with me, as surely you know.

LABEL IRRADIATED FOOD!!!! LABEL GENETICALLY ENGINEERED FOOD!!!! We will keep on protesting until this is done!!!!

Yours truly,

Nina Moliver
