Docket 96N-0244  
Dockets Management Branch  
Food and Drug Administration  
12420 Parklawn Drive  
Rockville, MD 20857

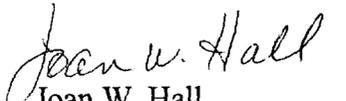

To Whom It May Concern:

I have had headaches for over 16 years. Some of them go into full blown migraines.

I have just discovered I ACUTELY sensitive to MSG in foods. I cannot eat any fresh fruits or vegetables.

It is unbelievable to me that you do not require food to be labeled as MSG. People are at risk and especially children. So many foods contain MSG but are labeled with different ingredients.

I have just learned that you allow Auxigro to be sprayed on fruits and vegetables in any amount. This product needs to be withdrawn from the market. I believe it has the potential to kill people.
