RE: Virginamycin

Dear Sir or Madam:

I was very pleased with the FDA findings that gave Virginamycin a clean bill of health. It is my understanding that the risk assessment found no risk to human health in using Virginamycin in poultry production. In my experience, Virginamycin in poultry feeds at the approved levels has helped production and improved bird health and growth rate. In order for animal production to maintain a low cost resulting from improved bird health and improved feed conversion, we need health products such as Virginamycin.

Thank you for your consideration of my comment.

Sincerely,

  
Phillip A. Morris  
President
