Subject: Panel Meeting

Good Morning Lynn,

As per our discussion, this is an acknowledgement that the CTI BSC 2100 will be discussed by the Radiological Devices Panel on October 16, 2002. The location of the Panel meeting has not been finalized at this time but will be at a hotel in the Rockville, MD area. I will advise you of the particulars regarding the meeting once things have been finalized.

As we discussed previously, you need to prepare a package for distribution to the Panel members for their review. This material will be made publicly available the day before the Panel meeting. If you have any questions please give me a call (301-594-1212).

Best regards,

Jack Monahan
