RE: Docket Number 2004P-0522/CP1

Dear Dr. Woodcock:

The Tatia Oden French Memorial Foundation is presenting an additional 100 names, along with their comments to the FDA and requesting that these names be added to docket number 2004P-0522/CP1.

This will bring the total number of signatures and comments collected on the Cytotec petition to approximately 1800.

Again, I ask that you read these new comments. The comments are from women who have been given Cytotec to induce their labor, or from midwives, nurses, doulas, family members and friends. The Cytotec petition submitted in Nov. 2004 asked the FDA to produce a medicine guide on the side effects of Cytotec when used for inducing labor.

We stand committed to that request. Women continue to die after being induced with Cytotec. Babies continue to suffer permanent brain damage after their moms were given Cytotec to induce labor. Other severe irreversible adverse effects continue to occur.

These outcomes are unnecessary and preventable. Please move forward on creating a Medicine Guide for Cytotec Induction.

I look forward to hearing from you and collaborating on the resolution of this issue.
