

## Table of Contents

## Table of Contents

Table of Contents.....	i
I. Specification of the Type of Device [860.123(a)(1)] .....	1
A. Proposed Classification Regulation.....	1
B. Attributes of this Generic Type of Device.....	2
1. Purpose and Intended Use .....	3
2. Design and Operation .....	3
3. Function .....	3
4. Output Waveform .....	5
5. Operational Use .....	5
6. Materials .....	6
7. Energy Source.....	7
C. Devices Covered by the Reclassification Petition.....	7
II. Statement of Requested Action [860.123(a)(2)].....	10
III. Supplemental Data Sheet [21 CFR § 860.123(a)(3)] .....	11
IV. Classification Questionnaire [21 CFR § 860.123(a)(4)] .....	11
V. Statement for the Reasons for Disagreement with the Current Classification [21 CFR § 860.123(a)(5)] .....	11
VI. Statement of the Reasons for How the New Class Will Provide Reasonable Assurance of Safety and Effectiveness [21 CFR § 860.123(a)(6)] .....	12
A. Summary of Risks and Off-setting Special Controls.....	13
B. Detailed Description of the Benefits/Effectiveness with Supporting Data .....	14
1. Literature Search Details .....	14
2. Benefits for Nonunion Fractures .....	16
a) Overview of the Clinical Studies for Nonunion Fractures .....	17
b) Description of the Study Populations .....	23
c) Stimulation Variables and Regimens .....	35
d) Effectiveness Assessments .....	42
e) Conclusions .....	56
3. Benefits as an Adjunct for Spinal Fusion .....	56
a) Overview of the Clinical Studies for Spinal Fusion .....	57
b) Description of the Study Populations .....	59
c) Stimulation Variables and Regimen .....	62
d) Effectiveness Assessments .....	64
e) Conclusions .....	70
C. Detailed Description of Risks with Supporting Data .....	71
1. Electrical Shock .....	72
2. Burn .....	73
3. Skin Irritation and/or Allergic Reaction .....	74
4. Inconsistent or Ineffective Treatment.....	75
5. Other Information on Device Safety .....	77
D. Off-setting Special Controls to Minimize Risk .....	79
VII. Safety and Effectiveness of the Devices to Be Reclassified .....	89
A. Biolectron – OrthoPak Bone Growth Stimulator .....	90
B. Biolectron – SpinalPak Fusion Stimulator .....	92

C.	EBI, L.P. - EBI Bone Healing System .....	92
D.	Orthofix, Inc. - Physio-Stim Lite.....	94
E.	Orthofix, Inc. – Spinal-Stim Lite.....	95
F.	OrthoLogic – OrthoLogic 1000.....	96
G.	OrthoLogic - SpinaLogic.....	98
H.	RS Medical Device .....	99
I.	General Review References.....	100
VIII.	Representative Unfavorable Information .....	100
IX.	Summary of the New Information.....	100
X.	Copies of Source Documentation.....	100
XI.	Financial Certification .....	101

## List of Tables

Table 1:	Summary of the Waveform and Tissue Effects for Each of the Three Technologies for Non-invasive Bone Growth Stimulators .....	5
Table 2:	Summary of the Non-invasive Bone Growth Stimulators for Reclassification .	9
Table 3.	Overview of the Literature Citations Regarding the Use of Capacitive Coupling Non-invasive Bone Growth Stimulators for Nonunion Fractures ...	18
Table 4.	Overview of the Literature Citations Regarding PEMF Non-invasive Bone Growth Stimulators for Nonunion Fractures .....	20
Table 5.	Description of the Study Populations with Nonunion Fractures Treated with Capacitive Coupling Non-invasive Bone Growth Stimulators.....	25
Table 6.	Description of the Study Populations with Nonunion Fractures of the Tibia Treated with PEMF Non-invasive Bone Growth Stimulators.....	27
Table 7.	Description of the Study Populations with Nonunion Fractures of the Long Bones and Others Treated with PEMF Non-invasive Bone Growth Stimulators.....	29
Table 8.	Description of the Study Populations with Nonunions Fractures of the Foot and Hand Treated with PEMF Non-invasive Bone Growth Stimulators .....	34
Table 9.	Summary of the Stimulation Treatment Variables for Capacitive Coupling Non-invasive Bone Growth Stimulators for Nonunion Fractures .....	36
Table 10.	A Summary of the Stimulation Treatment Variables of PEMF Non-invasive Bone Growth Stimulators for Subjects with Nonunions of the Tibia.....	38
Table 11.	A Summary of the Stimulation Treatment Variables of PEMF Non-invasive Bone Growth Stimulators for Subjects with Long Bones and Other Nonunions.....	39
Table 12.	A Summary of the Stimulation Treatment Variables of PEMF Non-invasive Bone Growth Stimulators for Subjects with Foot and Hand Nonunions .....	41
Table 13.	Benefits of Capacitive Coupling Non-invasive Bone Growth Stimulators for Nonunion Fractures .....	44
Table 14.	Benefits of PEMF Non-invasive Bone Growth Stimulators for Nonunion Fractures of the Tibia.....	46
Table 15.	Benefits of PEMF Non-invasive Bone Growth Stimulators for Nonunion of Long Bones and Others .....	49
Table 16.	Benefits of PEMF Non-invasive Bone Growth Stimulators for Nonunion Fractures of the Foot and Hands.....	55
Table 17.	Overview of Literature Citations for Non-invasive Bone Growth Stimulators for Spinal Fusion .....	58
Table 18.	Description of the Study Population in the Literature Citations for Non-invasive Bone Growth Stimulators for Spinal Fusion.....	60
Table 19.	Description of Stimulation Output Waveform Parameters and Treatment Regimen for Non-invasive Bone Growth Stimulators for Spinal Fusion.....	63
Table 20.	Effectiveness Parameters Reported in the Clinical Studies of the Non-invasive Bone Growth Stimulators for Use as an Adjunct to Lumbar Spinal Fusion Surgery.....	65

Table 21: Potential Causes for the Risk of Electrical Shock .....	72
Table 22: Potential Causes for the Risk of Burn .....	73
Table 23: Potential Causes for Risk of Skin Irritation and/or Allergic Reaction .....	74
Table 24: Potential Causes for Risk of Inconsistent or Ineffective Treatment.....	75
Table 25: Comparison of Technological Characteristics for Class II Devices and Class III Non-invasive Bone Growth Stimulators (Being Sought for Reclassification) .....	78
Table 26: A Summary of the Cause of Circuitry Failures, their Risks, Risk Mitigation Strategies and Controls .....	80
Table 27: A Summary of the Cause of Failures with Electrodes, Coils, Lead Wires and Cables, their Risks, Risk Mitigation Strategies and Controls.....	82
Table 28: A Summary of the Cause of Failures with the Power Supply or Charging, their Risks, Risk Mitigation Strategies and Controls.....	84
Table 29: A Summary of the Cause of Failures for Hardware Defects, their Risks, Risk Mitigation Strategies and Controls .....	86
Table 30: A Summary of the Patient-Contacting Material Failures, their Risks, Risk Mitigation Strategies and Controls .....	88
Table 31: A Summary of the Failures Associated with the Conditions of Use of the Device, their Risks, Risk Mitigation Strategies and Controls .....	88

### List of Attachments

<b>Attachment 1:</b>	Proposed FDA Guidance Document Entitled “Class II Special Controls Guidance Document: Contents of Premarket Notifications [510(k)s] for Non-invasive Bone Growth Stimulators” .....	102
<b>Attachment 2:</b>	Supplemental Data Sheet for the Non-invasive Bone Growth Stimulator.....	119
<b>Attachment 3:</b>	Classification Questionnaire for the Non-invasive Bone Growth Stimulator.....	121
<b>Attachment 4:</b>	Literature Search Strategy and Results .....	123
<b>Attachment 5:</b>	Bibliography of the Benefits of the Non-invasive Bone Growth Stimulator for Nonunions and Delayed Unions.....	125
<b>Attachment 6:</b>	Bibliography for the Benefits of the Non-invasive Bone Growth Stimulator as an Adjunct for Spinal Fusion.....	371
<b>Attachment 7:</b>	Safety Information on the Non-invasive Bone Growth Stimulator from the Medical Device Reports Databases .....	436
<b>Attachment 8:</b>	Bibliography of the Additional Citations Regarding the Commercially Available Non-invasive Bone Growth Stimulators .....	443
