Re: PYRIDOXAMINE – Citizen's Petition, Docket No. 2005P-0305 (70 Fed. Reg. 69976-7,
dated November 19, 2005)

Dear Madam or Sir:

On Tuesday, March 7th, the Council for Responsible Nutrition (CRN) filed comments with FDA with respect to the above captioned docket matter relating to the status of pyridoxamine. It appears that we may have inadvertently failed to include two of the intended attachments to those comments:

- The *CRN List of Dietary Ingredients "Grandfathered" Under DSHEA*, dated September 1998, and
- A May 22, 1996 memorandum from Annette Dickinson to CRN's Executive Contacts and Industry Quality Standards Working Group regarding "Grandfathered Dietary Ingredients."

Please find enclosed with this letter both of those attachments and kindly include them in the docket along with our earlier Comment and Affidavit of Annette Dickinson, Ph.D. that accompanied that submission. We apologize for the omission and appreciate your acceptance of this additional material.

Very truly yours,

John Hathcock, Ph.D.
Vice President, International & Scientific Affairs

Steven M. Mister
President & CEO
