

Dear Michael,

Finally an opportunity to tell it like it is about the hell I have go through the past 30 years and the mental, physical, and financial loss, all as a result of the ADA's lies concerning silver amalgams. I have suffered tremendously with rashes that resulted in open sores for years, esp. around my jaws all along the back of my head including face, lips, open rash sores on my neck, arms, chest, hands and feet. Other symptoms include 80% permanent hair loss, unexplained fevers, rapid heart rate, kidney failure, digestive problems, blood disorders, water filled lungs, seizures, convulsions, comas, edema, shingles and other nerve disorders, depression, confusion, short term memory loss, liver problems, severe itching, severe auto-immune issues just to name a few. My body has endured years of nuclear refugee type symptoms plus the added allopathic care that just seemed to torture me further, like years of steroid therapy, chemo-therapy and many other drugs that caused numerous other horrific symptoms like pre-cancer, bone loss, eyesight loss, it was all too much to endure.

While dealing with all these symptoms, I loss my lively hood as an air traffic controller. I have spent 100's of thousands of dollars trying to get well. Every time I had dental work done, my system would collapse even further. I would always ask my dentists, past and present, if these silver amalgams were safe and they would always give me the same brain washed speal from the ADA, that nothing has been proven and that silver amalgams are safe.

I was finally tested for heavy metal contamination and those results revealed mercury levels in the extremes and off the charts. I had my silver amalgams removed followed by 2 years of mercury detox with the prescription drug called DMSA. Once I reached nearly undetected levels of mercury, every one of my symptoms finally vanished. I have rarely eaten fish or any other food possibly contaminated with mercury. I know of others who have suffered similarly and have done the same mercury Detox with DMSA or DMPS Chelation. I am very disappointed in the obvious, that mercury is probably the most toxic substance on the planet, and the FDA and ADA, allow it to be put in our mouths. If you for one minute think that it is safe to do this, then why is there extreme protocol in handling old silver amalgams for disposal and is considered an environmental hazard if not disposed of properly.

I feel my life was greatly reduced to years of horrific illness during the BEST years of my adult life due to the toxicity of mercury poisoning. I want someone to hear me when I say, I want someone to be held accountable and reimburse me for my decades of suffering and monetary losses and I want it now. And if you have the ignorance to say, well, you must have had an allergic reaction to silver amalgams, then I want you to be exposed to supposedly low levels of mercury and see what becomes of your immune system. It's all a matter of accumulation. If you want to say I had an allergic reaction, then all mammals are allergic to mercury, lead, petroleum products and thousands of other toxic compounds if released into the body. There are thousands of people dealing with unexplained symptoms and doctors explain it away as a result of getting old. Medical statistics show early death rates for dentists, including the highest levels of brain disorders.... who know what the staff may have and are suffering with the mercury exposure just from working in the office.

I presently live with short term memory loss due to the numerous past seizures, 70% hair loss due to the scaring on the scalp, esp. on the sides and back of the head (where my jaw is located) and facial skin damage and scaring that looks like I was at one time a severe burn victim. More scaring on the neck, chest, and arms can easily be seen.

I just want the truth to be heard, as we don't have to be exposed to the toxic effects of "silver" amalgams as we have many others dental substitutes as evidence in my current dental care. The plastic composites/fillings have already lasted over 10 years with no problems....Thank God. Please make it right, Jacqueline Delgado 503-630-7281
