Subject: 2007P-0085: Adopt Regulations of General Applicability to All Food Standards that Would Permit, Within Stated Boundaries, Deviations from the Requirements of the Individual Food Standards of Identity

I strongly oppose this change -- the exclusive use of cocoa butter is an essential part of true chocolate -- the use of any other fat would be a crime against food, ruining the mouthfeel and authenticity of our most treasured sweet. Make them call it "pasteurized process chocolate substitute" or similar.

Please don't allow these changes!

thanks
