Dear Montgomery-san,

Our trade name is called Biotamin, of which chemical formula, molecular formula and CAS Number is C<sub>19</sub>H<sub>23</sub>N<sub>4</sub>O<sub>6</sub>PS, 466.45 and 22457-89-2 respectively.

<

Thank you and best regards,

Ikeda

**Subject:** Benfotiamine

Dear Mr. Tatsuya Ikeda:

I have learned from the US FDA that in order to evaluate my Pre-Market Notification package they must first verify that the compound I am seeking clearance for is the same compound that has been marketed as BIOTAMIN in Japan and Asia since 1962.

Could you verify the chemical formula and CAS number of the benfotiamine you manufacture under the trade name BIOTAMIN?

I am assuming the chemical formula is: C<sub>19</sub>H<sub>23</sub>N<sub>4</sub>O<sub>6</sub>PS; molecular formula: 466.45 and CAS Number: 22457-89-2.

Please confirm/reply via email.

Sincere best regards,

Louis Montgomery
