Re: Notice of Statements of Nutritional Support

Dear Dr. Yetley,

Global Marketing International has enclosed an information statement after researching the benefits of Soy Protein Isolates. This statement will be included on the label of our product named "Soy Life" a Soy Protein Isolate based dietary supplement product.

The statement "As a result of numerous studies, evidence is mounting that soybeans may inhibit tumor growth. Genistein, an Isoflavone found chiefly in soybeans, has been identified as an angiogenesis blocker. Angiogenesis is the process by which new blood vessels grow and nourish malignant tumors. By blocking angiogenesis, isoflavones may inhibit tumors."

This statement is submitted pursuant to section 403(r) (6) of the Federal Food, Drug, and Cosmetic Act. This statement will include, prominently displayed and in bold face type the following: "This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease."

This correspondence is to serve as notification to the FDA on behalf of Global Marketing International, that the dietary supplement product, Soy Life, is being marketed with a statement of nutritional support on its label or in its labeling.

If you have any questions, please call (214) 520-4039. Thank you in advance for your prompt reply.
