Dear Dr. Miles:

This is a 30-day notification for a dietary supplement that will be on the market within 30 days. The product name is **Garcinia+Plus**. The claims on the 30, 60 and 180 count packages are identical and are:

“**Garcinia+Plus** is an all natural, safe and non-toxic, stimulant-free dietary supplement. It was specifically designed for individuals seeking to reduce body fat without resorting to drastic caloric restriction. For best results **Garcinia+Plus** should be used in conjunction with a program of regular aerobic exercise and sensible eating. **Garcinia+Plus** contains our **CitriPlus™** (Hydroxycitrate) in its natural plant extract form. Certain research studies have shown that (-) Hydroxycitrate may suppress the appetite and reduce the conversion of carbohydrates into fat. **Garcinia +Plus** was designed to be taken just before a large meal to curtail your appetite and to help limit the later conversion of carbohydrates from that meal into stored body fat.”

Respectfully Submitted,

Rob Maltas
