We prepare our Ginkgo Extract from fresh (uncured) leaves of Ginkgo biloba trees which are Custom Willbreated™ in their natural wild habitat. To assure optimal extraction of Ginkgo's bioactive compounds, the leaves are hand-harvested in early autumn when Ginkgo's bioactive compounds are at their optimal concentration. They are then taken directly to our laboratory and promptly extracted while still fresh and succulent. Our Ginkgo is never fumigated or irradiated. Fresh herb / menstruum ratio: 1:1.75
Contains grain alcohol (55 - 60%) distilled water & Ginkgo extractives.
