Washington, DC 20204

Dear Sir/Madam:

This is a notification pursuant to 21 U.S.C. 343(r)(6) that Standard Process Inc., Palmyra, Wisconsin 53156-0904, is making the following statements:

- (1) Antronex helps maintain a healthy liver. Yakriton, a bovine liver fat extract discovered in the 1920's by Japanese researchers, has been shown to help maintain a healthy liver by enhancing blood filtering capabilities.*
- (2) Antronex supports immune and respiratory system response. Since the liver filters almost one third of the total body blood flow each minute, Yakriton's improvement of blood flow through the liver enhances the cleansing of blood.*
- (3) Antronex assists immune system function. Among many other important duties, the role of calcium in the diet has also been shown to increase immune efficiency.*

These statements are made for a dietary supplement containing bovine liver fat extract (Yakriton), calcium lactate, calcium stearate, arabic gum, and mixed tocopherols. The name of the product is Antronex®.

The information contained herein is accurate and Standard Process Inc. has substantiation that the statements are truthful and not misleading.

Sincerely yours,

Ann Holden
Standard Process Inc.
