

MAY - 3 2006

Ms. Adriane Scherrer
COO
Gindan Neutra-Ceuticals, Inc.
2 North Main Street
Suite 406
Middletown, Ohio 45052

Dear Ms. Scherrer:

This is in response to your letter of April 20, 2006 responding to our March 14, 2006 letter concerning claims you were making in the labeling of the product Cholest-Low.

We appreciate the steps you have taken to address the issues raised in our previous letter. However, your brochure still retains a claim that suggests that your product is intended for use as a drug. In our previous letter, we identified the claim "Recommended for those with a family history of heart or circulatory problems" as a claim that implied that the product was intended to prevent heart disease. This claim is retained in the revised brochure you submitted with your April 20, 2006 letter. We continue to believe that this claim implies that the product is intended to prevent heart disease and is, therefore, a disease claim that subjects your product to regulation as a drug. As we have previously stated, disease claims do not meet the requirements of 21 U.S.C. 343(r)(6). The claim identified above suggests that this product is intended for use as a drug within the meaning of 21 U.S.C. 321(g)(1)(B), and that it is subject to regulation under the drug provisions of the Federal Food, Drug, and Cosmetic Act.

Please contact us if we may be of further assistance.

Sincerely yours,

Susan J. Walker, M.D.
Director
Division of Dietary Supplement Programs

April 20, 2006

Dear Ms. Walker;

We have taken seriously your letter stamped March 14, 2006 concerning the brochure and packaging of our proposed product. We have, therefore reconfigured the brochures that we previously submitted for your comments and are currently designing our sales training program as well as our packaging to reflect the same direction.

In all our activities concerning Gindan's Neutra-ceuticals we will highlight the statements that the product only maintains already healthy cholesterol and blood pressure levels.

Since we currently have redesigned the brochure and the training materials as well as the packaging will take a little longer, we are submitting this new brochure to your attention now. This is in the hopes that our 75-day notice can be considered as per your receipt of this memo and our brochure draft. We will follow-up with a new layout of the packaging.

We appreciate the activities of the Food and Drug Administration and wish to comply with your guidelines 100%.

Sincerely,

Adriane Scherrer
COO

GINDAN NEUTRA-CEUTICAL'S CHOLEST-LOW

**CHOLEST-LOW
FORMULA
IS BASED ON
ANCIENT CHINESE
KNOWLEDGE.**

Traditional Chinese Medicine is very different in focus than American medicine. The Chinese approach acknowledges that a human body is a sophisticated system that finds illness, allocates resources and heals itself. The Chinese have prevented illness for 2000 years. Americans have been treating the symptoms of illness for 200 years. Traditional Chinese Medicine uses fruits and herbs to prevent health problems, and to assist the body with healing. The American approach to medicine, which focuses on treatment, often interferes with your body's natural healing and often has side effects.

GINDAN CHOLEST-LOW

maintains healthy levels.

GINDAN CHOLEST-LOW is a multi-functional herbal kernel that addresses heart and circulatory system health. It helps balance the entire system rather than treating symptoms. CHOLEST-LOW is made of fruit and food like herbs. It's natural properties eliminate side effects or toxicity concerns. Years of testing, under the supervision of the equivalent of U.S. American Medical Association (AMA), and with the support of clinical trial grant money, has demonstrated its safety and effectiveness in maintaining circulatory health. Those who regularly take two doses of CHOLEST-LOW kernels report a general feeling of wellness.

GINDAN CHOLEST-LOW

COMPOSITION:

GREEN TEA EXTRACT

CRANBERRIES

GINSENG

FAMILY HERBS TANGERINE ZEST

KUDZU

CASSIA SEED

**HERBS & HERB
ROOTS ARE COMMON
IN CHINESE
PREVENTIVE
PRODUCTS.**
