**PROFESSIONAL PROFILE**

*Project Manager/Analytic Services Manager* – Currently leading data analytic and project management tasks for the Advancing Excellence in America’s Nursing Homes national campaign. Daily use of SAS to program analytic tasks, including SAS/STAT and SAS/GRAPH. Established and maintain dynamic collaborative relationships with national stakeholder representatives, CMS, and contracting partners. Extensive experience with CMS nursing home quality measure data, OSCAR demographic and deficiency data, and the domains of the CMS nursing home 5-star rating. Key member of the team responsible for the operation of the national nursing home 5-star helpline, providing analytic support and communicating directly with providers to explain the algorithms behind the 5-star rating. Oral and written presentation of analytic outcomes to CMS leadership, medical professionals, project managers, and industry representatives. Supervisor for a staff of up to 14 Bachelor’s and Master’s prepared health data analysts and biostatisticians at the Colorado Foundation for Medical Care.

*Medical Review Consultant* – Twelve years experience as a medical review consultant, providing case management and utilization review for rehab services within the Medicare and Medicaid programs and for private insurance contracts. Participant in site audit teams to evaluate Medicare providers for compliance with medical necessity and billing regulation compliance. Presented utilization review recommendations and rationale at Administrative Law Judge (ALJ) hearings. Author of Medicare coverage guidelines for vestibular rehabilitation. Certified case manager from 1993 to 2002. Worked collaboratively with representatives from Colorado State Department of Health and the State’s fiscal agent to successfully develop and implement Prior Authorization Review (PAR) processes for physical therapy services provided by the State’s Medicaid program.

*Clinician* - 27 years experience as a physical therapist in a wide variety of settings. Professional emphasis in out-patient orthopedic and neurologic rehabilitation, but experience also includes home health, skilled nursing facilities, acute hospitals, and in-patient rehabilitation units.
