This document lists observations made by the FDA representative(s) during the inspection of your facility. They are inspectional observations, and do not represent a final Agency determination regarding your compliance. If you have an objection regarding an observation, or have implemented, or plan to implement, corrective action in response to an observation, you may discuss the objection or action with the FDA representative(s) during the inspection or submit this information to FDA at the address above. If you have any questions, please contact FDA at the phone number and address above.

DURING AN INSPECTION OF YOUR FIRM I OBSERVED:

OBSERVATION 1

Causing a residue of an approved human or animal drug above an established safe level, safe concentration, or tolerance, through use of the drug contrary to its labeling.

Specifically, on 08/11/2009 a cow with tag (b) (4) was sold by this farm for human food. This same cow was found to have Sulfadimethoxine residues in the liver at 0.151 ppm and in the muscle at 0.125. The tolerance level for Sulfadimethoxine in cattle is .1 ppm.

OBSERVATION 2

Failure to have a system to control administration of drug treatments to your animals.

Specifically, on 08/02, 03, 04, & 05/2009 you treated cow with tag (b) (4) with Sulfadimethoxine (SDM) for foot rot. The animal treatment record for cow with tag # (b) (4) does not show the actual dosage amount for each treatment of SDM on 08/02, 03, 04, & 05/2009.
