This document lists observations made by the FDA representative(s) during the inspection of your facility. They are inspectional observations, and do not represent a final Agency determination regarding your compliance. If you have an objection regarding an observation, or have implemented, or plan to implement, corrective action in response to an observation, you may discuss the objection or action with the FDA representative(s) during the inspection or submit this information to FDA at the address above. If you have any questions, please contact FDA at the phone number and address above.

DURING AN INSPECTION OF YOUR FIRM WE OBSERVED:

OBSERVATION 1

Stray animals are not prevented from entering poultry houses.

Specifically, on 04/05/2011 we observed a black stray animal, appearing to be a cat, in the hall between chicken houses 1 & 2 where eggs were being held on belts for transport to the processing area. We also observed 12 clusters of animal feces on walkways between rows of empty chicken cages in house 5. The feces ranged from 1"-3" in length and 1/2"-1" in diameter. Further, your SE Prevention Plan does not include the biosecurity measure of preventing "cats, and other animals from entering poultry houses" as stated in 21 CFR 118.4(b)(4).
