PROGRAM PLANNING & WORKFORCE MANAGEMENT BRANCH

ORA/ORM/DPEM

Memorandum

Date September 12, 2006

From Director, Program Planning & Workforce Management Branch

Subject Final FY 2007 ORA Field Workplan

To
Regional Food and Drug Directors
District Directors
Regional Laboratory Directors: Northeast, Southeast, Arkansas, Pacific Northwest, Pacific Southwest, WEAC, and FCC
Investigations Branch Directors
Laboratory Branch Directors

The enclosed Final FY 2007 ORA Field Workplan is based on the Center's compliance program forecasts and incorporates input of the Centers and the Field Committees during their review of the draft Workplanning Sheets. The Workplan is based on the FY 2007 FDA Appropriation Request submitted to Congress in February 2006. The ORA Field Workplan includes Part I - Planning Guidance and the Servicing Laboratories Table, Part II - the Workplan Summary of Operations and Positions Reports, and Part III - FY 2007 Program Forecasts. **New this year: the first page of Part II is a breakdown of each District's investigational FTE into domestic and import totals.**

The FY 2007 ORA Field Workplan is based on ORA's planning level of 1,848 Operational (3,200 Total) FTEs. This represents an overall reduction of 85 Operational FTEs from the FY 2006 Workplan. Only the Biologics program received an FTE increase for FY 2007. This increase is a result of specific Congressional mandates for increased funding for human tissues and pandemic flu.

ORA's budget resources have continued to erode due to increasing payroll, rent, and shared services taps that are not adequately funded in the base budget. The result over time is a reduction in the level of FTEs that ORA can support. With a few exceptions, the current freeze on outside hiring will likely continue for the foreseeable future.

Foods and Cosmetics

There are 1013 Operational FTEs for FY 2007. This is a reduction of 42 Operational FTEs from FY 2006. Significant changes include:

Domestic and Imported Cheese and Cheese Products (03037): Domestic inspections decreased from 400 to 300; domestic sample collections and analyses decreased from 400 to 300.

Domestic Food Safety (03803): Inspections increased from 3,400 to 4,000; investigations hours increased from 7,207 to 13,860; sample collections/analyses reduced from 600 to 400.

Import Foods (03819): Investigations hours reduced from 86,500 to 82,380; sample collections/analyses reduced from 8,300 to 7,750.

Domestic Fish and Fishery Products (03842): Inspections decreased from 2,480 to 2,330; new assignment for vibrio sample collection/analysis.

Import Seafood Products (03844): Sample collections reduced from 7,500 to 6,400 with a corresponding reduction in analyses.

Juice HACCP Program (03847H): Domestic inspections reduced from 375 to 300; sample collections/analyses reduced from 225 to 150; importer inspections reduced from 200 to 100.

Import/Domestic Micro Assignment: Both import and domestic sample collections/analyses reduced from 500 to 450.

Foreign Inspections (03R233): Inspections reduced from 200 to 100.

Contract Management (03R843): Planned time reduced by 2 FTEs.

Chemotherapeutics in Seafood (04018): Domestic sample collections and analyses reduced from 200 to 150; import sample collections/analyses increased from 750 to 1,150.

Field Assignments for Chemical Contaminants (04F800): Sample collections/analyses reduced.

Biologics

There are 121 Operational FTEs for FY 2007. This is an increase of 4 Operational FTEs from FY 2006. Significant changes include:

Tissue Inspections (41002): Inspections increased from 385 to 484.

Blood Banks (42001): Foreign inspections decreased from 24 to 12.

Source Plasma Establishments (42002): Inspections increased from 164 to 174; investigations hours reduced from 2,271 to 1,331.

Examination of Biological Products Offered for Import (42007/42R833): Entry review hours reduced from 4,200 to 3,600.

Inspection of Medical Device Manufacturers (Biologics) (42845A,B,C): Inspections reduced from 35 to 16.

Vaccines and Allergenic Products – BIMO (45809/45810/45811): Inspections increased from 33 to 66.

Human Drugs

There are 354 Operational FTEs for FY 2007. This is a reduction of 36 Operational FTEs from FY 2006. Significant changes include:

NDA Inspections – Domestic (46832): Inspections reduced from 129 to 112.

Foreign BIMO Inspections: NDA inspections reduced from 41 to 25; ANDA inspections reduced from 30 to 19.

Good Laboratory Practices (48808): Inspections increased from 38 to 50.

Institutional Review Board (48809): Inspections increased from 107 to 123.

Clinical Investigators (48811): Inspections increased from 264 to 282.

ANDA Inspections/Methods Validation – Domestic (52832): Inspections reduced from 137 to 110; methods validation time reduced by 1.7 FTE.

ANDA Inspections – Foreign (52832): Inspections decreased from 62 to 42.

Drug Process Inspections – Domestic (56002): Inspections reduced from 1,504 to 1,377; headquarters time for therapeutic biologics not separately planned.

Drug Process Inspections – Foreign (56002): Inspections reduced from 195 to 174.

Drug Product Surveillance – Domestic (56008A,C): Total sample collections/analyses reduced from 1,175 to 1,050; methods validation time reprogrammed from PAC 56R816.

Drug Product Surveillance – Imports (56008H): Import entry review hours reduced from 18,295 to 14,700; import investigations hours reduced from 9,899 to 7,510; sample collections/analyses reduced from 150 to 120.

Internet, Health Fraud, and OTC Monographs (63001A/63D012): Inspections reduced from 47 to 32; investigations hours reduced from 4,775 to 3,325.

New Drugs Rx without Approved NDAs (63002): Inspections reduced from 79 to 47.

Animal Drugs and Feeds

There are 123 Operational FTEs for FY 2007. This is a reduction of 4 Operational FTEs from FY 2006. Significant changes include:

Feed Manufacturing (71004): Inspections reduced from 243 to 220.

Ruminant Feed Ban/BSE Program (71009): Inspections reduced from 3,760 to 2594; resources are planned for FDA review of 895 state partnership inspections; Import entry review reduced from 12,900 hours to 11,700 hours; technical support hours for state activities were consolidated from the Feed Manufacturing Program and increased from 1,500 hours to 4,921 hours; import investigations hours were reduced from 7,900 hours to 3,800 hours; domestic investigation hours

are planned for OEI improvement activities; domestic sample collections/analyses reduced from 900 to 855; import sample collections/analyses also reduced from 900 to 855.

Pandemic Preparedness (71R852): 4 FTEs planned for assignments/activities related to avian flu.

Devices and Radiological Health

There are 237 Operational FTEs for FY 2007. This is a decrease of 7 Operational FTEs from FY 2006. Significant changes include:

Inspection of Medical Device Manufacturers: GMP program (82845): Total FTEs for Domestic Inspections increased from 87.3 FTE to 88.4 FTE; Accredited Persons Inspections decreased from 95 to 24; Foreign Inspections decreased from 207 to 200.

BSE Assignment (82Z005): Inspections reduced from 23 to 10.

Medical Device Premarket Approval and Postmarket Inspections (83001): Pre-Approval Domestic Inspections reduced from 33 to 20.

Imported Electronic Products (86007): Import entry review decreased from 10,195 hours to 7,790 hours.

Workplan Changes between FY 2006 and FY 2007

There have been some changes in the FY 2007 Workplan. Significant changes include:

- The program "ORA/Center Directed Research Projects" has been renamed "Methods Validation/Development Program" to more accurately reflect the activities conducted under this program. Resources previously planned as "District Research" will now be planned as "Methods Validation/Development". Resources previously planned as "Research Center" will now be planned as "Applied Technology Center". Laboratories should coordinate with ORO's Division of Field Science (DFS) regarding the utilization and reporting of this time.

- Total import investigational FTEs are planned to closely match the on-board operational FTEs reported by the Districts to DPEM. Unlike in the FY 2006 Workplan, domestic investigational and laboratory resources have not been adjusted to account for the on-board operational staff within a District or Regional Laboratory. The planned distribution of these resources is the result of the Workplanning process and represents the risk-based prioritization of program activities by the Centers, Field Committees, and ORA Headquarters. Analysis of the on-board staffing information from FACTS indicates that some Districts may not have enough domestic investigators on-board to conduct all the planned domestic investigational activities. The shortage of domestic investigators in some locations is the consequence of the extended hiring freeze and inconsistent rates of attrition across the country. The staffing levels for each office will be determined by the Table of Organization (T.O.) which will be based on the FY 2007 Workplan. The final T.O. for some offices will be different from the projected T.O. circulated earlier this year.

- The investigator FTE conversion factor for Animal Drugs and Feeds has been changed to 950 hours. All programs now have the same investigator FTE conversion factor. **The**

total number of operational hours expected from an investigator remains at 1,160. The 950 hours represents the portion of the 1,160 hours that is specifically planned in the Workplan for the operations of inspections, investigations, field exams, and sample collections. The remaining 210 operational hours (1,160-950) are for any other operational activities, such as recalls, emergency response, or unplanned inspections and investigations.

The "Reasons for Change" spreadsheets provide a listing of programs compared to the FY 2006 ORA Field Workplan, and will enable you to identify where specific resource shifts and programmatic cuts occurred.

The FY 2007 Servicing Laboratories Table continues to reflect the laboratory servicing changes consistent with ORA's Laboratory capabilities determined by the Division of Field Science. **Please review this table carefully before shipping any samples and note the latest changes.**

The FY 2007 Workplan has been published to a CD format. Your CD is non-writable and cannot be used to store or save data; however you may save any of the files to your PC system or to another media, i.e., zip drive, diskette, etc. You may make and distribute as many copies of this CD as needed. For further instructions, consult '**A User's Guide – READ ME FIRST**' located on the CD. If you have any technical questions, please e-mail Anita McCurdy at amccurdy@ora.fda.gov.

Any questions about the attachments or programs in the Field Workplan should be addressed to the program/project's planning analyst identified on the workplanning sheets (Form FDA 2622). Policy concerns should be directed to Michael W. Roosevelt at (301) 827-1638.

IV. RESOURCES FOR PROGRAM OPERATIONS AND NON-PROGRAM ACTIVITIES

GENERAL PLANNING GUIDANCE

A. PLAN OVERVIEW

1. OBJECTIVE

The purpose of this workplan is to provide field managers with resources and output projections deemed necessary to carry out FDA's mission in the field during the period, October 1, 2006 to September 30, 2007.

The workplan is designed to be an effective management tool which can be revised to accommodate emergency situations and unforeseen changes in program priorities. The goals provided in the workplan should be interpreted as statements of intent rather than as rigid requirements. Ideally, field offices should accomplish all planned operations and use all planned resources. If it is determined during the early months of the fiscal year that the planned operations will not require the use of the resources planned for a project or program category, alternative plans should be developed for the accomplishment of additional work in the same project or program activity.

Whenever it is determined that a region is unable to complete a significant portion of the workplan obligations because of emergencies or other unforeseen circumstances, the RFDD should inform the Director, Office of Resource Management, in writing, identifying the problem(s) and the recommended course of action. ORA management will work with the appropriate center director(s) to resolve the situation.

2. AN OVERVIEW OF FDA's PROGRAM AND PROJECT STRUCTURE (PPS)

The Field Workplan is developed within the framework of FDA's Program and Project Structure (PPS) formerly Program Management System (PMS). This system utilizes a structure of programs and projects to provide a common language for planning and strategic decision-making in FDA.

More specifically, the PPS is used as the common denominator for tactical and strategic operations including:

- Long-range planning
- Budgeting
- Operational planning
- FDA accounting system
- Developing financial operating plans
- Satisfying HHS reporting requirements
- Implementing evaluation programs
- Center and ORA project reporting of obligations

2. AN OVERVIEW OF FDA's PROGRAM AND PROJECT STRUCTURE (PPS) (Continued)

The PPS assures that appropriate types and levels of resources can be allocated, reported, and managed by means of a system of organized priorities and objectives.

All budgeted field operational resources are accounted for in the projected compliance programs and assignments.

A significant portion of the allocated resources is covered by general guidance programs that provide the flexibility necessary for the Regional Food and Drug Directors to respond properly to emergencies and problems indigenous to their regions and districts.

3. TERMS AND DEFINITIONS

During FY 2007, the Program and Project Structure (PPS) will function under the following framework:

TERM	DEFINITION	EXAMPLE
Budget Activity	The broadest of classifications, this is the basic breakdown of FDA's areas of activity used in developing and implementing the FDA budget and ancillary justifications.	Foods
Program Activity	A general mission-oriented activity comprised of one or more projects.	Food and Cosmetics
Projects	A group of compliance programs/assignments which together form a work effort towards a common objective. Each project is identified by a two-digit code.	03 Foodborne Biological Hazards
Compliance Programs	Informative and instructive documents concerning field operations (prepared by centers and ORA).	
	a. **General Guidance Programs:** contain instructions as to general approach and requirements in carrying out certain operations. These programs do not include assignments relating to specific establishments or products. Instead, they provide resource and output projections by district, thus giving field managers latitude to meet particular problems unique to their region or district.	Import Foods - General Program
	b. **Specific Action Programs, Assignments and/or Special Surveys:**	
	(1) **Industry and Product Regulatory Survey and Action Programs** - provide guidance and direction in approaching certain problems and an operational schedule with specific assignments to the field.	Import and Domestic Micro Assignment

3. TERMS AND DEFINITIONS (Continued)

TERM	DEFINITION	EXAMPLE
	(2) **Surveys** – provide guidance and direction to enable the field to perform surveys according to a specific operational schedule.	Drug Product Surveillance--Center Initiated Surveys
	In general, the compliance programs and assignments serve the following purposes: a. Recognize and deal with problem areas. b. Determine the degree of noncompliance with respect to recognized problems. c. Gather data for the promulgation of regulations or establishing administrative guidelines. d. Direct numbers/hours, and kinds of operations to be performed by field offices.	
Operations	The quantifiable activities to be done by field personnel.	Inspections, Sample Collections, Samples to be Analyzed, etc.

Appendix I lists all FY 2007 PPS Projects.

4. WORK ASSIGNMENT TO FIELD LABORATORIES

The basic policy followed by the ORA planning staff is to plan analytical work to the designated servicing laboratory for a specific collecting district or, if appropriate, national coverage. The designation of a servicing laboratory may in part be predicated on specialized equipment or expertise in that particular laboratory or the designation of that laboratory as a national servicing lab in a smaller program.

The FY 2007 ORA Workplan reflects assignment of work in regional laboratories (Arkansas, Northeast, Pacific Northwest, Pacific Southwest, and Southeast); specialty laboratories (Forensic Chemistry Center (FCC), Philadelphia, San Juan, and Winchester Engineering and Analytical Center (WEAC)); or district laboratories (Denver, Detroit, Kansas City, San Francisco).

Appendix III represents the current capabilities of ORA's laboratories. Changes should be noted in relation to the FY 2006 ORA Field Workplan.

5. RELATION TO OTHER PLANS

The FY 2007 ORA Field Workplan is the product of a series of planning and budget operations. It represents the conversion of objectives and directions effected by Congress, OMB, HHS, PHS, OC, Associate Commissioners, the Centers, and the ORA organization into projected program outputs and resource allocations.

a. **Annual FDA Program Planning Process:** The objective of this planning activity is to provide the basis for the development of future budget requests for FDA. Projections are provided for

accomplishment objectives at various levels of funding. The results of this planning process are used to provide support for the development of FDA priorities, budget requests to DHHS, and FDA planning.

The planning process proposes and develops initiatives or strategies for Agency use in the budget process. The strategies reflect the Commissioner's intentions for the future of FDA.

b. **Annual FDA Congressional Budget Request:** The primary basis for this Workplan is the FY 2007 FDA budget. This budget outlines the planned Agency direction and objectives in relation to each of the major budget categories. Resource levels expressed in the budget provide the basis for the development of compliance programs and assignments. Work assignments projected for each district and region in these compliance programs provide the matrix against which staffing guidelines are developed. The request to Congress is not the level at which FDA is funded. The final appropriation amount, usually not known until just before the new fiscal year, historically is lower than the requested level except for special areas.

B. FY 2007 GUIDANCE

This section provides guidance in relation to programmatic objectives and operational requirements related to the FY 2007 Workplan.

1. COMPLIANCE POLICY AND PHILOSOPHY

Formal methods of issuing FDA compliance policy/philosophy are:

- Federal Register Announcements and the Code of Federal Regulations
- Compliance Policy Guides Manual
- Regulatory Procedures Manual

Less formal methods of issuing FDA compliance policy/philosophy include:

- Regulatory action recommendation memoranda from centers to the field
- Letters and speeches to industry and other outside associations or individuals by the centers or other FDA units
- Memoranda issued by centers or other headquarters units on specific current activities
- ORA Conference calls

All of the above sources should be monitored and referred to for FDA compliance policy/philosophy and all are used in the development of the ORA Field Workplan.

2. ORA CONTACTS FOR WORKPLAN-RELATED PROBLEMS

General inquiries or problems experienced by field managers concerning programs in the workplan should be addressed to the planning analyst identified in the Workplan (Form FDA 2622) as responsible for the program/project. Policy concerns should be directed to Michael W. Roosevelt (HFC-41), 301-827-1638.

ORA management will work with the appropriate center to resolve any planning problems identified by the field.

3. FY 2007 RESOURCE ACTIVITIES

The FY 2007 ORA Field Workplan is based on a FTE level of 3,200 FTEs which is a decrease of 128 FTEs from the FY 2006 ORA Field Workplan level of 3,328 FTEs. The FY 2007 FTE level is the result of the budget reductions faced by ORA.

4. PRODUCT CODE

Whenever possible, the Industry Code portion of the Product Code (the first two code characters) is included on the Form FDA 2621 for guidance and assistance in planning.

5. NATIONAL EXPERTS

The Field Workplan includes program operations to be performed by personnel designated as "National Experts". National experts are investigative personnel who perform foreign and domestic inspections that require specialized knowledge and experience.

6. TEAM BIOLOGICS

Team Biologics is a partnership between the Office of Regulatory Affairs (ORA) and the Center for Biologic Evaluation and Research (CBER). This partnership uses the diverse skills and knowledge of both ORA and CBER staffs to focus resources on inspectional and compliance issues in the biologics area. The goal of Team Biologics is to ensure the quality and safety of biologic products and quickly resolve inconsistencies and bring products into compliance.

ORA has established a cadre of specially trained investigators whose principle focus will be biological products inspections. The ORA Field Workplan includes program operations to be performed by members of this cadre.

7. EMERGENCIES

a. ***Impact on Plan: Time is made available for handling some emergencies through the workplanning process. However, no workplan can include full provision for unforeseen emergencies or critical situations requiring significant amounts of personnel in varying programs/locations. Should these problems arise, the Field Workplan provides a tool for the establishment of priorities and the organized revision of programs and workloads to meet the field's most urgent obligations.***

b. **Efficient Use of Field Resources:** In some emergency situations, field offices must stop or curtail activities in certain lower priority program areas to redirect resources to meet the emergency situation in the most efficient manner. Investigational and analytical staff may be called on to assist or perform activities (interchangeably) to maximize the efficient utilization of available resources. Personnel may be deployed from district to district, region to region, and if necessary, laboratory workloads may be reassigned to assure work accomplishment.

C. REPORTING REQUIREMENTS

1. REPORTING OF OPERATIONS

Projections in the FY 2007 ORA Field Workplan are expressed in terms of either operations and

hours or only hours per compliance program within each Program and Project Structure project. Please note that many compliance programs may involve multiple projects, and should be reported as such.

2. PROJECTS WITH NO PLANNED FIELD RESOURCES

Appendix I details those projects for which no resources have been planned for FY 2007. No activities should be planned for these projects unless specifically directed by an assignment from the responsible center.

3. DATA REPORTING

The Agency relies on the data in the Field Accomplishments and Compliance Tracking System (FACTS), and Operational and Administrative System for Import Support (OASIS) to provide information regarding resource expenditures and operational accomplishments to the Department of Health and Human Services, Office of Management and Budget, Congress, consumer organizations, state agencies, and other federal agencies. Monthly and quarterly reports prepared from this data are also used by ORA and other headquarters units for planning, preparing budget resource requests, and evaluating field accomplishments in relation to planned work. In addition, ORA planning personnel use the FACTS and OASIS data for the development of the Field Work-plan. Therefore, it is important for data reporting to be both accurate and complete.

4. HARD COPY REPORTING

During FY 2007, ORA will continue, through the development of compliance programs, with the cooperation of the centers to limit hard copy report requests to only those cases of absolute need. At the request of ORA, the centers will identify, on all compliance programs and assignments requiring hard copy reports, a central place to which all reports bearing on that center should be routed. Please assure that all reports are submitted in accordance with the instructions in the compliance programs and field management directives (e.g., FMD 71 and 92).

D. REVISIONS TO THE FY 2007 FIELD WORKPLAN - PLANNING BULLETINS

Planning bulletins are issued to notify the field of workplan changes. Such bulletins may be issued as a result of requests for changes concerning workload, availability of products, etc., addressed during the field's critique of the workload analyses and the final Field Workplan. Planning bulletins are also issued for inter/intra center midyear resources reprogramming needed to adjust significant resource overburn in program(s) resulting from emergency situations or changing priorities.

The Planning bulletins are used to convey and explain workplan changes to the field and will include the following:

1. Part III.
   a. Operational changes
   b. New compliance programs or assignments
   c. Canceled compliance programs or assignments
   d. Changes in resources or issuance dates, etc.

2. New Part II to reflect new district office resources resulting from changes in work assignments.

3. New Part I as necessary.

E. OFFICIAL ESTABLISHMENT INVENTORY (OEI) DEVELOPMENT AND MAINTENANCE

1. One of FDA's basic responsibilities is to have complete and accurate information on the establishments for which we have regulatory responsibility. This allows us to effectively and efficiently:

   a. Assess and then communicate to the Executive Branch and Congress our responsibilities and resources needs; in terms of money and FTEs in order to enforce the laws under FDA jurisdiction.

   b. Allocate resources to district offices in direct proportion to their share of the establishment workload; for the various compliance programs and assignments identified in the annual ORA Field Workplan.

   c. Provide other governmental organizations and the public under the Freedom of Information Act data about the types and numbers of firms FDA regulates.

2. Field Management Directive FMD-130, OEI Development and Maintenance Procedures, provides guidance to field and headquarters units on all facets of OEI development and maintenance.
