PACKAGE INSERT

WHAT YOU SHOULD KNOW ABOUT:

Famotidine Orally Dissolving Strips, 10 mg / Acid Reducer

A non-prescription stomach medicine

This product contains a medicine, different from antacids, that doctors have prescribed for years to treat acid-related problems in millions of people.

Product Benefits:

- **1 orally dissolving strip** relieves heartburn due to acid indigestion.
- This product prevents heartburn associated with acid indigestion and sour stomach brought on by eating or drinking certain foods or beverages.
- It contains famotidine, a prescription-proven medicine.

Shown actual size <Insert graphic of strip>

How to use Famotidine Orally Dissolving Strips

Adults and children 12 years and over:

Use this product to relieve or prevent heartburn due to acid indigestion and sour stomach.

<i><Insert graphic of strip></i>	TO RELIEVE SYMPTOMS Allow 1 strip to dissolve on your tongue.
<i><Insert graphic of strip and clock></i>	TO PREVENT SYMPTOMS Allow 1 strip to dissolve on your tongue 60 minutes before eating food or drinking beverages that cause heartburn.

Famotidine Orally Dissolving Strips 10 mg can be used up to twice daily (up to 2 strips in 24 hours).

Excess acid: a burning problem

It is normal for the stomach to produce acid, especially after consuming food and beverages. However, acid in the wrong place (the esophagus), or too much acid, can cause burning pain and discomfort that interfere with everyday activities.

Heartburn – Caused by acid in the esophagus

Tips for Managing Heartburn

- Do not lie flat or bend over soon after eating.
- Do not eat late at night, or just before bedtime.
- Certain foods or drinks are more likely to cause heartburn, such as rich, spicy, fatty, and fried foods, chocolate, caffeine, alcohol, and even some fruits and vegetables.
- Eat slowly and do not eat big meals.
- If you are overweight, lose weight.
- If you smoke, quit smoking.
- Raise the head of your bed.
- Wear loose fitting clothing around your stomach.

Proven effective in clinical studies

In clinical studies, famotidine tablets 10 mg were significantly better than placebo tablets (tablets without the medicine) in relieving and preventing heartburn. This product contains the same active ingredient.

Excellent safety record

The ingredient in this product, famotidine, has been prescribed by doctors for years to treat millions of patients safely and effectively. The active ingredient in this product has been taken safely with many frequently prescribed medications.

Know when to see your doctor

Heartburn and acid indigestion are common, but you should stop taking famotidine strips and see your doctor promptly if:

- You have trouble swallowing or stomach pain continues. You may have a serious condition that may need different treatment.
- You need to take this product for more than 14 days.

Allergy alert: Do not use if you are allergic to famotidine or other acid reducers. Do not use with other acid reducers. This product should not be given to children under 12 years old, unless directed by a doctor. As with any drug, if you are pregnant or nursing a baby, seek the advice of a health professional before using this product. Keep this and all drugs out of the reach of children. In case of accidental overdose, seek professional assistance or contact a Poison Control Center immediately.
