Wellness International Network, Ltd.

NOTIFICATION PURSUANT TO SECTION 6 OF DSHEA AND 21 CFR §101.93

This notification is being filed on behalf of Wellness International Network, Ltd., which is the distributor of the product which bears the statements identified in this notification. Its business address is: 5800 Democracy Drive, Plano, Texas 75024. This notification is being made pursuant to Section 6 of DSHEA and Regulation 21 C.F.R. §101.93. The dietary supplement product on whose label or labeling the statements appear is Pro-Xtreme™.

The text of each structure-function statement for which notification is now being given is:

- 1) Predigestion by sequential-enzymatic-hydrolysis produces the highest level of *di* and *tripeptides* while limiting the amount of free form amino acids.
- 2) This promotes increased absorption by slowing intestinal transit, making Pro-Xtreme™ highly effective in reducing cholesterol absorption and maintaining digestive health.
- 3) The addition of gram amounts of L-glutamine to the natural 5-7% glutamine content of whey protein improves GI and immune functions and promotes anticatabolic effects in skeletal muscle.
- 4) Glutamine and the critical BCAA leucine are indispensable for the healthy functioning of other tissues and metabolic processes.
- 5) The combination and sequencing of amino acids in whey protein results in increased tissue storage of glutathione.
- 6) The antioxidant activity of glutathione improves immune function.
- 7) Proteins with high BV meet metabolic requirements more effectively and at lower intake levels (especially during periods of increased protein utilization such as exercise and anxiety).
- 8) The high levels of *di* and *tripeptides* and BCAAs, as well as the enhanced glutamine content of Pro-Xtreme™ promote increased nitrogen retention, minimizing the negative effects of increased protein consumption or reduced caloric intake.
