*Dear Food and Drug Administration (dockets man. Grp)*

*"Farm Sanctuary" has made me aware of letters needed in the support of the petition to prohibit the slaughter of downed animals. (Docket #98p-151/cp1) I totally agree that this should be stopped. The monetary loss is nothing compared to what those animals go through mentally and physically and most important removing the market for them will provide incentive for the industry to prevent it in the first place. Please put yourself in the animals shoes for just a moment before making your decision.*

*Sincerely,*

*Jennifer Fruechtl*
