RE: CHILDREN'S COMPLETE VITAMIN AND MINERAL DRINK

Dear Sir / Madam:

This is a 30-day notification of a statement of nutritional support for a dietary supplement. The product name is **Andrew Lessman's Children's Complete Vitamin and Mineral Drink**. The structure / function claims on all sizes and configurations of this product are identical. They are as follows:

It delivers 200 milligrams of Calcium for your child's healthy bones since adequate calcium intake during childhood, when the skeleton is still developing, is more important than at any other stage of life, as this period essentially determines the strength of the skeleton in later years, presenting a once in a lifetime opportunity to build strong bones.

Research has shown that a child's need for adequate nutrition is not just limited to growth requirements. These essential vitamins and minerals are also critical for virtually every metabolic process, including energy production, along with vital support to brain function and learning.

Respectfully Submitted,

A handwritten signature in cursive script that reads "Shawn Tiller".
