RE: Notification Of Statements Concerning Dietary Supplements

Dear Sir or Madam:

Vita Cube Systems, Inc., 480 South Holly Street, Denver, CO 80246 ("V3S"), a packager and distributor of dietary supplements, hereby notifies the FDA that it has made certain structure/function statements concerning its products, some which were first marketed pursuant to the statements in the last 30 days and others of which will be marketed pursuant to the statements in the near future.

V3S is a start-up company which has just begun to market many of its dietary supplement products using a novel "Cube" system (Patent Pending). The enclosed materials describe the Cubes, which contain a number of complementary supplements. The supplements contained in the Cubes are V3S' primary line of supplements. Other supplement products are stand alone products, sold separately in bottles placed in boxes. These supplements are V3S' specialty products. V3S also sells a protein shake product, and an electrolyte drink powder.

I have enclosed copies of labels for the Cubes marketed by V3S. The structure/function claims for the primary supplements are contained in the very brief descriptions included on the labels. (At some point these primary supplements will also be marketed in bottles and boxes; I will send along the labeling claims as soon as they are prepared.) I also enclose verbatim copies of the language on the bottles and boxes in the specialty line and copies of the labels for the protein shakes and electrolyte powder. The labels on the specialty line boxes and bottles are currently under study and review and may be revised. (The revisions will be forwarded when made.) Further, a V3S Product Guide, which may be given to consumers at the time they receive their Cubes or specialty products and also contains structure/function claims, is enclosed. Lastly, I include Cube and supplement descriptions on our website which recently went online and allows consumers to purchase products from the company through the use of email.

Also see docket
97S-0163

This notice is hereby certified as accurate and complete. Vita Cube Systems, Inc. has substantiation that all statements made in the attached pages **are** truthful and not misleading.

Please call me at 303-316-8577 if you have questions or comments.

Sincerely,

Dr. William E. Wheeler, PhD, RD
Director of Science and Technology
Vita Cube Systems, Inc.

Bottle Statements:

1. Ginkgo Clear – Mental Clarity

- Ginkgo Clear was developed to aid in mental clarity and acuity which can increase one's ability to focus on competition, training and specific tasks
- Ginkgo Biloba has been used in Chinese medicine for over 5000 years and is believed to improve the flow of blood and oxygen to the brain, increasing alertness and mental responsiveness while maintaining healthy blood vessel tone.

FDA Disclaimer

2. Visual Eyes- Vision Health

- Visual Eyes is a total vision health formulation for all ages
- Visual Eyes provides 6 mg per day of Lutein which is reported to help stop the progression of Macular Degeneration
- Visual Eyes is enhanced by a balanced formulation of vitamins and minerals that support better eye health

FDA Disclaimer

3. Muscle MR3 – Repair, Recover, Restore

- MR3's compounds have been known to help the body's ability to recover and repair soft tissue more quickly
- MR3's proprietary blend helps support the body's ability to restore the natural balance of nutrients in the muscles
- MR3 helps to neutralize the lactic acid build-up in the muscle

FDA Disclaimer

4. Enduro Max – Stamina and Endurance

- Enduro Max contains a proprietary combination of six hot and cold Ginsengs that improve stamina and enhance endurance
- Enduro Max is natural and safe to use **as** it does not affect the central nervous system, and has no dangerous stimulants as Ephedrine (Ma Huang).
- Natural cell energizers, Thiamin, and Riboflavin are added in significant quantities

FDA Disclaimer

5. Complex SSP – Prostate Support

- Complex SPP is an efficacious, natural dietary supplement that is beneficial for healthy prostate function.
- Complex SPP's proprietary formulation contains the purest form of Saw Palmetto extract at 85% fatty acid.
- Complex SPP may also be beneficial for inflammatory relief

FDA Disclaimer

6. WNB - Women's Balance

- Effective assistance for women's cyclical changes in a natural form.
- WNB uses the Women's Herb, Dong Quai, with essential vitamins and minerals to help balance a women's hormonal system.
- Amino acids, thought to be effective for hormonal regulation, are added to this excellent proprietary formulation for women.

FDA Disclaimer

7. Multi Chews

- MultiChews are an all natural, multi-vitamin/ mineral that is in chewable form for both adults and children.
- MultiChews are made from a natural fruit and vegetable base and contain no artificial sweetening such as aspartame.
- MultiChews proprietary formulation includes Chromium which helps the body use insulin more effectively.

- Balanced Mood is a natural alternative that may

SPECIALTY LINE

Box Statements

1. Ginkgo Clear – Mental Clarity

Regain your edge by sharpening your mind's ability to focus. For over 5000 years, Chinese medicine has used Ginkgo biloba for brain and respiratory track health. Improving the flow of blood and oxygen to the brain is how the herb is thought to be a success for mental clarity and acuity. **V3S** further balanced the formula with essential vitamins and minerals to aid in neurological function which can increase one's ability to focus on competition, training and specific tasks. These additions include Vitamin A, Vitamin E, Thiamine, Riboflavin, Niacin, Pantothenic Acid, Calcium, Zinc, Selenium, and Chromium.

FDA DISCLAIMER ALSO ON BOX

2. Visual Eyes-Vision Health

Our eyes are the windows to the world and the mirrors of our souls. Too often, we take vision for granted, and assume that visual deterioration with age is unavoidable. Perhaps we can improve those odds by taking a carotenoid called Lutein. **As** little as **6** mg a day, Lutein has been shown in significant research to stop the progression of Macular Degeneration, the leading cause of blindness, for those over the age of 45. **The** unique formulation of Visual Eyes includes a complete balance of vitamins and minerals, plus an herb called Eyebright which is used in Chinese medicine to maintain healthy vision and treat a wide array of eye disorders such as cataracts and retinopathy.

FDA DISCLAIMER ALSO ON BOX

2. Muscle MR 3 – Repair, Recover, Restore

Workout pain has a gratifying feeling unlike other types of pain. But nevertheless it is still pain. We exercise hard, and our reward is all-to-often sore muscles aching for relief. Muscle MR3 goes straight to the point of pain and helps to recover, restore and repair the soft tissue and muscle soreness caused by exercise and daily activities. In order to neutralize the lactic acid build-up in the muscle, and help the body's ability to restore and repair soft tissue more quickly, **V3S** has developed a proprietary combination of Calcium Citrate Malate, Vitamin C, Pueraria Root and other natural ingredients such as Bromelain. This powerful blend will help the body restore the natural balance of nutrients in the muscle which in turn, helps to reduce soreness. Get back in high gear.

FDA DISCLAIMER ALSO ON BOX

4. Enduro Max - Stamina and Endurance

Accelerate your performance! Demanding excellent performance naturally, safely, and effectively begins with EnduroMax. V3S developed Enduro Max with a perfect balance of six different types of hot and cold Ginsengs to improve endurance and stamina. Chinese philosophy and scientific research come together to create a formula that avoids using central nervous system stimulants such as ephedrine (Ma Huang). To validate the effects of Ginseng, such world-class universities as the National University of China have performed extensive studies on elite athletes. High performance and increased stamina are cornerstones to the amazing benefits of Enduro Max.

FDA DISCLAIMER ALSO ON BOX

5. Complex SPP - Prostrate Support

Maintain prostate health. Complex SPP is a proprietary formulation, containing the finest natural ingredients. Among these is a standardized Saw Palmetto Extract of **85%** fatty acid. It is this research supported form of extract that has been shown to reduce enlarged prostate. Pumpkin Seed Oil and Pygeum were added to this formulation for their inflammatory relief properties. To complete the powerful formula, V3S added Epimedium grandiflorum (horny goat weed). This special herb may help to enhance libido which increases male sexual drive. Selenium and Zinc are included to support the specific needs of the active male. Complex SPP, for confidence in the years ahead - and now!

FDA DISCLAIMER ALSO ON BOX

6. WNB –Women's Natural Balance

Cyclical hormone changes can throw a woman off balance.

To help, natural supplements have become increasingly popular, and for good reason. For a natural, effective, method of getting life back in balance, V3S has come to save the day with a powerful, formulation of herbs, vitamins, minerals and amino acids, all known to be beneficial to help these imbalances.

Dong Quai, the Chinese ³Women's Herb², is combined with a proprietary combination of plant phyto-sterols, isoflavones, vitamin B6 and Pantothenic Acid, as well as essential oils from Evening Primrose Oil. These are then combined with essential amino acids (Isoleucine, Leucine and Valine), which all have been significantly researched and have shown to be critical in aiding hormonal regulation and balance for women

The scales are now in your favor.

FDA DISCLAIMER ALSO ON BOX

7. MultiChews - Multi Vitamin Wafer with Minerals

Chew your way to better health! It's true. A wafer that tastes great naturally, is now serving as a multi-vitamin and mineral supplement for the whole family! This wafer includes beneficial amounts of absorbable, essential vitamins and minerals for both

adults and children. Made of a fruit and vegetable base, (no sugar or aspartame), these wafers also include Chromium which help the body use insulin, a hormone that transfers blood sugar (glucose) to the cells, where it is burned as fuel. With enough Chromium, the body uses insulin efficiently and is able to maintain normal blood sugar levels.

FDA DISCLAIMER ALSO ON BOX

8. Balanced Mood – Mood Support

Achieve balance naturally. Balanced Mood is formulated with a standardized extract of St. John's wort, a gentle alternative to conventional medications that has been shown to naturally relieve symptoms of mental and physical fatigue related to stress or over training. This proprietary blend is rounded out with L-Tyrosine, an amino acid directly involved in brain function that may reduce the effects of stress and enhance cognitive performance. This formulation was designed to help support the formation of neurotransmitters in the brain that naturally elevate mood.

FDA DISCLAIMER ALSO ON BOX

9. Pure Heat – Soft Tissue Support

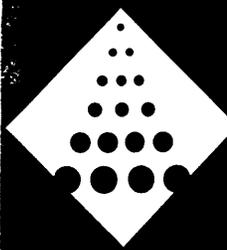

Healing, HEAT! It is not uncommon for sport injuries and chronic joint pain to occur in individuals who train hard and lead a highly active lifestyle. Boswellic Acid, Cayenne and Turmeric are used in this high-performance, natural formulation of Pure Heat. These key ingredients may help to increase blood flow to the area of need and encourage the body's natural ability to alleviate pain and enhance healing. Pure Heat is the result of extensive research at **V3S** to provide natural COX-2 inhibitor actions, which have been

BALANCED PROTEIN DRINK

You are serious about your nutrition, and when it comes to protein, you want a product used by professionals. V3S[™] VitaPro[™] is a completely balanced macronutrient meal supplement, which provides 42 grams of highest-quality protein blend in each serving. Developed by the V3S research team, this proprietary blend of proteins has a Protein Efficiency Ratio* of 1.2, exceeding the standard by 20%. Our amino-acid profile offers a natural metabolic advantage, and optimal support for cellular nutrition and the growth of muscle cells. The patented Aminogen[®] enzyme increases amino acid absorption by 260%. Essential fatty acids and medium-chain triglycerides provide necessary lipids for optimal cellular

function, while 5 grams of dietary fiber aid in digestion and helps to maintain a normal, healthy cardiovascular system. Fortified with vitamins, minerals and antioxidants for complete nourishment, VitaPro is aspartame-free, low in fat and calories, and has a very favorable electrolyte profile. For optimal health and wellness, combine exercise and good nutrition with the complete line of VitaCube Systems[™] dietary supplements.

Also includes VitaCube Systems Revolutionary Proprietary Activating system of 17 enzymes, antioxidants and herbs designed to activate and synergize your body's biological and physiological systems.**

INTRODUCTION

Welcome to V3S - VitaCube Systems™

V3S™ is a forward thinking nutritional company aimed at offering the highest quality products using only natural ingredients. We view ourselves as partners and peers with our customers, employees, community, and our environment, and take personal responsibility in our actions towards each. We intend to create an awareness of the positive benefits derived from physical fitness and safe health supplements. We will continually refine our program with a team of scientists, biochemists, and pharmacists to create comprehensive formulations of the highest standards. We hope you will join us and include the VitaCube System™ in your quest for optimum health.

Primary & Specialty Line

The V3S **Primary Line of Supplements** represents outstanding achievement in the research of advanced nutrition. V3S has applied its knowledge and extensive research in nutrition and developed an integrated system of comprehensive and natural complexes. Each complex was developed with ingredients that compliment one another. When taken together these proprietary formulas work synergistically to provide the ultimate nutrition for your body. The thirteen Primary complexes are offered in our innovative delivery system, the "VitaCube™", organized into three levels, Basic, Essentials and Elite. You can be confident that recommended usage of these thirteen supplements would provide your body with the most bio-available nourishment in a supplemental form.

V3S has also created a **Specialty Line of Supplements**. Every individual can benefit from one or more of these extraordinary products. Our supplements may help enhance performance and increase health in specific areas. You can choose from one or more of the nine specialty line products to fit your personal needs and lifestyle.

Both the Primary and the Specialty Line incorporate the revolutionary VitaCube Activating System™ that provides the foundation for each complex. This ACTIVATING System contains an exclusive, proprietary blend of 17 essential cellular, metabolic factors that are designed to dissolve in the body almost immediately, facilitating absorption into the digestive tract and blood stream. The result is an optimal level of effectiveness in advanced nutrition.

Beverages

Protein is a vital nutrient to our bodies. The V3S line of VitaPro™ shakes offers the highest quality protein blend and patented enzymes to maximize the Protein Efficiency Ratio. Research has shown that protein may build muscle and prevent soreness as well as speed up the recovery process after workouts. These products contain the VitaCube Activating System, are aspartame-free, low in fat and calories, and have five grams of soluble fiber for easy digestion.

E Force™ is a precision nutrition rehydration drink that provides crucial electrolytes such as sodium, potassium, calcium, magnesium and natural vitamin E. Research has shown that vitamin E may aid in repair of muscle cells after exercise. While other electrolyte drinks use high levels of sugars to sweeten their products, E Force utilizes Ribose, a 5-carbon energy source plant sugar that maintains level blood glucose. Our electrolyte drink uses new "flake" technology that is easier for your body to absorb and mixes easily.

Company Philosophy

From the time of its inception, V3S™ has had a strict internal policy with respect to the kinds of products we formulate, manufacture and sell. We have never made in the past nor would we ever make in the future any products that contain ephedrine, androse, creatine, or any substance that is considered experimental or having potential adverse effects. We only formulate products utilizing the finest ingredients which are backed and supported by positive scientific research. In fact, many of our customers include professional athletes, coaches, trainers and health care practitioners who have been attracted to our products because of our high quality standards.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent disease.

ABSORBIT

Digestive Support
Plant Enzymes 500mg*

Absorbit is an innovative blend of 5 phyto-enzymes including the plant-derived enzyme system called Aminogen. Plant enzymes were used because animal enzymes are more likely to produce allergic reactions. These enzymes help our bodies absorb vital nutrients from the foods we eat by supporting the breakdown of proteins, fibers, carbohydrates, and fats. As we get older our bodies secrete fewer enzymes causing unneeded discomfort and intolerances. Therefore, V3S has created a blend of enzymes, Absorbit, which focuses on supporting digestive health, including amylase for support of digestion of carbohydrates; cellulase for fiber; lipase for fats; and lactase for lactose (milk sugar).

Aminogen was added to the blend of digestive supporting enzymes because of its enhancing effects on protein absorption. Aminogen is a plant derived enzyme system that breaks down protein into free form amino acids, making them more available to muscles and cells. Aminogen has been shown to increase amino acid absorption by 260%, optimizing the ingestion of protein in the foods and supplements.

Supplement Facts

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent disease.

ALPHA NAC

Antioxidant Support
Alpha Lipoic 250mg / N-Acetylcysteine 500mg

AlphaNac is a combination of Alpha Lipoic Acid and N-Acetylcysteine, two elements that may support liver function and cellular metabolism. These two ingredients were combined to help support the elimination of dangerous free radicals created when the body is under stress.

Alpha Lipoic Acid is an anti-oxidant that may neutralize free radicals before they become damaging. On the other hand, N-Acetylcysteine helps the liver to transport these neutralized radicals out of the system eliminating them for good. The combination of a neutralizer and transporter supports better health and function for the liver.

V3S

V3S

AO EL E

Cardiovascular Health Support
 Arginine 625mg* / Ornithine 375mg*

AO Elite, contains L-Arginine and L-Ornithine, two amino acids that may help to increase circulation and build muscle within the body. The highest quality available of L-Arginine and L-Ornithine was used to develop this complex, which is easily absorbed in the intestinal walls.

The many benefits of L-Arginine have been well documented, earning Stanford University a Nobel Peace Prize. L-Arginine has been shown previously to help raise levels of nitrogen oxide, which may increase blood circulation. L-Ornithine, being a valuable branched chained amino acid, aids in building muscle. When combined with Arginine, it helps support metabolism of excess fat.

CAL/MAG+

Bone Health Support
 Calcium 250mg* / Magnesium 100mg* / Boron 100mcg*

Calcium is the most abundant mineral in our bodies, but most individuals receive less than the amount of calcium they really need. Cal/Mag+ was created with Calcium, Magnesium, and Boron, three minerals supporting healthy bones and strong muscles.

There are seven different sources of calcium in Cal/Mag+, allowing for the release of calcium for a longer duration. This gives the body ample opportunity to absorb this essential mineral. Various forms of calcium absorb into the system at different rates, some are slow while others can be quicker. Combining seven different sources, all with varying rates, allows the body to receive the calcium it needs at the appropriate times. Additionally, the calcium in this formula is lead-free, therefore reducing any toxic effects.

Bones need magnesium as much as calcium. Cal/Mag+ has four different sources of magnesium. Magnesium is vital for bone strength but cannot be absorbed by the intestinal wall without calcium as a transport system. Therefore, Cal/Mag+ has combined the two for more efficient Magnesium transport and use, resulting in greater support for stronger, healthier bones.

Boron was added to help promote bone strength.

SCV

SCV

COMPLEX SPP

Prostate Support
Saw Palmetto 160mg* / Pumpkin 25mg* / Pygeum 5mg*

Complex SPP was developed to support prostate function among men over forty. A purified form of Saw Palmetto Berries extract, 85% fatty acids and sterols, is the key ingredient in Complex SPP that promotes the prostate.

These powerful, purified forms of Saw Palmetto Berries have been kept active by placing them in gel capsules. It was important for V3S to ensure that Complex SPP did not lose any of its activity when supporting prostate cell function.

CP COMPLEX

Immune System & Electrolyte Support
Vitamin C 500mg* / Potassium 49.5mg*

Vitamin C, also known as ascorbic acid, is required for at least 300 metabolic functions in the body. Potassium, a mineral responsible for regulating heartbeat and blood pressure, works best in acidic environments. V3S combines the two, Vitamin C and Potassium, to capitalize on the benefits of both Vitamin C and Potassium.

Vitamin C is essential because the body does not have the ability to manufacture this valuable vitamin on its own. Because Vitamin C is crucial to cellular metabolism, CP Complex contains the highest quality Vitamin C available. Cells may react to different forms of Vitamin C. Therefore, CP Complex uses four different forms to insure maximum uptake and utilization. Vitamin C serves the body as an aid to support immune system function.

After calcium and phosphorus, Potassium is the most abundant mineral in the body. Potassium, an electrolyte, is vital with sodium in keeping balanced fluid levels in the body. Three different sources of potassium are used to maintain a stable balance of this electrolyte.

Supplement Facts

V3S

V3S

GC ELITE

Muscle Energy Support
Glutamine 1000mg* / Carnitine 500mg*

GC Elite is V3S' innovative combination of L-Glutamine and L-Carnitine. GC Elite is useful not only for athletes who are working to build muscle, but also for individuals who want to burn excess fat. Combining these two dynamic nutrients may help to promote weight management as well as muscle repair.

One of the most abundant amino acids found in muscles is L-Glutamine. Muscles need L-Glutamine to help synthesize the muscle protein that is necessary for muscle function.

One of the functions of L-Carnitine is to help utilize the fatty acids that are found in cells so the body can use it as energy. L-Carnitine may help provide energy to an athlete when they need it the most.

GC Elite works together with the body to support the use of fat as an energy source.

V3S

JSH

Joint Support Health
Glucosamine 500mg* Chondroitin 400mg* / MSM 250mg*

Glucosamine and Chondroitin, combined with MSM and herbs, are the main components of JSH, a complex that may support joint function and promote flexibility and mobility.

Glucosamine has been shown to actually help support cartilage. This fairly small molecule combines with the larger molecules that are necessary for cartilage maintenance. Glucosamine works as an amino sugar, a component of carbohydrates that make up body tissue, so it is involved in the formation of nails, tendons, skin, eyes, bones, ligaments, and heart valves.

Studies have shown that Glucosamine when combined with Chondroitin, another carbohydrate molecule, provides even greater support for cartilage tissue. Chondroitin attaches to protein molecules that attract water to cartilage tissue, which is vital for maintaining healthy joint cartilage. By blocking certain enzymes that prevent nutrients from being transported to cartilage, Chondroitin also aids in keeping cartilage healthy.

JSH is the first Glucosamine/Chondroitin combination to add herbs with and MSM to its complex. The natural herbs, Cayenne, Boswellia, and Turmeric are added to help support tissue, muscle and joint function. MSM is a high-grade source of sulfur, which is necessary for ligaments and tendons to be strong and healthy.

Supplement Facts

Serving Size 1 Tablet
Servings Per Container: XXXXX

	Amount Per Serving	% Daily Value
Glucosamine HCl	500 mg	*
Chondroitin Sulfate	400 mg	*
Methylsulfonylmethane	250 mg	*

V3S

PRIMAARY LINE

M32+

Overall Health & Wellness
Support Multi-Vitamin with B-Complex 50mg* /
/ Chromium 400mcg* / Folic Acid 400mcg*

Understanding that the cornerstone of any nutritional program is a solid and complete multivitamin, M32+ was developed to create this foundation. M32+ is different than other multivitamins on the market. It contains more vitamins and minerals in their scientifically supported dosages than most. Chromium, Folic Acid, B Complexes, and Zinc were added to this complex to enhance its effects, as well as build a true all-in-one multivitamin.

M32+ also has an efficient delivery system so that only two M32+ need to be taken per day. Containing minimal fillers and incipients, the M32+ uses concentrated, high-quality ingredients.

Q ZYME

Energy and Cardiovascular Support
COQ-10 100mg*

First called ubiquinone, for it's characteristic of being in all-living creatures, CoEnzyme Q10, is the primary component of Q-Zyme. Maintaining the maximum amount of activity this oil has to offer, V3S placed Q-Zyme into soft gels. Q-Zyme combines the important functions of CoEnzyme Q10 and the V3S Activating System, providing a complex that may act as an anti-oxidant and energy metabolizer.

CoEnzyme Q10 acts as a catalyst in cellular metabolism, breaking food into packets of energy. Acting with other enzymes, CoEnzyme Q10 helps support cellular energy that is needed for food digestion, tissue maintenance, and healthy muscles. This energy is also used to help circulate blood throughout the body, supporting proper heart function.

Much like Vitamin C and Vitamin E, CoEnzyme Q10 may help the body neutralize free radicals and support cellular health.

ULTRA EFA+E

Essential Fatty Acids

Omega 3 450mg* / Omega 6 175mg* / Omega 9 200mg* /
Natural Vitamin E 77.5IU*

Although many people do not like to hear the word fat, fats are essential for proper health and cellular function. Essential fatty acids (EFA's) are fats that are necessary for proper health yet are not produced by the body. Ultra EFA+E is a combination of the essential fatty acids 3, 6, and 9, along with a natural source of Vitamin E.

Fatty acids are the building blocks of fats and oils. The differences between Omega 3, 6, and 9, are found in their chemical structures. These essential fatty acids are often derived from fish oils, but V3S has combined not only marine lipids, but also vegetable based oils like flaxseed, evening primrose, sunflower, and rice. These oils are rich in Omega's yet lack the fishy "after taste" that is common with taking most fatty acid supplements. Preserving them in their most active form, oil, with a soft gel cover, Ultra EFA+E optimizes the benefits for skin and hair, the cardiovascular system, and joint functioning.

Vitamin E is not only valuable as an anti-oxidant to the brain, but it also allows the active fatty oils in Ultra EFA+E to remain preserved. Without a preservative such as Vitamin E, the essential fatty acids would become rancid over time and create free radicals. Using a natural preservative such as Vitamin E not only assures longer, purer shelf life, but it also adds an important antioxidant for the brain.

Supplement Facts

Serving Size 1 Soft Gel Capsule
Servings Per Container 60

	Amount Per Serving	% Daily Value
Vitamin E (as d-alpha tocopheryl acetate)	77.5 IU	258%
Omega 3 Fatty Acids (as flaxseed oil, marine lipid concentrate, rice oil, evening primrose oil, sunflower oil, sesame seed oil)	450 mg	*
Omega 6 Fatty Acids (as flaxseed oil, marine lipid concentrate, rice oil, evening primrose oil, sunflower oil, sesame seed oil)	175 mg	*
Omega 9 Fatty Acids (as flaxseed oil, marine lipid concentrate, rice oil, evening primrose oil, sunflower oil, sesame seed oil)	200 mg	*

WNB

WOMEN'S NATURAL BALANCE

100mg Dong Quai 200mg* / Vitamin B6 2mg* / Isoflavones ext 300mg*

After evaluating studies, V3S created WNB, a woman's supplement that helps create hormonal balance and actually works with a woman's body. Because of this balance of ingredients, WNB is not just for certain age groups or certain "times of the month" but can be used everyday to help support a woman's hormonal levels. In addition to Dong Quai, often called Women's Herb by ancient Chinese medicine, WNB also contains Isoflavones, Vitamin B6, Calcium, and a whole host of other ingredients.

Dong Quai has been used so religiously in Chinese medicine, it is only second to Ginseng in popularity. Dong Quai is traditionally used for balancing the menstrual cycle, alleviating common symptoms of premenstrual syndrome, and reducing menopausal hot flashes. WNB was developed as a balanced formula by adding Vitamin B6, Isoflavones, Calcium, and herbs to help support hormonal levels. Keeping hormones from fluctuating may help regulate the menstrual cycle and further preserve overall better health.

Supplement Facts

Serving Size 2 Tablets • Servings Per Container 30

ZMA PRO

Muscle Support & Recovery

Zinc 17mg*/Magnesium 255mg*/V

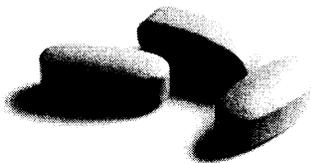

B6 6mg*

ZMA Pro offers a unique blend of minerals, the VitaCube Activating System, and herbs to provide support for the male system.

Trace elements, Zinc and Magnesium, are important for a multitude of biological functions. These nutrients may help support testosterone, immune system function, and muscle growth and performance. The VitaCube Activating System and herbs increase absorption of ZMA Pro into the body. Epimedium sagittatum, Potassium Glycerol Phosphate, and Cayenne are just some of the elements that may help absorption of ZMA Pro and may support its cellular use. Using these elements along with the most stable, easily absorbed chelated minerals makes ZMA Pro the natural alternative for the healthy male system.

BALANCED MOOD

Mood Support and Mental Well-Being
St. John's Wort / Griffonia Extract / Chamomile

The V3S scientific team has created Balanced Mood as a complex that may help the mind to become more focused, relaxed, and level. Balanced Mood was formulated after a review of clinical studies indicated that St. John's wort, Chamomile Flowers, Griffonia extract, and other herbs may be effective alternatives for promoting positive mental health.

St. John's wort has been shown to increase levels of serotonin, which play a major role in improving mood and emotions. This herb also may help support sound sleep.

Often called the world's most soothing plant, Chamomile was added to Balanced Mood to help provide for calmness. It has been shown that Chamomile contains substances that may act on the parts of the brain and nervous system that allow the body to relax and de-stress.

Griffonia Extract along with a combination of other herbs helps support activity of neurological transmissions.

A unique combination of St. John's wort and various herbs allows Balanced Mood to provide support for emotional health.

Supplement Facts

Serving Size 2 Capsules
Servings Per Container 30

	Amount Per Serving	%Daily Value
St. John's wort Extract (0.3% hypericin)	300 mg	*
Griffonia Seed Extract (18% 5-HTP)	50 mg	*
Chamomile Flowers	50 mg	*
VitaCube Activating System	20 mg	*

ENDURO AX

Stamina and Endurance
Six Ginsengs / Riboflavin / Vitamin B12

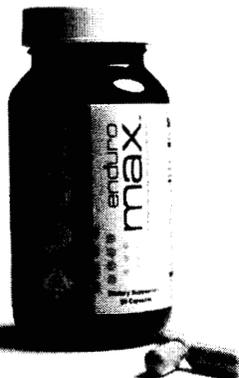

Athletes have been trying for years to improve their athletic performance by increasing their endurance and stamina. Often times pushing the body to optimal levels can be dangerous, and the substances that allow one to exceed their capabilities can be deadly. Naturally developing one's stamina and ability to sustain energy has been a focus of the Chinese for many years. Using studies from the University of China and other scientific research, the V3S scientific team developed a balanced, unique formula of Ginsengs.

In the Far East, Ginseng has been used as a general tonic to combat weakness and provide extra energy. Instead of using one type of Ginseng for EnduroMax, the V3S scientific team saw benefits in combining a group of "hot/cold" or "red/white" ginsengs. Every ginseng has a variety of benefits, some increasing energy levels higher, some increasing stamina longer. Combining six different ginsengs together, allows EnduroMax to provide not a burst of quick energy but a constant supply over a longer duration. In addition, various body types and situations require different forms of energy, having six different ginsengs covers all these bases.

Compared to carbohydrates, protein, or sugars, the body stores the maximum amount of energy in fats. Ginseng has been shown to aid in the prevention of fatigue by sparing glycogen, commonly used for energy, and using the optimal energy source in fatty acids. Using fatty acids as the primary source for energy may promote athletic performance, rejuvenate the body more quickly, and help normalize the entire system.

The combination of ginseng with riboflavin and Vitamin B12, allows EnduroMax to enhance its utilization of energy stores and metabolic function. Both riboflavin and Vitamin B12 help to supply energy by promoting, manufacturing, and transporting red blood cells, which contain oxygen, to all cells in the body.

EnduroMax creates a balance between various ginsengs and nutrients to help maximize the benefits of high energy and promote sustained endurance.

Supplement Facts		
Serving Size 2 Capsules		
Servings Per Container 30		
	Amount Per Serving	% Daily Value
Thiamin (as mononitrate)	50 mg	3333%
Riboflavin	50 mg	2841%

Enduro Complex	610 mg	*
Siberian ginseng root, Green Tea leaf,		
Guarana seeds, American ginseng root, Red		
Chinese ginseng root, Tienchi ginseng root,		
Panax ginseng root, Capsicum Fruit		
VitaCube Activating System	40 mg	*
Orange Bioflavonoid Complex, Grapefruit		
Bioflavonoid Complex, Alfalfa Leaf, Ginkgo biloba		
Leaf, Spirulina Algae, Cayenne, Apple Pectin,		
Odorless Garlic, 7-Isopropoxy Flavone,		
L-Glutathione, Lemon Bioflavonoid Complex,		
Lycopene 1%, Dimethylglycine, Potassium		
Glycerophosphate, Rutin, Bromelain, Lutein 5%.		

*Daily Value not established.

Other Ingredients: Gelatin, cellulose, magnesium stearate, silicon dioxide.

GINKGO CLEAR

Mental Clarity and Alertness
Ginkgo Biloba / Natural Vitamin E / Eucalyptus Leaves

Often times the mind is called upon to provide great concentration and focus. Not only is clearing the mind important in these situations, but supplying the mind with the proper energy to do so is vital. Ginkgo Clear was developed to help support brain function by providing valuable elements that are needed for enhanced clarity and mental well-being. Studies were evaluated that found the herb Ginkgo biloba had beneficial effects on both the circulatory and the central nervous systems. Using these studies as a foundation, the V3S scientific team combined other elements to help support mental clarity.

Ginkgo Clear uses a standardized, concentrated form of Ginkgo biloba extract to activate this powerful formula. Ginkgo has been shown to help support blood flow to the brain by supporting the tone and elasticity of blood vessels. In addition, it may improve circulatory flow.

Improving mental clarity may start with protecting the brain from dangerous free radicals, causing oxidation. One of the most important cell membranes in the body is the one between the brain and flowing blood, the Blood/Brain barrier. Vitamin E acts to protect cell membranes, making it the one of the body's best antioxidants.

Ginkgo Clear has been developed to provide support for mental well being by protecting the brain and then supplying it with nutrients to support proper health and development.

Supplement Facts		
Serving Size 2 Capsules		
Servings Per Container 30		
	Amount Per Serving	% Daily Value

MULTI CHEWS

Chewable Multi Vitamin with Minerals
For all ages

For children and some adults hesitant about swallowing, traditional supplements may be difficult to take. Understanding that the cornerstone of every good nutritional program is a multivitamin, V3S developed a multivitamin in a chewable wafer. MultiChews provide the body with the essential vitamins and minerals that are needed in an all natural, great-tasting, easy-to-take supplement.

Supplement Facts		
Serving Size 2 Chewable Tablets Servings Per Container 30		
	Amount Per Serving	% Daily
Value		
Vitamin A (as retinyl acetate and 50% as beta-carotene)	7500 IU	150%
Vitamin C (as ascorbic acid)	105 mg	175%
Vitamin D (as cholecalciferol)	375 IU	93%
Vitamin E (as d-alpha tocopheryl acetate)	45 IU	100%
Vitamin K (as phytonadione)	40 mcg	50%
Thiamin (as mononitrate)	2.25 mg	100%

MUSCLE MR3

Recovery Supplement
Calcium Malate Citrate/Pueraria Root / Cayenne

To provide maximum nutritional support for soft tissue and enhance muscle function, the V3S scientific team developed Muscle MR3, which contains Calcium, Vitamin C, Pueraria Root and the VitaCube Activating System.

Calcium is not only vital for the formation of bones and teeth, but also for the integrity of the muscles. Muscle MR3 uses the most highly absorbable form of calcium, Calcium Citrate Malate. Calcium Citrate Malate may help balance lactic acid build-up and thereby enhance muscle function.

Vitamin C and Pueraria Root combine to form an antioxidant that helps the body neutralize dangerous free radicals. Free radicals develop in the muscle and body due to stress and may inhibit muscle function.

Combining all these elements together with the VitaCube Activating System, Muscle MR3 promotes muscle health and functioning.

Supplement Facts		
Serving Size 2 Capsules Servings Per Container 30		
	Amount Per Serving	% Daily
Vitamin C (as ascorbic acid)	120 mg	100%
Calcium (as citrate/malate/Carbonate)	92 mg	5%
VitaCube Activating System	150 mg	-
Orange Bioflavonoid Complex, Grapefruit Bioflavonoid Complex, Alfalfa Leaf, Ginkgo biloba Leaf, Spirulina Algae, Cayenne, Apple Pectin, Odorless Garlic, 7-Isopropoxy Flavone, L-Glutathione, Lemon Bioflavonoid Complex, Lycopene 1%, Dimethylglycine, Potassium Glycerophosphate, Rutin, Bromelain, Lutein 5%

PURE HEAT

Soft Tissue Support
Cayenne / Boswellia / Turmeric

Pure Heat combines three natural herbs, Cayenne, Boswellia, and Turmeric, which may support muscle, tissue and joint function.

Cayenne, a fiery spice from dried hot peppers, is one of the main ingredients in Pure Heat. Boswellia has been shown to promote blood vessel health. Turmeric has valuable antioxidant properties as well as aiding in the circulation of blood.

Supplement Facts

	Amount Per Serving	% Daily Value
Serving Size 2 Tablets Servings Per Container 30		
	Amount Per Serving	% Daily Value
Zinc (as citrate)	5 mg	33%
Pure HEAT	2020 mg	*
Boswellia serrata gum extract (65%), Methylsulfonylmethane, Bromelain 600, Turmeric root extract, Ginger root extract, Lemon bioflavonoids, Quercetin dihydrate, Capsicum (60,000 HU)		
VitaCube Activating System	40 mg	*
Orange Bioflavonoid Complex, Grapefruit Bioflavonoid Complex, Alfalfa Leaf, Ginkgo biloba Leaf, Spirulina Algae, Cayenne, Apple Pectin, Odorless Garlic, 7-Isopropoxy Flavone, L-Glutathione, Lemon Bioflavonoid Complex, Lycopene 1%, Dimethylglycine, Potassium Glycerophosphate, Rutin, Bromelain, Lutein 5%.		

*Daily Value not established.
Other ingredients: Cellulose, stearic acid, croscarmellose sodium, silicon dioxide, magnesium stearate, and an orange cellulose film-coat.

VISUAL EYES

Lutein /

Eye Health Support
A / Eyebright Herb

V3S has developed a complex of carotenoids, vitamins, and minerals to produce Visual Eyes.

Carotenoids have been identified today as antioxidants, protecting cells from the damage caused by unstable oxygen molecules called free radicals. Lutein is the main carotenoid that has been associated with supporting macular and retinal health. Visual Eyes contains 6mg of Lutein. Certain foods contain Lutein, such as broccoli, but you would have to consume 18 to 20 pounds of broccoli per day to get the equivalent 6mg of Lutein. This dosage of Lutein is the amount that has shown tremendous results in supporting eye health. Lutein helps support clear vision by absorbing the sun's harmful ultraviolet rays and neutralizing free radicals in the retina.

Visual Eyes also contains a combination of other vitamins and minerals which further promote antioxidant effects and supply the proper nutrients to the eye, including Vitamin A, which is converted from a carotenoid, and Vitamin C, one of the body's premier antioxidants.

Supplement Facts

	Amount Per Serving	% Daily Value
Serving Size 2 Capsules Servings Per Container 30		
	Amount Per Serving	% Daily Value
Vitamin A (as retinyl acetate)	2500 IU	90%
Vitamin C (as ascorbic acid)	120 mg	100%
Zinc (as amino acid chelate)	2 mg	7%

Lutein (as Marigold Flower Extract, 5% Lutein)	6 mg	*
L-Glutathione	2 mg	*

*Daily Value not established.
Other ingredients: Gelatin, cellulose, magnesium stearate, silicon dioxide.

THE VITACUBE

THE VITACUBE

The evolution of the VitaCube came from its founders' experience that maintaining a nutritional supplement program was virtually impossible. The V3S founders identified several obstacles that interfere with compliance with this type of program. Some of these obstacles included concerns regarding product knowledge and taking the appropriate products, confidence in product compatibility, correct dosages, and bottle management. The founders also felt it was difficult to comply with a supplement program when traveling, and most often, the vitamins ran out at different times always at the most inconvenient times. The other concern was the added expense, and probable waste, with taking overlapping nutrients unnecessarily.

In looking to perfect a not-so-perfect system, the founders conceptualized the VitaCube. The VitaCube is the perfect solution allowing an individual to have all his or her vitamins in the proper dosages in one easy, convenient case. The VitaCube is a revolutionary concept that allows individuals to meet their nutritional goals and insure long-term health benefits.

VitaCubes may vary in content, but the foundational concepts remain the same; deliver superior quality, make it simple to understand, easy to comply with, and informationally rich.

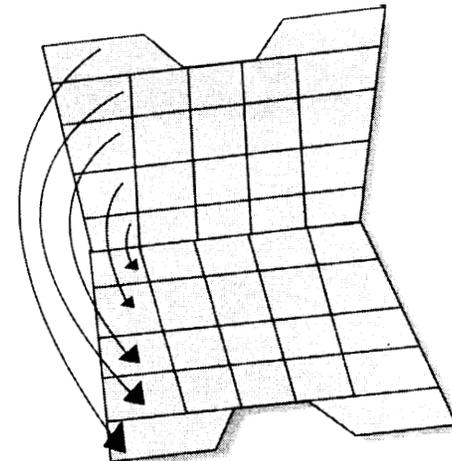

The Primary Line of Supplements were formulated knowing that they would be implemented into a VitaCube system. Vitamins and minerals work synergistically together, bringing out the best in each other. The V3S scientific team evaluated each system and its supplements carefully; making sure that no possible dangers could exist.

Using your VitaCube System is systematically organized. The formulations are compartmentalized, with their name, purpose, ingredients, and directions for use.

As you see in the diagram below, the nutritional supplement described on the label inside the VitaCube, will correspond to the appropriate compartment below. When the top label is lifted up you will see detailed nutrition facts for each complete VitaCube System.

The supplements included in your VitaCube System are effective individually, but as a system, they are exponentially superior. This total integration concept delivers high-performance results, and insures that the correct amount of each ingredient is always taken.

All VitaCube Systems are designed so that the supplements - when taken as directed - run out at the same time.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent disease.

MALE BASIC CUBES

30 day supply

Supplementation can often be uncomfortable for individuals who are first starting out on the road to a better nutritional lifestyle. As with exercise, nutrition is just doing a "little bit" more than the day before. The Male Basic VitaCube was designed for individuals who have little to no experience taking supplements and would just appreciate a firm foundation on which to build.

The foundation of the Male Basic VitaCube is built upon M32+, the multivitamin. It then extends to cover digestive concerns with Absorbit, bone health with Cal/Mag+ and cellular metabolism and function with CP Complex. Each are taken in the morning and evening, except Absorbit which is also taken in the afternoon. This system allows the body to acclimate to proper nutrition and health.

FEMALE BASIC VITACUBE

30-day supply

Beginning a nutritional system can often be difficult and overwhelming for those taking dietary supplements for the first time. The Female Basic VitaCube was designed to combat this apprehension by creating a basic foundation around five supplements. This system starts a woman off slowly yet still gives her the essential vitamins and minerals for extra vitality and lifestyle improvement.

The foundation of the Female Basic VitaCube contains five dietary supplements beginning with M32+, a multivitamin, which places direct emphasis on valuable nutrients missing in most women's diets. Cal/Mag+ assures maximum daily values of calcium, magnesium and boron extremely important for bone strength and maintenance. In addition, this system has WNB, Women's Natural Balance. WNB will help support healthy hormonal levels that are sometimes depleted while dieting and exercising. Absorbit was added, for digestive health and CP Complex, for cellular metabolism.

This system is ideal for females beginning a nutritional program. Very few women's supplements on the market today contain the adequate amounts of nutrients that are needed for better health. Beginning slowly with a firm foundation can prove advantageous when focusing on long-term health benefits.

MALE ESSENTIAL VITACUBE

30-day supply

As individuals get more in tune with their nutritional needs and begin to settle into an exercise program, they notice their bodies beginning to require more nutrients than ever before. With continual exercise, muscles and joints are being used more often and with different types of stress. In addition, the body begins to work more efficiently and cellular metabolism becomes highly active. The Male Essential VitaCube was designed to keep up with the increasing activity while at the same time minimizing the amount of dietary supplements needed. What is essential for the body to perform at optimal levels is what is found in this system. The Male Essential VitaCube provides the male body with the nutrients to keep up with an increasingly active lifestyle.

The Male Essential VitaCube contains 7 products including M32+, a unique multivitamin that has 32 essential vitamins and minerals. Providing additional support for the health of muscles, joints, ligaments and tendons is JSH. GC Elite is included for efficient cellular metabolism; Ultra EFA+E provides nourishing fatty acids to muscles, ligaments and tendons. In addition, Absorbit is included for digestive health, Cal/Mag+, for healthy bones and finally CP Complex, for efficient cellular metabolism to complete the system.

The foundation on which the Male Essential VitaCube was designed is for individuals who have taken multiple supplements before and are increasing their level of activity. If a continued exercise program is in place and a conscious effort is being taken to focus on nutrition, this system is the ideal program.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent disease.

FEMALE ESSENTIAL VITACUBE

30 Day supply

With increasing activity levels, the body asks for more in regards to nutrition. Muscles and cells are requiring more nutrients because continual exercise is creating an increased necessity for energy. Therefore, it is imperative for the body to take in the proper and adequate amount of nutrients to feed these muscles and cells. For developing efficiencies in body metabolism and long-term health benefits, a group of essential dietary supplements is needed. The Female Essential VitaCube contains those necessary elements for individuals to promote long-term health benefits.

The Female Essential VitaCube contains 8 dietary supplements beginning with M32+, a multivitamin, which also supports many cellular functions important to the female body. Stabilizing and maintaining proper muscle and joint health is achieved with JSH, a complex aimed at cartilage support. Ultra EFA+E provides nourishing fatty acids to muscles, ligaments, and tendons. Cal/Mag+ is added to ensure that the female body is getting sufficient amounts of Calcium and Magnesium to help support bone health. GC Elite and CP Complex are combinations of elements that may help to efficiently use fat and increase cellular metabolism. WNB is added to support healthy hormonal levels often depleted during exercise or while dieting.

The foundation of this system is ideal for a woman who is starting to slowly increase her activity level while at the same time getting conditioned to taking more dietary supplements. Providing the nutritional needs for the modern woman with an active lifestyle is the concept behind Female Essential VitaCube.

MALE ELITE VITACUBE

30 day supply or 60 day supply

Regular exercise and dietary supplementation is a lifestyle for many. Achieving optimal performance and strength from your body is largely dependent on the quality of your nutrition. It is vital for the body to have all the nutrients, vitamins and minerals, which are needed to help support muscle growth, bone health, and dynamic cellular metabolism. The Elite VitaCube was designed for a male individual who constantly pushes his body to the extreme to gain better performance and health. From promoting the reduction of free radical damage and helping to achieve sustained energy, this system offers the most complete nutrition.

The Male Elite VitaCube contains 11 dietary supplements beginning with M32+, a multivitamin, and then builds upon its multitude of benefits. Cal/Mag+ and GC Elite, focus on supporting bone and muscle health while at the same time helping support fat metabolism and efficient use of energy. Among a variety of other benefits CP Complex, AlphaNac, and Q-Zyme may help to neutralize dangerous free radicals produced in the body due to an increase in activity. JSH and Ultra EFA+E are components supportive of joint function and dynamic use of cellular energy. AO Elite is added to assist with circulatory health, while ZMA Pro provides increased hormone levels to support growth. Lastly, Absorbit provides enzymes for digestive health support.

The Male Elite VitaCube is ideal for those individuals looking to maximize their potential in regards to exercise and daily performance. Providing support in areas such as the immune system, digestive health, bone and muscle strength and anti-oxidant production, this system covers all the bases when it comes to an active, vigorous lifestyle.

MALE ELITE OVER 40 VITACUBE

30-day supply or 60-day supply

It is false to think that activity levels decrease, as individuals get older. The body requires sufficient nutrients regardless of age. With a program that involves proper exercise and eating habits, the body can remain as active as the mind. Nevertheless, it is vital that it also gets the vitamins and minerals that are needed to support this active lifestyle. The Male Elite VitaCube Over 40 was developed with the understanding that activity levels of men over 40 may not decrease, requiring an emphasis to be placed on long-term health benefits. This system contains all the nutrients that are required to keep up with a dynamic lifestyle and lay the foundation for health and longevity.

The Male Elite VitaCube Over 40 contains 11 dietary supplements focusing in on two core elements, M32+ and Complex SPP. M32+, a multitude of vitamins and minerals helps the body cover its most immediate nutritional needs. Complex SPP is added as a result of the attention given to long-term prostate health. To provide joint support, JSH and Ultra EFA+E were included. Q-Zyme, CP Complex and AlphaNac are three products that can help stabilize the body and assist with neutralizing and eliminating dangerous free radicals. Cal/Mag+ and AO Elite help the body support bone health. Knowing that as we age digestive enzymes are secreted less frequently, Absorbit is added to promote digestive health. A total of 28 dietary supplements are taken per day, mostly in the morning and evening, except for Absorbit, which is also taken in the afternoon.

The Male Elite VitaCube Over 40 is ideal for those individuals over the age of 40 who are maintaining an active lifestyle. This system focuses on long-term health as well as providing increased vitality to keep up with exercise and fitness routines. The Male Elite VitaCube Over 40 is a complete system of nutrition, factoring in concerns of men over 40 in regards to future health.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent disease.

MALE ELITE WITH COMPLEX SPP VITACUBE

30 day supply or 60-day supply

Some individuals are pushing their body to the limits with work and exercise. No matter the age, the body is as young as the mind. Science has not yet proven that activity levels need to decrease, as individuals get older, but has taught us that the body does require sufficient nutrition regardless of age. With a system that involves proper exercise and healthy eating habits, the body can remain as active as it wants to be, but also requires proper nutrition. The Male Elite VitaCube with Complex SPP was designed for those individuals who are over the age of 40 and lead an active lifestyle. This system covers all the requirements needed for the active male and, at the same time, plays close attention to a leading concern of men today, prostate health.

Male Elite VitaCube with Complex SPP contains 12 dietary supplements beginning with M32+, a multivitamin and builds upon its multitude of benefits. Cal/Mag+ and GC Elite focus is on providing the utmost in bone and muscle health support, while at the same time helping the body to metabolize fat and use energy efficiently. Among a variety of other benefits, CP Complex, AlphaNac and Q-Zyme help to balance free radicals produced in the body due to increased activity. JSH and Ultra EFA+E are components necessary for joint health and dynamic use of cellular health. AO Elite is added to support circulatory health, while ZMA Pro provides support for hormone balance. Absorbit provides enzymes to assist the breakdown of various types of foods consumed, and lastly, Complex SPP is included to support prostate health.

The Male Elite VitaCube with Complex SPP is ideal for those individuals who are over the age of 40 and are exercising regularly and lead an active lifestyle. This system contains the elements necessary to provide the body with proper support in areas of muscle growth, bone strength, anti-oxidant support, cellular metabolic activity and prostate health.

FEMALE ELITE VITACUBE

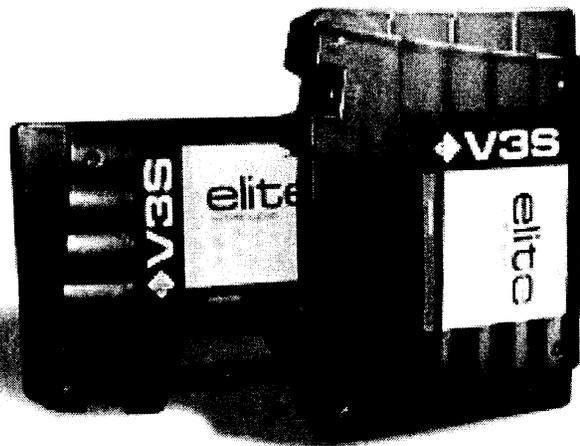

30-day supply or 60-day supply

A complete system containing vitamins, minerals, antioxidants and amino acids.

The concept is simple, what you get out of something is directly related to what you put in. When leading an active lifestyle, the body compels you to take in the vital nutrients found in vitamins and minerals so that it can sustain energy and promote optimal wellness. Elite VitaCube contains all the necessary elements to support, repair and recover while at the same time helping to cushion and prepare the body for the years ahead. This system of complete nutrition encompasses a wide spectrum of women's health concerns. Providing a foundation for a woman's needs, this system contains 11 vitamins and minerals beginning with; M32+, a multivitamin that starts the body off with the essentials. Cal/Mag+ begins to work on supporting bone health. CP Complex, AlphaNac, and Q-Zyme offer support to the body with powerful antioxidants that are used to neutralize free radicals produced from stress and the environment.

JSH and Ultra EFA+E, support the health of joints. AO Elite is added to support circulatory health, while Absorbit assists in digestive health. WNB completes this woman's system of elite nutrition by providing a natural way to support hormonal health.

The Female Elite VitaCube is ideal for women who lead a full and active lifestyle. This system will provide those individuals with the proper nutrients necessary to achieve optimum health and build a foundation for a vibrant future.

JOINT HEALTH CARE VITACUBE

30-day supply

Improper care of cartilage, tendons, and ligaments are the major reason why millions of individuals suffer from joint pain and arthritis. When the body is provided with the proper nutrients to strengthen and rebuild these elements, individuals may be able to continue with their active schedule. The Joint Health Care VitaCube is designed to focus on the special needs that are associated with high activity.

The Joint Health Care VitaCube contains 7 dietary supplements.

Providing the proper nutrients for any part of the body starts with a solid foundation, therefore, M32+, a multivitamin, begins the Joint Health Care VitaCube. Essential for strong bones and muscles, Cal/Mag+ is added to support development in those areas. For repair and recovery at a cellular level, GC Elite supports cellular metabolism, and fat utilization. Directly assisting in cartilage, ligament and tendon health is our unique formulation, JSH containing Glucosamine, Chondroitin, and MSM. Ultra EFA+E is added to support the body's ability to build lean muscle mass. AlphaNac and CP Complex serve as antioxidants to help the body to release and neutralize free radicals.

The Joint Health Care VitaCube contains the perfect elements needed to support proper joint health care.

MALE LEAN & TONE VITACUBE

30 day supply

There is no substitute for exercise and healthy eating habits when it comes to weight management. However, there are natural substances that can help the body to utilize fat more efficiently and enhance cellular metabolic processes. The Male Lean and Tone VitaCube was developed as a system to help the body use fat as its primary energy source and support metabolism. This system gives the body the ability to burn fat but also gain the proper nutrients required to maintain a healthy lifestyle.

The Male Lean and Tone VitaCube consists of four dietary supplements for a total of 15, designed to be taken daily in the morning and evening. M32+, a solid multivitamin, supplies the body with the foundation of basic nutrients essential for proper health. The weight management system is centered around supporting cellular metabolism with GC Elite. This unique complex supports the efficient use of energy from the body's fat storages. The ability to build lean body mass is enhanced with Ultra EFA+E, while bones and muscles are supported by Cal/Mag+.

The Male Lean and Tone VitaCube is ideal for those individuals wanting to supplement their solid exercise program with a system of proper nutrition. The concept behind this system is to provide energy to the body efficiently utilizing fat within the cells.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent disease.

FEMALE LEAN & TONE VITACUBE

30-day supply

Although there is no magic to losing body fat, V3S has developed a system that provides solid nutrition while maximizing the use of stored fat for energy. Understanding that weight management includes a proper exercise program, this system concentrates on providing proper nutrition, increased utilization of fat storages, and regulating erratic hormonal levels that can be associated with weight management.

The Female Lean and Tone VitaCube contains five dietary supplements for a total of 16 supplements taken in the mornings and evenings. Providing essential nutrients that are needed for all women, the M32+, a multivitamin is the core of the Female Lean and Tone VitaCube. Cal/Mag+ is added to address the needs women have for healthy bones and muscles. Ultra EFA+E provides the body with a brain antioxidant and promotes healthy neurological function. Supplying the body with L-Glutamine and L-Carnitine is GC Elite, a complex supporting the utilization of fat for primary energy. Cal/Mag+ is added to support the need for healthy bones and muscles. To regulate hormonal levels that can shift due to decreased diet and increased activity, WNB, works with the woman's body to support and balance hormonal levels.

The Female Lean and Tone VitaCube is ideal for a woman who wants to support the effects of exercise and weight management programs. This system includes the basic nutrients for proper health and develops a system to maximize the benefits of exercise and proper eating habits.

PREP BASIC VITACUBE

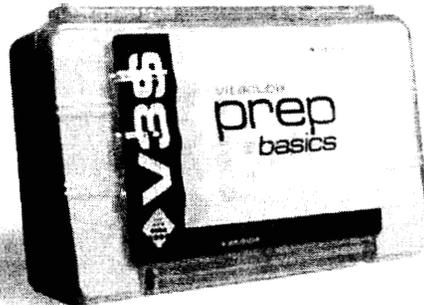

30-day supply

A staggering number of young, driven athletes are emerging from the ranks of high schools and colleges. With their busy schedules and lack of knowledge about nutrition, many are falling prey to poor eating habits and inadequate diets. Often times these young individuals need a system that provides the necessary foundation for basic nutrition without disturbing their regular routine.

The Prep Basic VitaCube allows for young athletes ages 13 to 21, to take charge of their nutrition and develop a firm ground to build upon for the future. Containing only the most basic vitamins and minerals, the Prep Basic VitaCube is the first step towards proper nutritional habits.

The Prep Basic VitaCube contains four dietary supplements. The M32+, a multivitamin, is the centerpiece of this basic, simple system. Young athletes need to be able to start with the nutrients that are an absolute necessity for proper supplementation and then grow from there. Because constant growth and development is taking place at this age, Cal/Mag+ is provided to support bone and muscle development. To assist with the breakdown of the variety of foods that are often consumed by adolescents, Absorbit is added to support digestive health. With the continual interaction young adults have with others, immune system support is vital for their well being, CP Complex is then added to provide this support and act as a valuable component. The V3S scientific team developed this system of 10 dietary supplements to be taken only twice a day, in the morning and in the evening.

The Prep Basic VitaCube is ideal for any young adult wanting to begin a program of proper nutrition. Consuming just a few vitamins and minerals in the morning and evening will provide them with essential nutrients.

PREP ESSENTIAL VITACUBE

30-day supply

More and more young adults are becoming involved with athletics and desiring high performance. Proper nutrition, good eating habits, and exercise are the cornerstones to achieving this success. With their busy schedules, on and off the fields, these adolescents need a system that is convenient to take yet complete enough to keep up with their routine. The Prep Essential VitaCube was designed to meet the nutritional and catalytic needs of a young adult between the ages of 13 and 19.

The Prep Essential VitaCube contains five dietary supplements designed to be taken daily in the morning and evening. Supplying the body with the most basic nutrients is M32+, a highly advance multivitamin. Although an emphasis has been placed on providing the body with vitamins and minerals needed to grow, a focus was also placed on supporting cellular and metabolic activity. GC Elite was added to provide the body with metabolic support, using fat and building muscle in the most efficient way possible. To keep up with the developmental needs of this age group, Cal/Mag+ is provided to support bone health. Absorbit, for digestive support, is essential because of the various types of diets that are often associated with young adults. Immune system support is given by providing the body with premier antioxidants found in CP Complex. A total of 11 vitamins and minerals are taken each day.

This system is ideal for young adults who have a concentrated focus on their nutritional needs and want high performance during competition. With increasing levels of activity, their bodies demand more nutrients and greater efficiencies in building muscle and providing energy. The Prep Essential VitaCube is a sound system in providing excellence in these areas.

PREP ELITE VITACUBE

30-day supply

Adolescents often face the same degree of stress with exercise and daily routines as adults; therefore, it is vital that their bodies are provided with the proper nutrition required for optimum performance. Being involved in multiple activities while carrying a load of educational responsibilities, young adults will demand not only excellence on the field but also in the classroom. The Prep Elite VitaCube is a system that supports high performance and growth by providing numerous vitamins and minerals, antioxidants, and amino acids to the body.

The Prep Elite VitaCube contains 7 dietary supplements designed to be taken daily in the morning and evening. Building upon a solid core using the M32+, a multivitamin, addresses the needs of a high performance young adult. During the adolescent ages, growth of bone and muscle is at its most active, therefore, Cal/Mag+ and JSH are included to support development. CP Complex and AO Elite add to the mix by providing premier antioxidants and assisting circulation to aid in recovery and repair. GC Elite provides efficient use of fat and improved cellular metabolism. With the varying types of foods that are often consumed by young adults, Absorbit is added to provide proper breakdown and support digestive health. Understanding that compliance could be a problematic issue with adolescents, the V3S scientific team has developed this system to include 12 dietary supplements are taken only in the mornings and evenings.

The Prep Elite VitaCube is ideal for young athletes striving to obtain the highest level of results from training and performance. This VitaCube is the premier system for young adults looking to consciously improve achievement by maintaining growth, strength, and performance.

VITAPRO

Balanced Protein Drink
Vanilla / Chocolate

You are serious about your nutrition, and when it comes to protein, you want a product used by professionals. V3S VitaPro is a completely balanced macronutrient meal supplement, which provides 42 grams of highest-quality protein blend in each serving. Developed by the V3S research team, this proprietary blend of proteins has a Protein Efficiency Ratio* of 1.2, exceeding the standard by 20%. Our amino-acid profile offers a natural metabolic advantage, and optimal support for cellular nutrition and the growth of muscle cells. The patented Aminogen® enzyme increases amino acid absorption by 260%. Essential fatty acids and medium-chain triglycerides provide necessary lipids for optimal cellular function, while 5 grams of dietary fiber aid in digestion and helps to maintain a normal, healthy cardiovascular system. Fortified with vitamins, minerals and antioxidants for complete nourishment, VitaPro is aspartame-free, low in fat and calories, and has a very favorable electrolyte profile. For optimal health and wellness, combine exercise and good nutrition with the complete line of VitaCube Systems dietary supplements.

Also includes VitaCube Systems Revolutionary Proprietary Activating system of 17 enzymes, antioxidants and herbs designed to activate and synergize your body's biological and physiological systems.

E FORCE

Electrolyte Rehydration Beverage
Natural Berry Flavor

During exercise our bodies are depleted of electrolytes. Electrolytes are those substances or compounds which, when dissolved in water, dissociate into positively and negatively charged ions. Optimum nerve reaction and muscular activity are dependent on proper exchange of these ions outside and inside cells. Since normal muscle cell function relies on a constant level of electrolytes, replacing them as soon as possible after workouts is essential.

E Force™ is a precision nutrition rehydration drink that provides crucial electrolytes such as sodium, potassium, calcium and magnesium. It also contains natural vitamin E to aid in maintenance of cellular integrity after exercise. While other electrolyte drinks use high levels of sugars to sweeten their products, E Force utilizes Ribose, a 5 carbon energy source plant sugar that maintains level blood glucose. Our electrolyte drink uses new "flake" technology that makes E Force easier for your body to absorb and mix quickly with water.

Overview

V3S has developed a revolutionary and comprehensive line of products designed by experts in nutritional technologies. Backed by years of research, our products contain nutritional fundamentals designed to offer active individuals significant advantages in terms of how quickly they can recover from training, competition and the degree to which their body will be able to respond positively to the appropriate exercise stimulus.

V3S products address all of the body's functions and will provide an abundance of the nutritional fundamentals, such as vitamins, minerals, amino acids, essential fatty acids, protein and other cofactors which the body cannot manufacture on its own.

The VitaCube Activating System

The revolutionary VitaCube Activating System provides the foundation for each complex. This ACTIVATING System contains an exclusive, proprietary blend of 17 essential cellular, metabolic factors that are designed to dissolve in the body almost immediately, facilitating absorption into the digestive tract and blood stream. The result is an optimal level of effectiveness in advanced nutrition.

VitaCube Systems

- ▶ Beverages
- ▶ VitaCube Systems
- ▶ Primary Line
- ▶ Specialty Line

The evolution of the "VitaCube" came from its founders' experience that maintaining a nutritional supplement program was virtually impossible. The V3S founders identified several obstacles that interfere with compliance with this type of program. Some of these obstacles included concerns regarding product knowledge and taking the appropriate products, confidence in product compatibility, correct dosages, and bottle management. The founders also felt it was difficult to comply with a supplement program when traveling, and most often, the vitamins ran out at different times always at the most inconvenient times. The other concern was the added expense, and probable waste, with taking overlapping nutrients unnecessarily.

In looking to perfect a not-so-perfect system, the founders conceptualized the "VitaCube." The "VitaCube" is the perfect solution allowing an individual to have all his or her vitamins in the proper dosages in one easy, convenient case. The VitaCube is a revolutionary concept that allows individuals to meet their nutritional goals and insure long-term health benefits.

"VitaCubes" may vary in content, but the foundational concepts remain the same; deliver superior quality, make it simple to understand, easy to comply with, and informationally rich.

The Primary Line of Supplements was formulated knowing that they would be implemented into a VitaCube system. Vitamins and minerals work synergistically together, bringing out the best in each other. The V3S scientific team evaluated each system and its supplements carefully, making sure that no possible dangers could exist.

The foundation of a superior nutrition system. If you are new to supplements and feel it's time to improve your health, this is where to start. The VitaCube Basic includes four products from our Primary Line of nutritional supplements, and an additional formulation specifically for women.

For active individuals whose nutritional balance requires essential support, replacement of nutrients lost to exercise, and convenience for a fast-paced lifestyle. The VitaCube Essential includes seven primary formulas, and a formula specific for women.

This VitaCube is essential for high-performance athletes and fitness enthusiasts. Individuals comfortable with supplementation and want to reach an optimum level of health will also love VitaCube Elite. It includes 10 formulas from the Primary Line plus a women's formula. For males over 30, a special complex for regulating testosterone production is added.

Male Basic VitaCube

Supplementation can often be uncomfortable for individuals who are first starting out on the road to a better nutritional lifestyle. As with exercise, nutrition is just doing a "little bit" more than the day before. The Male Basic VitaCube was designed for individuals who have little to no experience taking supplements and would just appreciate a firm foundation on which to build.

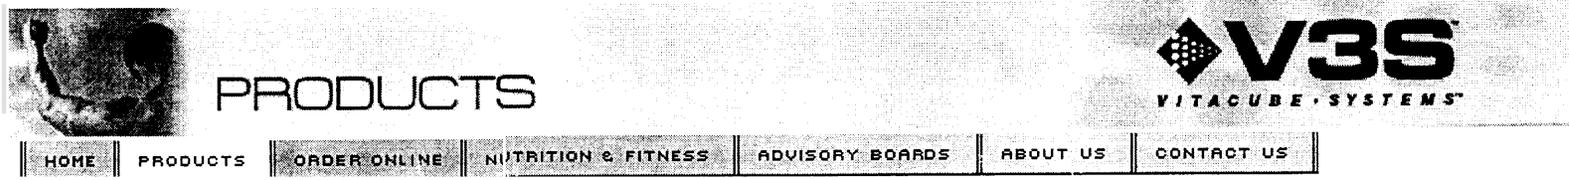

The foundation of the Male Basic VitaCube is built upon **M32+**, the multivitamin. It then extends to cover digestive concerns with **Absorbit**, bone health with **Cal/Mag+** and cellular metabolism and function with **CP Complex**. Each are taken in the morning and evening, except Absorbit which is also taken in the afternoon. This system allows the body to acclimate to proper nutrition and health.

VitaCube Systems

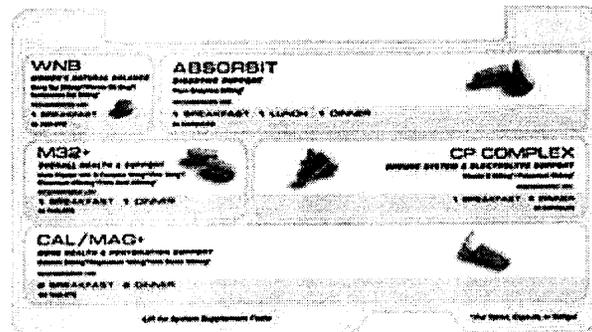

Female Basic VitaCube

Beginning a nutritional system can often be difficult and overwhelming for those taking dietary supplements for the first time. The Basic VitaCube was designed to combat this apprehension by creating a basic foundation around five supplements. This system starts a woman off slowly yet still gives her the essential vitamins and minerals for extra vitality and lifestyle improvement.

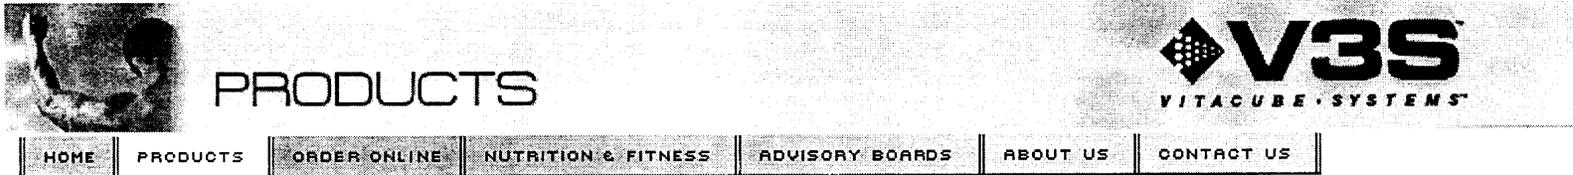

The foundation of the Female Basic VitaCube contains five dietary supplements beginning with **M32+**, a multivitamin, which places direct emphasis on valuable nutrients missing in most women's diets. **Cal/Mag+** assures maximum daily values of calcium, magnesium and boron extremely important for bone strength and maintenance. In addition, this system has **WNB**, Women's Natural Balance. WNB will help support healthy hormonal levels that are sometimes depleted while dieting and exercising. **Absorbit** was added, for digestive health and **CP Complex**, for cellular metabolism.

This system is ideal for females beginning a nutritional program. Very few women's supplements on the market today contain the adequate amounts of nutrients that are needed for better health. Beginning slowly with a firm foundation can prove advantageous when focusing on long-term health benefits.

VitaCube System

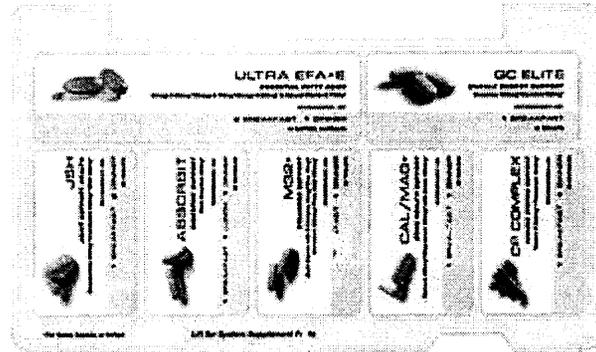

Male Essential Vit Cube

As individuals get more in tune with their nutritional needs and begin to settle into an exercise program, they notice their bodies beginning to require more nutrients than ever before. With continual exercise, muscles and joints are being used more often and with different types of stress. In addition, the body begins to work more efficiently and cellular metabolism becomes highly active. The Male Essential VitaCube was designed to keep up with the increasing activity while at the same time minimizing the amount of dietary supplements needed. What is essential for the body to perform at optimal levels is what is found in this system. The Male Essential VitaCube provides the male body with the nutrients to keep up with an increasingly active lifestyle.

The Male Essential VitaCube contains 7 products including **M32+**, a unique multivitamin which has 32 essential vitamins and minerals. Providing additional support for the health of muscles, joints, ligaments and tendons is **JSH**. **GC Elite** is included for efficient cellular metabolism, **Ultra EFA+E** provides nourishing fatty acids to muscles, ligaments and tendons. In addition, **Absorbit** is included for digestive health, **Cal/Mag+**, for healthy bones and finally **CP Complex**, for efficient cellular metabolism to complete the system.

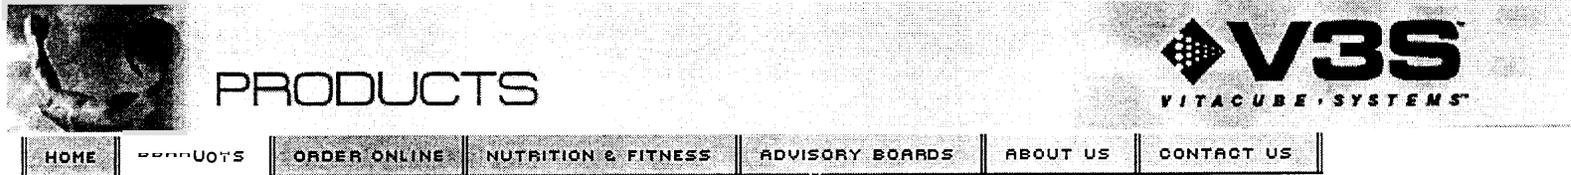

The foundation on which the Male Essential VitaCube was designed is for individuals who have taken multiple supplements before and are increasing their level of activity. If a continued exercise program is in place and a conscious effort is being taken to focus on nutrition, this system is the ideal program.

VitaCube Systems

Female Essential VitaCube

With increasing activity levels, the body asks for more in regards to nutrition. Muscles and cells are requiring more nutrients because continual exercise is creating an increased necessity for energy. Therefore, it is imperative for the body to take in the proper and adequate amount of nutrients to feed these muscles and cells. For developing efficiencies in body metabolism and long-term health benefits, a group of essential dietary supplements is needed. The VitaCube Essential Female contains those necessary elements for individuals to promote long-term health benefits.

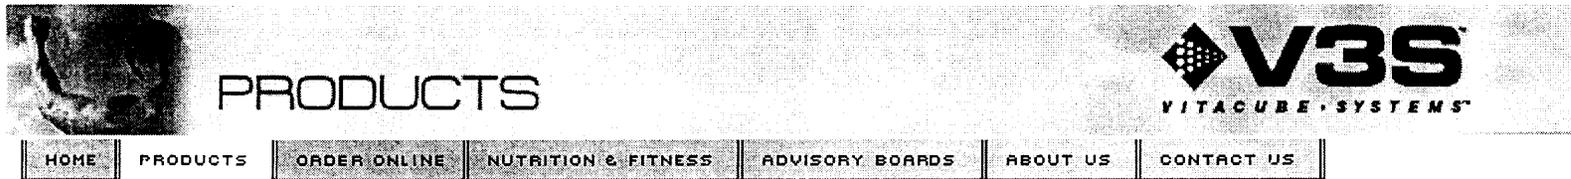

The VitaCube Essential Female contains 8 dietary supplements beginning with **M32+**, a multivitamin, which also supports many cellular functions important to the female body. Stabilizing and maintaining proper muscle and joint health is achieved with **JSH**, a complex aimed at cartilage support. **Ultra EFA+E** provides nourishing fatty acids to muscles, ligaments, and tendons. **Cal/Mag+** is added to ensure that the female body is getting sufficient amounts of Calcium and Magnesium to help support bone health. **GC Elite** and **CP Complex** are combinations of elements that may help to efficiently use fat and increase cellular metabolism. **WNB** is added to support healthy hormonal levels often depleted during exercise or while dieting.

The foundation of this system is ideal for a woman who is starting to slowly increase her activity level while at the same time getting conditioned to taking more dietary supplements. Providing the nutritional needs for the modern woman with an active lifestyle is the concept behind VitaCube Essential Female.

VitaCube Systems

Male Elite VitaCube

Regular exercise and dietary supplementation is a lifestyle for many. Achieving optimal performance and strength from your body is largely dependent on the quality of your nutrition. It is vital for the body to have all the nutrients, vitamins and minerals, which are needed to help support muscle growth, bone health, and dynamic cellular metabolism. The Elite VitaCube was designed for a male individual who constantly pushes his body to the extreme to gain better performance and health. From promoting the reduction of free radical damage and helping to achieve sustained energy, this system offers the most complete nutrition.

The Male Elite VitaCube contains 11 dietary supplements beginning with **M32+**, a multivitamin, and then builds upon its multitude of benefits. **Cal/Mag+** and **GC Elite**, focus on supporting bone and muscle health while at the same time helping support fat metabolism and efficient use of energy. Among a variety of other benefits **CP Complex**, **AlphaNac**, and **Q-Zyme** may help to neutralize dangerous free radicals produced in the body due to an increase in activity. **JSH** and **Ultra EFA+E** are components supportive of joint function and dynamic use of cellular energy. **AO Elite** is added to assist with circulatory health, while **ZMA Pro** provides increased hormone levels to support growth. Lastly, **Absorbit** provides enzymes for digestive health support.

The Male Elite VitaCube is ideal for those individuals looking to maximize their potential in regards to exercise and daily performance. Providing support in areas such as the immune system, digestive health, bone and muscle strength and anti-oxidant production, this system covers all the bases when it comes to an active, vigorous lifestyle.

VitaCube Systems

Female Elite VitaCube

A complete system containing vitamins, minerals, antioxidants and amino acids.

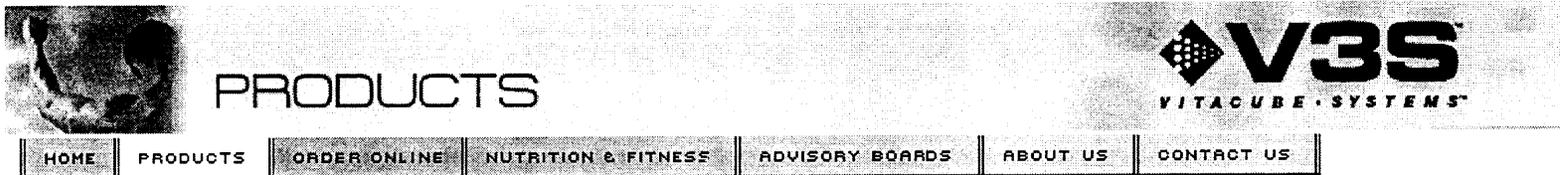

The concept is simple, what you get out of something is directly related to what you put in. When leading an active lifestyle, the body compels you to take in the vital nutrients found in vitamins and minerals so that it can sustain energy and promote optimal wellness.

Elite VitaCube contains all the necessary elements to support, repair and recover while at the same time helping to cushion and prepare the body for the years ahead. This system of complete nutrition encompasses a wide spectrum of women's health concerns.

Providing a foundation for a woman's needs, this system contains 11 vitamins and minerals beginning with; **M32+**, a multivitamin that starts the body off with the essentials. **Cal/Mag+** begins to work on supporting bone health. **CP Complex**, **AlphaNac**, and **Q-Zyme** offer support to the body with powerful antioxidants that are used to neutralize free radicals produced from stress and the environment. **JSH** and **Ultra EFA+E**, support the health of joints. **AO Elite** is added to support circulatory health, while **Absorbit** assists in digestive health. **WNB** completes this woman's system of elite nutrition by providing a natural way to support hormonal health.

The Female Elite VitaCube is ideal for women who lead a full and active lifestyle. This system will provide those individuals with the proper nutrients necessary to achieve optimum health and build a foundation for a vibrant future.

VitaCube Systems

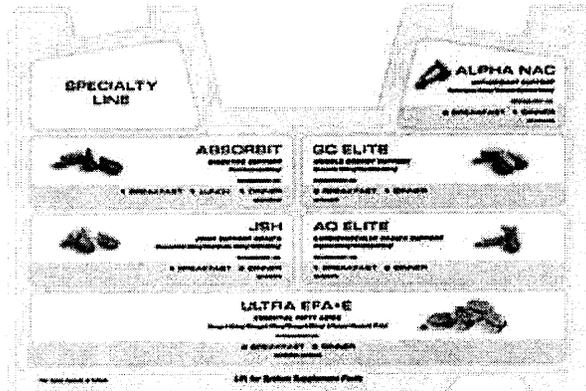

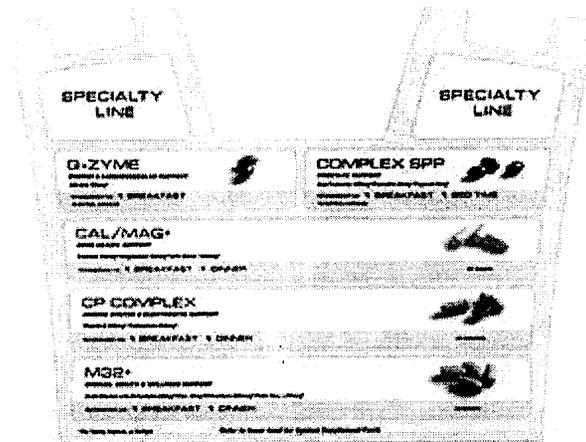

Male Elite Over 40 VitaCube

It is false to think that activity levels decrease as individuals get older. The body requires sufficient nutrients regardless of age. With a program that involves proper exercise and eating habits, the body can remain as active as the mind. Nevertheless, it is vital that it also gets the vitamins and minerals that are needed to support this active lifestyle. The Male Elite VitaCube Over 40 was developed with the understanding that activity levels of men over 40 may not decrease, requiring an emphasis to be placed on long-term health benefits. This system contains all the nutrients that are required to keep up with a dynamic lifestyle and lay the foundation for health and longevity.

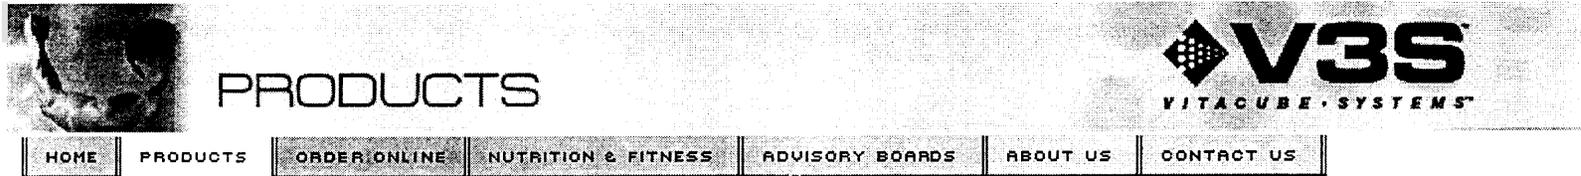

The Male Elite VitaCube Over 40 contains 11 dietary supplements focusing in on two core elements, **M32+** and **Complex SPP**. **M32+**, a multitude of vitamins and minerals helps the body cover its most immediate nutritional needs. **Complex SPP** is added as a result of the attention given to long-term prostate health. To provide joint support, **JSH** and **Ultra EFA+E** were included. **Q-Zyme**, **CP Complex** and **AlphaNac** are three products that can help stabilize the body and assist with neutralizing and eliminating dangerous free radicals. **Cal/Mag+** and **AO Elite** help the body support bone health. Knowing that as we age digestive enzymes are secreted less frequently, **Absorbit** is added to promote digestive health. A total of 28 dietary supplements are taken per day, mostly in the morning and evening, except for **Absorbit**, which is also taken in the afternoon.

The Male Elite VitaCube Over 40 is ideal for those individuals over the age of 40 who are maintaining an active lifestyle. This system focuses on long-term health as well as providing increased vitality to keep up with exercise and fitness routines. The Male Elite VitaCube Over 40 is a complete system of nutrition, factoring in concerns of men over 40 in regards to future health.

VitaCube Systems

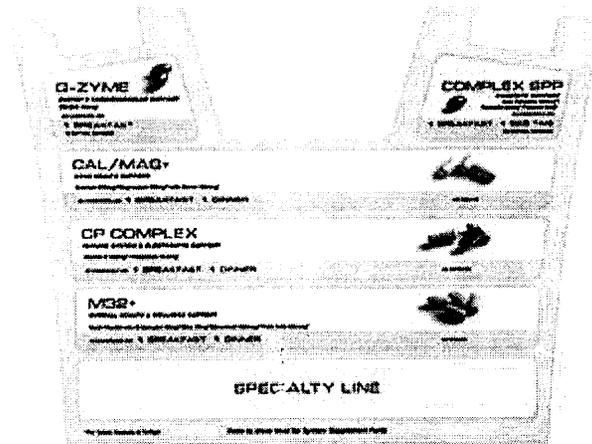

Elite with Complex SPP VitaCube

Some individuals are pushing their body to the limits with work and exercise. No matter the age, the body is as young as the mind. Science has not yet proven that activity levels need to decrease as individuals get older, but has taught us that the body does require sufficient nutrition regardless of age. With a system that involves proper exercise and healthy eating habits, the body can remain as active as it wants to be, but also requires proper nutrition. The Male Elite VitaCube with Complex SPP was designed for those individuals who are over the age of 40 and lead an active lifestyle. This system covers all the requirements needed for the active male and, at the same time, plays close attention to a leading concern of men today, prostate health.

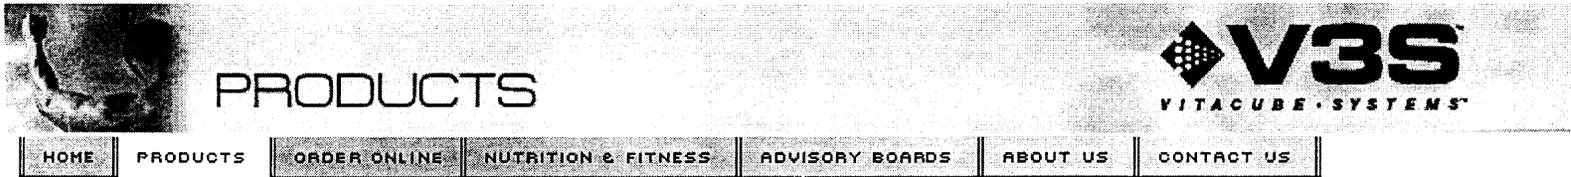

Male Elite VitaCube with Complex SPP contains 12 dietary supplements beginning with **M32+**, a multivitamin and builds upon its multitude of benefits. **Cal/Mag+** and **GC Elite** focus is on providing the utmost in bone and muscle health support, while at the same time helping the body to metabolize fat and use energy efficiently. Among a variety of other benefits, **CP Complex**, **AlphaNac** and **Q-Zyme** help to balance free radicals produced in the body due to increased activity. **JSH** and **Ultra EFA+E** are components necessary for joint health and dynamic use of cellular health. **AO Elite** is added to support circulatory health, while **ZMA Pro** provides support for hormone balance. **Absorbit** provides enzymes to assist the breakdown of various types of foods consumed, and lastly, **Complex SPP** is included to support prostate health.

The Male Elite VitaCube with Complex SPP is ideal for those individuals who are over the age of 40 and are exercising regularly and lead an active lifestyle. This system contains the elements necessary to provide the body with proper support in areas of muscle growth, bone strength, anti-oxidant support, cellular metabolic activity and prostate health.

VitaCube Systems

Prep Basic VitaCube

A staggering number of young, driven athletes are emerging from the ranks of high schools and colleges. With their busy schedules and lack of knowledge about nutrition, many are falling prey to poor eating habits and inadequate diets. Often times these young individuals need a system that provides the necessary foundation for basic nutrition without disturbing their regular routine. The Prep Basic VitaCube allows for young athletes ages 13 to 21, to take charge of their nutrition and develop a firm ground to build upon for the future. Containing only the most basic vitamins and minerals, the Prep Basic VitaCube is the first step towards proper nutritional habits.

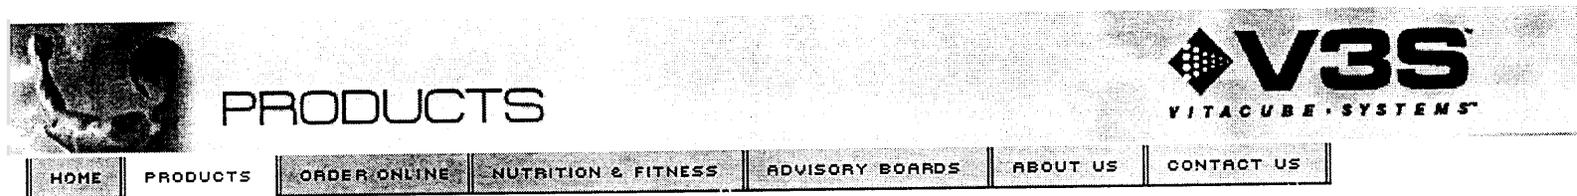

The Prep Basic VitaCube contains four dietary supplements. The **M32+**, a multivitamin, is the centerpiece of this basic, simple system. Young athletes need to be able to start with the nutrients that are absolute necessity for proper supplementation and then grow from there. Because constant growth and development is taking place at this age, **Cal/Mag+** is provided to support bone and muscle development. To assist with the breakdown of the variety of foods that are often consumed by adolescents, **Absorbit** is added to support digestive health. With the continual interaction young adults have with others, immune system support is vital for their well being, **CP Complex** is then added to provide this support and act as a valuable component. The V3S scientific team developed this system of 10 dietary supplements to be taken only twice a day, in the morning and in the evening.

The Prep Basic VitaCube is ideal for any young adult wanting to begin a program of proper nutrition. Consuming just a few vitamins and minerals in the morning and evening will provide them with essential nutrients.

VitaCube Systems

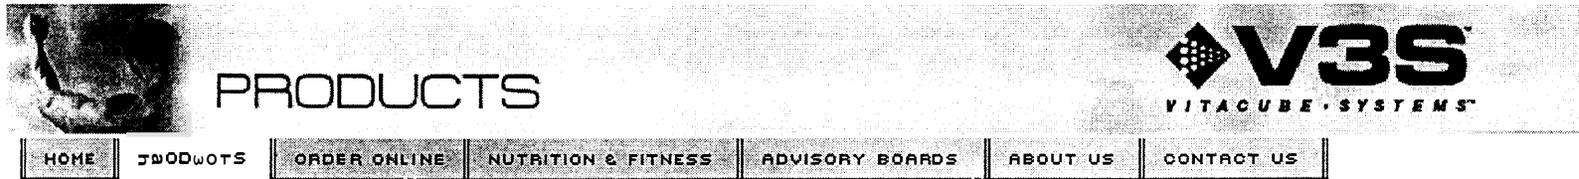

Prep Essential VitaCube

More and more young adults are becoming involved with athletics and desiring high performance. Proper nutrition, good eating habits, and exercise are the cornerstones to achieving this success. With their busy schedules, on and off the fields, these adolescents need a system that is convenient to take yet complete enough to keep up with their routine. The Prep Essential VitaCube was designed to meet the nutritional and catalytic needs of a young adult between the ages of 13 and 19.

The Prep Essential VitaCube contains five dietary supplements designed to be taken daily in the morning and evening. Supplying the body with the most basic nutrients is **M32+**, a highly advanced multivitamin. Although an emphasis has been placed on providing the body with vitamins and minerals needed to grow, a focus was also placed on supporting cellular and metabolic activity. **GC Elite** was added to provide the body with metabolic support, using fat and building muscle in the most efficient way possible. To keep up with the developmental needs of this age group, **Cal/Mag+** is provided to support bone health. **Absorbit**, for digestive support, is essential because of the various types of diets that are often associated with young adults. Immune system support is given by providing the body with premier antioxidants found in **CP Complex**. A total of 11 vitamins and minerals are taken each day.

This system is ideal for young adults who have a concentrated focus on their nutritional needs and want high performance during competition. With increasing levels of activity, their bodies demand more nutrients and greater efficiencies in building muscle and providing energy. The Prep Essential VitaCube is a sound system in providing excellence in these areas.

Vitamins and Minerals

The V3S Primary Line of supplements represents outstanding achievement in the research of advanced nutrition.

Scientists at V3S applied their knowledge and extensive research in nutrition and developed an integrated system of comprehensive and natural complexes. Each complex was developed with ingredients that compliment each other. When taken together these proprietary formulas work synergistically to provide the ultimate nutrition for your body. These 13 complexes are offered in our innovative delivery system, the "VitaCube".

The revolutionary VitaCube Activating System provides the foundation for each complex. This ACTIVATING System contains an exclusive, proprietary blend of 17 essential cellular, metabolic factors that are designed to dissolve in the body almost immediately, facilitating absorption into the digestive tract and blood stream. The result is an optimal level of effectiveness in advanced nutrition.

You can be confident that recommended usage of these eleven supplements will provide your body with the most potent nourishment in a supplemental form.

Absorbit™ - (Digestive Enzymes and Amiongen)

A revolutionary blend of 5 phyto enzymes and patented Aminogen enzyme to support the proper breakdown, digestion, and absorption of food and supplementation.

AlphaNac™ - (Alpha Lipoic Acid and N-Acetyl-Cysteine)

Promote liver and cardiovascular health with this powerful combination of two highly effective antioxidants in one complex.

AO Elite™ - (L-Arginine and L-Ornithine)

Help support an increase in muscle strength and tone and enhance fat metabolism for weight management with this exclusive formulation of two potent amino acids.

Cal/Mag+™ - (Calcium, Magnesium, and Boron)

Help build stronger bones and muscle while promoting bone mass with this unique combination of calcium, magnesium and boron. This proprietary blend, of necessary minerals help to strengthen

bones and muscle while preventing bone loss.

Complex SPP™ - (Saw Palmetto, Berberis, Pumpkin Seed and Tongkat Ali)

A proprietary formula using the highest grade of herbs that help support better prostate health.

CP Complex™ - (Vitamin C and B12)

This formulation helps enhance immune system function, acts as an antioxidant and at the same time provides the body with an essential electrolyte.

GC Elite™ - (L-Glutamine and L-Carnitine)

Help increase basal metabolic rate and utilize fat as a primary energy source, this dynamic formulation will assist in maintaining lean muscle mass while fighting fatigue.

JSH™ - (Glucosamine, Chondroitin, and MSM)

An exclusive blend of three essential elements and herbs which aid the body in supporting healthy ligament and cartilage tissue.

M32+™ - (Multivitamin with Chromium, Zinc, and B-Complex)

Highly absorbable and balanced, this blend of 32 vitamins and minerals plus our exclusive biotin system makes this multi vitamin truly unique.

Q-Zyme™ - (Coenzyme Q10)

Help stimulate the immune system and energize the cells, Coenzyme Q10 may also lead to better health by enhancing cardiovascular function.

Ultra EFA+E™ - (Omega 3-6-9 Fatty Acids and Vitamin E)

Essential in rebuilding and producing new cells, EFA+E assist in transmission of nerve impulses and functioning of the brain and may improve skin health.

WNB (Dong Quai, Vitamin B6, Iodine, and Calcium)

WNB uses the Women's Herb, Dong Quai, with essential vitamins and minerals to help balance a women's hormonal system.

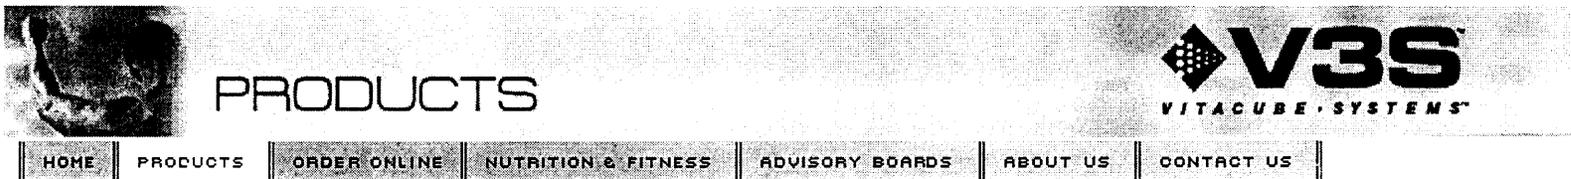

ZMA Pro™ - (Zinc and Magnesium Aspartate)

Help promote balanced testosterone levels and promote a relaxed state for a deeper sleep with this healthy blend of minerals.

Vitamins and Minerals

Alph Nac

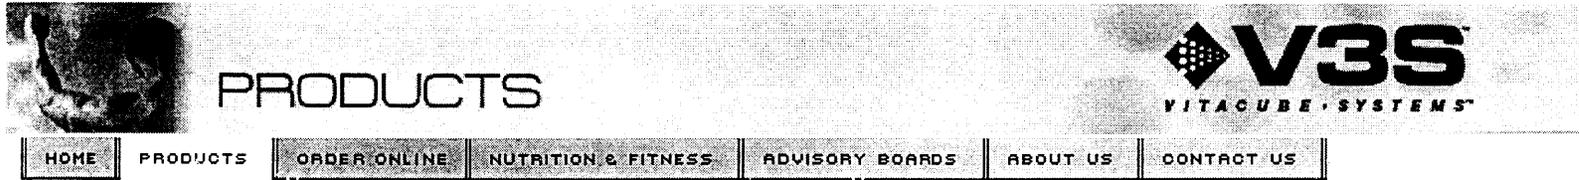

AlphaNac is a combination of Alpha Lipoic Acid and N-Acetyl-Cystenine, two elements that may support liver function and cellular metabolism. These two ingredients were combined to help support the elimination of dangerous free radicals created when the body is under stress.

Alpha Lipoic Acid is an anti-oxidant that may neutralize free radicals before they become damaging. On the other hand, N-Acetyl-Cystenine helps the liver to transport these neutralized radicals out of the system eliminating them for good. The combination of a neutraler and transporter supports better health and function for the liver.

Vitamins and Minerals

AO Elite

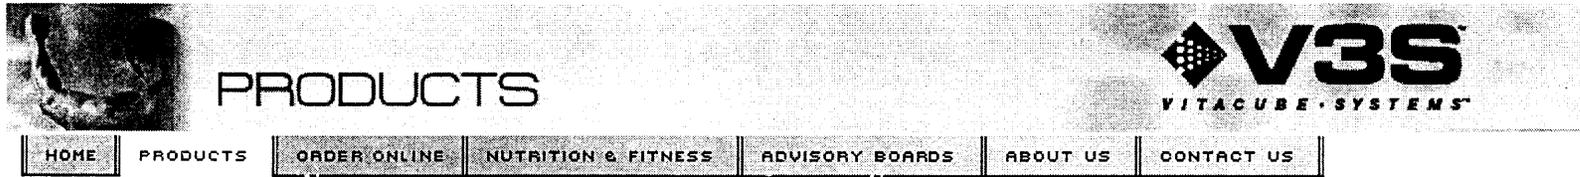

AO Elite, contains L-Arginine and L-Ornithine, two amino acids that may help to increase circulation and build muscle within the body. The highest quality available of L-Arginine and L-Ornithine was used to develop this complex, which is easily absorbed in the intestinal walls.

The many benefits of L-Arginine have been well documented, earning Stanford University a Nobel Peace Prize. L-Arginine has been shown previously to help raise levels of nitrogen oxide, which may increase blood circulation. L-Ornithine, being a valuable branched chained amino acid, aids in building muscle. When combined with Arginine, it helps support metabolism of excess fat.

Vitamins and Minerals

Cal/Mag+

Calcium is the most abundant mineral in our bodies, but most individuals receive less than the amount of calcium they really need. Cal/Mag+ was created with Calcium, Magnesium, and Boron, three minerals supporting healthy bones and strong muscles.

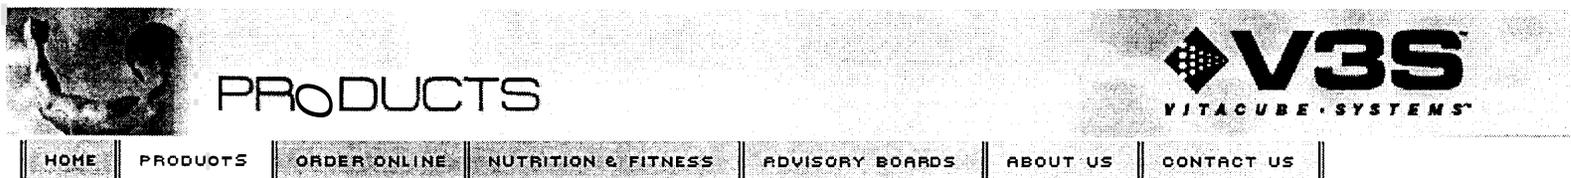

There are seven different sources of calcium in Cal/Mag+, allowing for the release of calcium for a longer duration. This gives the body ample opportunity to absorb this essential mineral. Various forms of calcium absorb into the system at different rates, some are slow while others can be quicker. Combining seven different sources, all with varying rates, allows the body to receive the calcium it needs at the appropriate times. Additionally, the calcium in this formula is lead-free, therefore reducing any toxic effects.

Bones need magnesium as much as calcium. Cal/Mag+ has four different sources of magnesium. Magnesium is vital for bone strength but cannot be absorbed by the intestinal wall without calcium as a transport system. Therefore, Cal/Mag+ has combined the two for more efficient Magnesium transport and use, resulting in greater support for stronger, healthier bones.

Vitamins and Minerals

Complex SPP

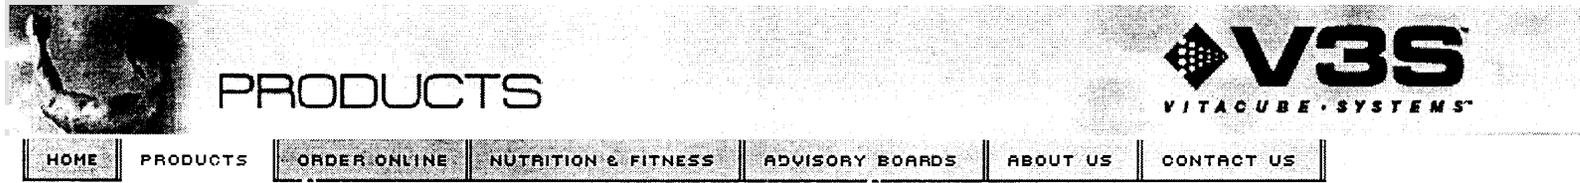

Complex SPP was developed to support prostate function among men over forty. A purified form of Saw Palmetto Berries extract, 85% fatty acids and sterols, is ingredient in Complex SPP that promotes the prostate.

These powerful, purified forms of Saw Palmetto Berries have been kept active by placing them in gel capsules. It was important for V3S to ensure that Complex SPP did not lose any of its activity when supporting prostate cell function.

Vitamins and Minerals

CP Complex

Vitamin C, also known as ascorbic acid, is required for at least 300 metabolic functions in the body. Potassium, a mineral responsible for regulating heartbeat and blood pressure, works best in acidic environments. V3S combines the two, Vitamin C and Potassium, to capitalize on the benefits of both Vitamin C and Potassium.

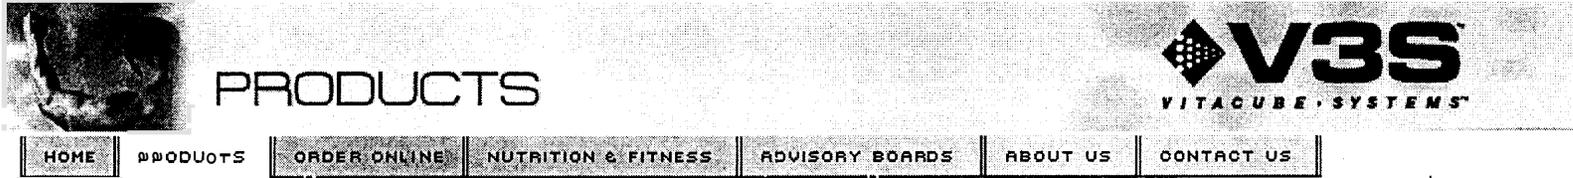

Vitamin C is essential because the body does not have the ability to manufacture this valuable vitamin on its own. Because Vitamin C is crucial to cellular metabolism, CP Complex contains the highest quality available of Vitamin C. Cells may react to different forms of Vitamin C. Therefore, CP Complex uses four different forms to insure maximum uptake and utilization. Vitamin C serves the body as an aid to support immune system function.

After calcium and phosphorus, Potassium is the most abundant mineral in the body. Potassium, an electrolyte, is vital with sodium in keeping balanced fluid levels in the body. Three different sources of potassium are used to maintain a stable balance of this electrolyte.

Vitamins and Minerals

GC Elite

GC Elite is V3S' innovative combination of L-Glutamine and L-Carnitine. GC Elite is useful not only for athletes who are working to build muscle, but also for individuals who want to burn excess fat. Combining these two dynamic nutrients may help to promote weight management as well as muscle repair.

One of the most abundant amino acids found in muscles is L-Glutamine. Muscles need L-Glutamine to help synthesize the muscle protein that is necessary for muscle function.

One of the functions of L-Carnitine is to help utilize the fatty acids that are found in cells so the body can use it as energy. L-Carnitine may help provide energy to an athlete when they need it the most.

GC Elite works together with the body to support the use of fat as an energy source.

Vitamins and Minerals

JSH

Glucosamine and Chondroitin, combined with MSM and herbs, are the main components of JSH, a complex that may support joint function and promote flexibility and mobility.

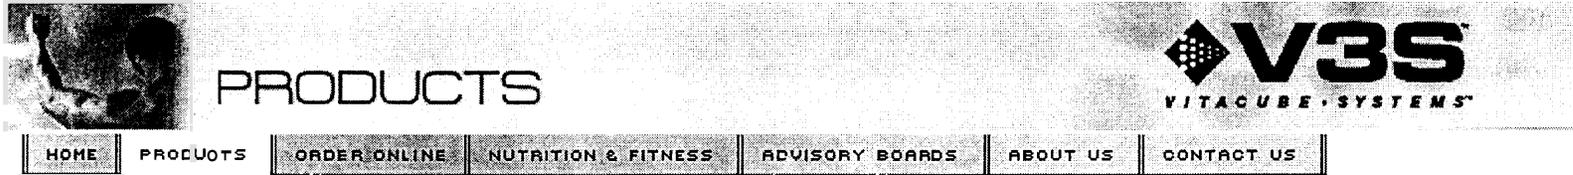

Glucosamine has been shown to actually help support cartilage. This fairly small molecule combines with the larger molecules that are necessary for cartilage maintenance. Glucosamine works as an amino sugar, a component of carbohydrates that make up body tissue, so it is involved in the formation of nails, tendons, skin, eyes, bones, ligaments, and heart valves.

Studies have shown that Glucosamine when combined with Chondroitin, another carbohydrate molecule, provides even greater support for cartilage tissue. Chondroitin attaches to protein molecules that attract water to cartilage tissue, which is vital for maintaining healthy joint cartilage. By blocking certain enzymes that prevent nutrients from being transported to cartilage, Chondroitin also aids in keeping cartilage healthy.

JSH is the first Glucosamine/Chondroitin combination to add herbs with and MSM to its complex. The natural herbs, Cayenne, Boswellia, and Turmeric are added to help support tissue, muscle and joint function. MSM is a high-grade source of sulfur, which is necessary for ligaments and tendons to be strong and healthy.

Vitamins and Minerals

M32+

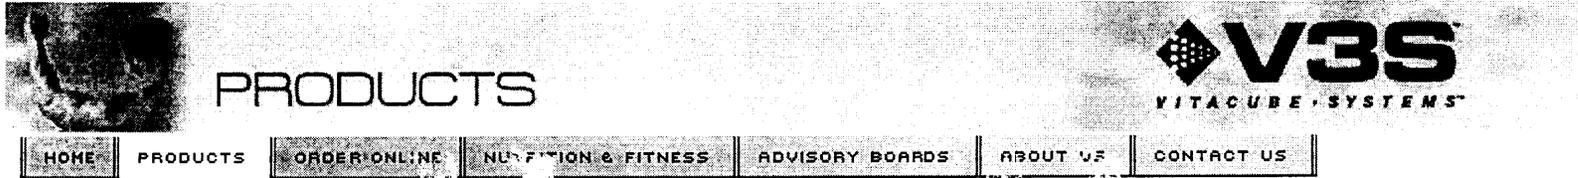

Understanding that the cornerstone of any nutritional program is a solid and complete multivitamin, M32+ was developed to create this foundation. M32+ is different than other multivitamins on the market. It contains more vitamins and minerals in their scientifically supported dosages than most. Chromium, Folic Acid, B Complexes, and Zinc were added to this complex to enhance its effects, as well as build a true all-in-one multivitamin.

M32+ also has an efficient delivery system so that only two M32+ need to be taken per day. Containing minimal fillers and incipients, the M32+ uses concentrated, high-quality ingredients

Vitamins and Minerals

Q-Zyme

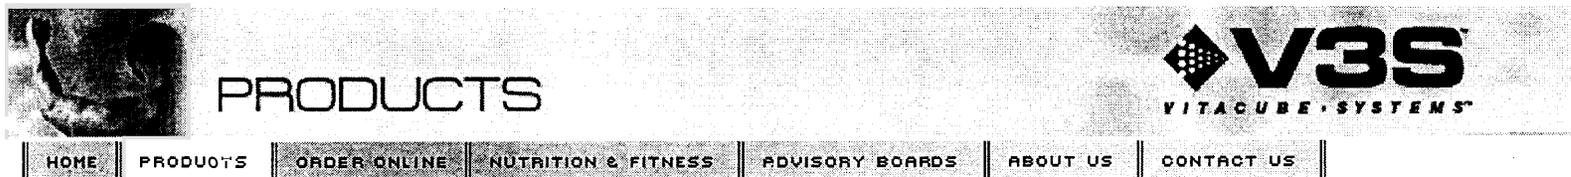

First called ubiquinone, for it's characteristic of being in all-living creatures, CoEnzyme Q10, is the primary component of Q-Zyme. Maintaining the maximum amount of activity this oil has to offer, V3S placed Q-Zyme into soft gels. Q-Zyme combines the important functions of CoEnzyme Q10 and the V3S Activating System, providing a complex that may act as an anti-oxidant and energy metabolizer.

CoEnzyme Q10 acts as a catalyst in cellular metabolism, breaking food into packets of energy. Acting with other enzymes, CoEnzyme Q10 helps support cellular energy that is needed for food digestion, tissue maintenance, and healthy muscles. This energy is also used to help circulate blood throughout the body, supporting proper heart function. Much like Vitamin C and Vitamin E, CoEnzyme Q10 may help the body neutralize free radicals and support cellular health.

Vitamins and Minerals

Ultra EFA +E

Although many people do not like to hear the word fat, fats are essential for proper health and cellular function. Essential fatty acids (EFA's) are fats that are necessary for proper health yet are not produced by the body. Ultra EFA+E is a combination of the essential fatty acids 3, 6, and 9, along with a natural source of Vitamin E.

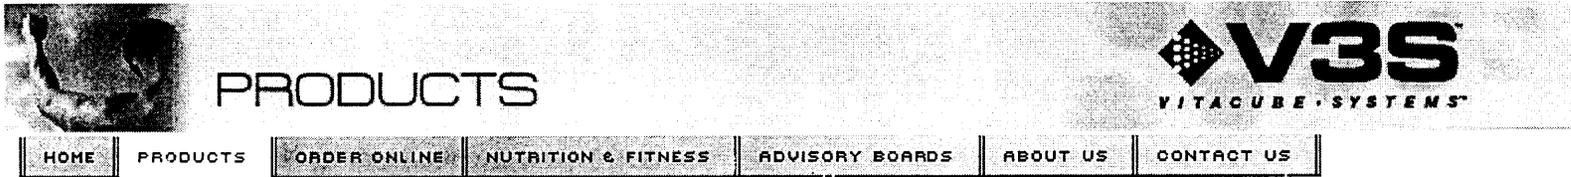

Fatty acids are the building blocks of fats and oils. The differences between Omega 3, 6, and 9, are found in their chemical structures. These essential fatty acids are often derived from fish oils, but V3S has combined not only marine lipids, but also vegetable based oils like flaxseed, evening primrose, sunflower, and rice. These oils are rich in Omega's yet lack the fishy "after taste" that is common with taking most fatty acid supplements. Preserving them in their most active form, oil, with a soft gel cover, Ultra EFA+E optimizes the benefits for skin and hair, the cardiovascular system, and joint functioning.

Vitamin E is not only valuable as an anti-oxidant to the brain, but it also allows the active fatty oils in Ultra EFA+E to remain preserved. Without a preservative such as Vitamin E, the essential fatty acids would become rancid over time and create free radicals. Using a natural preservative such as Vitamin E not only assures longer, purer shelf life, but it also adds an important antioxidant for the brain.

WNB

After evaluating studies, V3S created WNB, the first every woman's supplement that helps create hormonal balance and actually works with a woman's body. Because of this balance of ingredients, WNB is not just for certain age groups or certain "times of the month" but can be used everyday to help support a woman's hormonal levels. In addition to Don Quai, often called Women's Herb by ancient Chinese medicine, WNB also contains Isoflavones, Vitamin B6, Calcium, and a whole host of other ingredients.

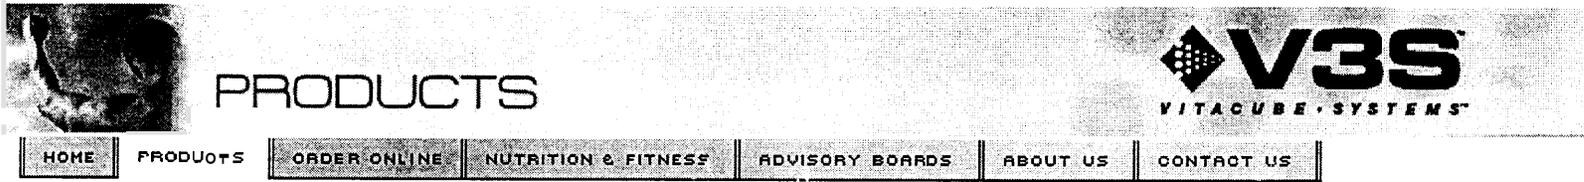

Don Quai has been used so religiously in Chinese medicine, it is only second to Ginseng in popularity. Don Quai is traditionally used for balancing the menstrual cycle, alleviating symptoms of premenstrual syndrome, and reducing menopausal hot flashes. This important herb is thought to have estrogens that can minimize the negative effects of a woman's own estrogens. However, WNB was developed to be a balance, therefore, Don Quai was added with other ingredients to create this equilibrium.

Vitamin B6, Isoflavones, Calcium, and herbs, combine to help support healthy hormonal levels. Keeping hormones from fluctuating may help regulate the menstrual cycle and further preserve overall better health.

Vitamins and Minerals

ZMA PRO

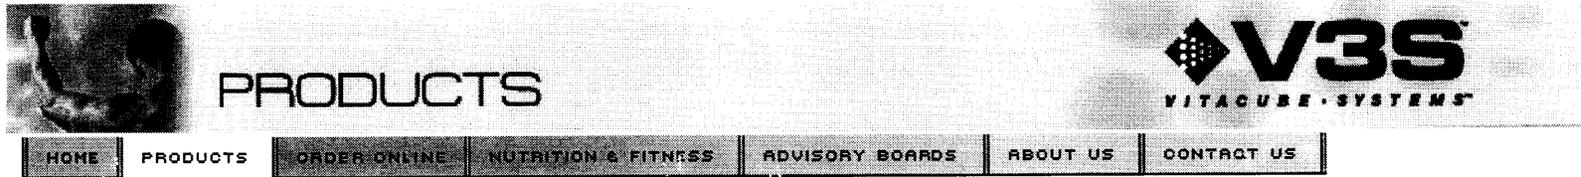

ZMA Pro offers a unique blend of minerals, the VitaCube Activating System, and herbs to provide support for the male system.

Trace elements, Zinc and Magnesium, are important for a multitude of biological functions. These nutrients may help support testosterone, immune system function, and muscle growth and performance. The VitaCube Activating System and herbs increase absorption of ZMA Pro into the body. Epimedium sagittatum, Potassium Glycerol Phosphate, and Cayenne are just some of the elements that may help absorption of ZMA Pro and may support its cellular use. Using these elements along with the most stable, easily absorbed chelated minerals makes ZMA Pro the natural alternative for the healthy male system.

Every individual can benefit from one or more of these extraordinary products. Our supplements can help enhance performance, increase health in specific areas, and/or aid in the healing process. Each of these formulations also contains the VitaCube Activating system to further their respective effects. You can choose from one or more of the eight specialty line products to fit your personal needs and lifestyle.

Balanced Mood™ - (St. John's Wort, Chamomile Flowers, and Griffonia)

Promote a sense of well being while fighting fatigue and encouraging a positive mental outlook. These balancing herbs may promote the formation of neurotransmitters in the brain that may naturally elevate mood.

Complex SPP™ - (Saw Palmetto, Berberis, Pumpkin Seed, and Pygeum)

Our proprietary formula using the highest grade of herbs that help support bladder health.

Max™ - (Ginsengs, Riboflavin, and Vitamin B2)

Demanding excellent performance naturally, safely, and effectively begins with ED-ROM X. This revolutionary blend will help support stamina and endurance.

Ginkgo Clear™ - (Ginkgo Biloba and Vitamin E)

Help improve mental clarity and acuity. This restorative blend of herbs and essential vitamins aid in neurological function and promotes brain and respiratory tract health.

MultiChew™ - (MultiVitamin)

An all natural multivitamin that contains essential vitamins and minerals in a great tasting chewable wafer.

Muscle MR3™ - (Calcium Citrate Malate, Vitamin C, and Carnitine)

This all natural formulation assists the body in restoring and repairing soft tissue more quickly by neutralizing the lactic acid build-up in the muscle.

Pure Heat™ - (Cayenne, Biotin, and Thiamine)

Encourage the body's natural ability to alleviate pain and enhance healing. This complex contains natural COX-2 inhibitor like actions, which may have pain-relieving characteristics.

Visual Eyes™ (Lutein, Vitamin A, and Eyebright Herb)

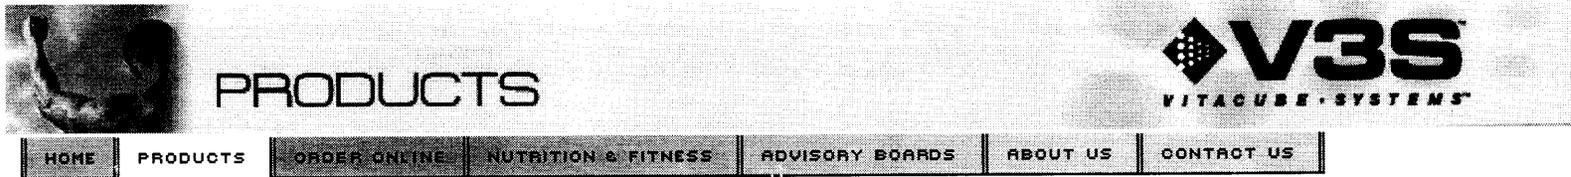

Lutein is a carotenoid antioxidant occurring naturally in the retina and macula areas of the eye. Other ingredients in this formulation may also protect eye health.

WNB™ - (Don Quai, Vitamin B6, Inositol and Calcium)

WNB uses the Women's Herb, Don Quai with essential vitamins and minerals to help balance a women's hormonal system.

Balanced Mood

The V3S scientific team has created Balanced Mood as a complex that may help the mind to become more focused, relaxed, and level. Balanced Mood was formulated after a review of clinical studies indicated that St. John's wort, Chamomile Flowers, Griffonia extract, and other herbs may be effective alternatives for promoting positive mental health.

St. John's wort has been shown to increase levels of serotonin, which play a major role in improving mood and emotions. This herb also may help support sound sleep.

Often called the world's most soothing plant, Chamomile was added to Balanced Mood to help provide for calmness. It has been shown that Chamomile contains substances that may act on the parts of the brain and nervous system that allow the body to relax and de-stress.

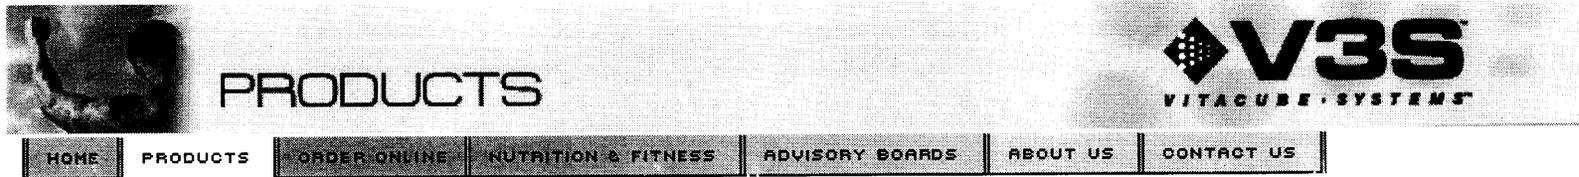

Griffonia Extract along with a combination of other herbs helps support activity of neurological transmissions.

A unique combination of St. John's wort and various herbs allows Balanced Mood to provide support for emotional health.

Complex SPP

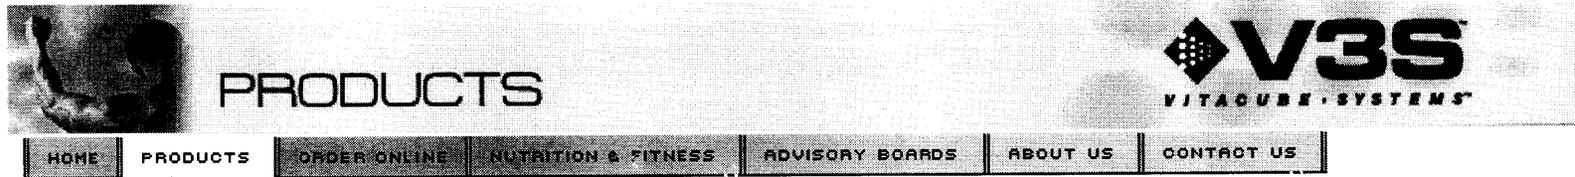

Complex SPP was developed to decrease the size of the prostate and reduce the chances of prostate cancer specifically among men over Complex SPP was developed to support prostate health among men over forty. A purified form of Saw Palmetto Berries extract, 85% fatty acids and sterols, is the potent ingredient in Complex SPP that promotes proper prostate health.

These powerful, purified forms of Saw Palmetto Berries have been kept active by placing them in gel capsules. It was important for V3S to ensure that Complex SPP did not lose any of its activity when regulating hormones that effect prostate cell multiplication.

Enduro M x

Athletes have been trying for years to improve their athletic performance by increasing their endurance and stamina. Often times pushing the body to optimal levels can be dangerous, and the substances that allow one to exceed their capabilities can be deadly. Naturally developing ones stamina and ability to sustain energy has been a focus of the Chinese for many years. Using studies from the University of China and other scientific research, the V3S scientific team developed a balanced, unique formula of Ginsengs.

In the Far East, Ginseng has been used as a general tonic to combat weakness and provide extra energy. Instead of using one type of Ginseng for Enduro Max, the V3S scientific team saw benefits in combining a group of "hot/cold" or "red/white" ginsengs. Every ginseng has a variety of benefits, some increasing energy levels higher, some increasing stamina longer. Combining six different ginsengs together, allows EnduroMax to provide not a burst of quick energy but a constant supply over a longer duration. In addition, various body types and situations require different forms of energy, having six different ginsengs covers all these bases.

Compared to carbohydrates, protein, or sugars, the body stores the maximum amount of energy in fats. Ginseng has been shown to aid in the prevention of fatigue by sparing glycogen, commonly used for energy, and using the optimal energy source in fatty acids. Using fatty acids as the primary source for energy may promote athletic performance, rejuvenate the body more quickly, and help normalize the entire system.

The combination of ginseng with riboflavin and Vitamin B12, allows Enduro Max to enhance its utilization of energy stores and metabolic function. Both riboflavin and Vitamin B12 help to supply energy by promoting, manufacturing, and transporting red blood cells, which contain oxygen, to all cells in the body.

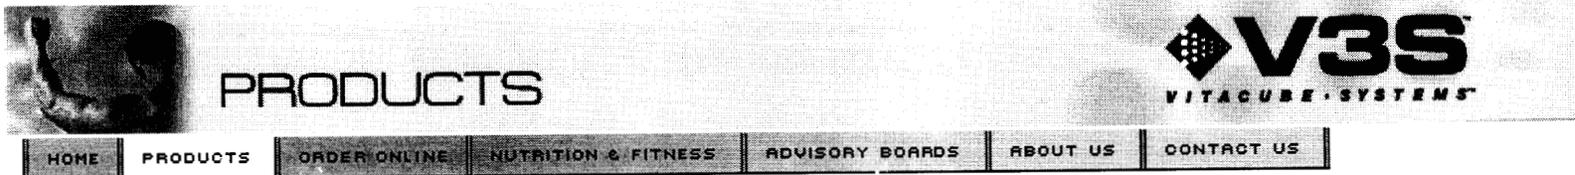

Enduro Max creates a balance between various ginsengs and nutrients to help maximize the benefits of high energy and promote sustained endurance.

Ginkgo Clear

Often times the mind is called upon to provide great concentration and focus. Not only is clearing the mind important in these situations, but supplying the mind with the proper energy to do so is vital. Ginkgo Clear was developed to help support brain function by providing valuable elements that are needed for enhanced clarity and mental well-being. Studies were evaluated that found the herb Ginkgo biloba had beneficial effects on both the circulatory and the central nervous systems. Using these studies as a foundation, the V3S scientific team combined other elements to help support mental clarity.

Ginkgo Clear uses a standardized, concentrated form of Ginkgo biloba extract to activate this powerful formula. Ginkgo has been shown to help support blood flow to the brain by supporting the tone and elasticity of blood vessels. In addition, it may improve circulatory flow.

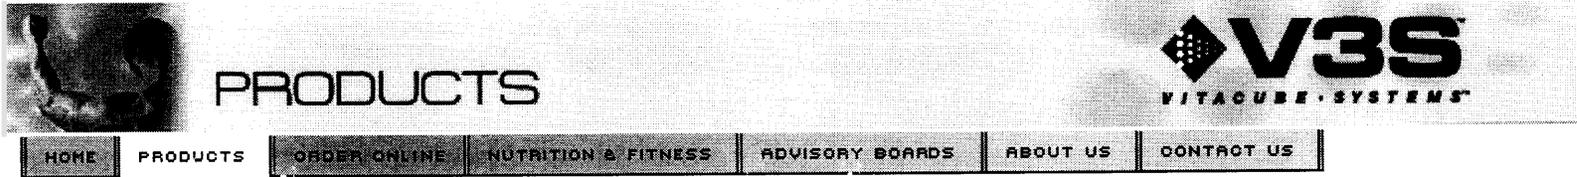

Improving mental clarity may start with protecting the brain from dangerous free radicals, causing oxidation. One of the most important cell membranes in the body is the one between the brain and flowing blood, the Blood/Brain barrier. Vitamin E acts to protect cell membranes, making it the one of the body's best antioxidants.

Ginkgo Clear has been developed to provide support for mental well being by protecting the brain and then supplying it with nutrients to support proper health and development.

MultiChews

For children and some adults hesitant about swallowing, traditional supplements may be difficult to take. Understanding that the cornerstone of every good nutritional program is a multivitamin, V3S developed a multivitamin in a chewable wafer. MultiChews provide the body with the essential vitamins and minerals that are needed in an all natural, great-tasting, easy-to-take supplement.

Muscle MR3

To provide maximum nutritional support for soft tissue and enhance muscle function, the V3S scientific team developed Muscle MR3, which contains Calcium, Vitamin C, Pueraria Root and the VitaCube Activating System.

Calcium is not only vital for the formation of bones and teeth, but also for the integrity of the muscles. Muscle MR3 uses the most highly absorbable form of calcium, Calcium Citrate Malate. Calcium Citrate Malate may help balance lactic acid build-up and thereby enhance muscle function.

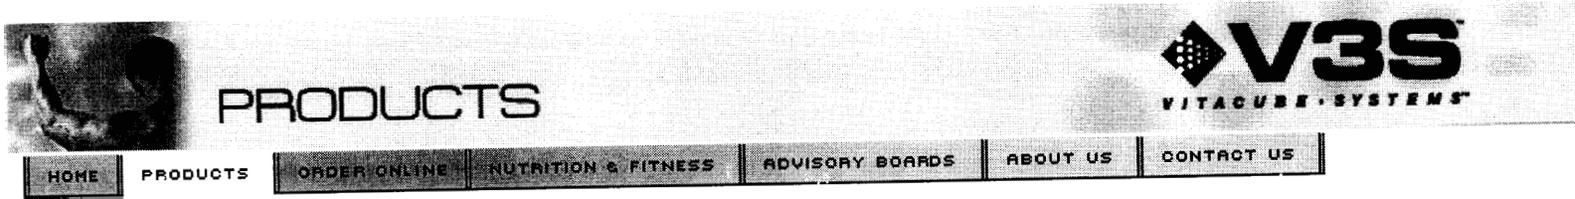

Vitamin C and Pueraria Root combine to form an antioxidant that helps the body neutralize dangerous free radicals. Free radicals develop in the muscle and body due to stress and may inhibit muscle function.

Combining all these elements together with the VitaCube Activating System Muscle MR3 promotes muscle health and functioning.

Pure Heat

Pure Heat combines three natural herbs, Cayenne, Boswellia, and Turmeric, which may support muscle, tissue and joint function.

Cayenne, a fiery spice from dried hot peppers, is one of the main ingredients in Pure Heat. Boswellia has been shown to promote blood vessel health. Turmeric has valuable antioxidant properties as well as aiding in the circulation of blood.

Visual Eyes

V3S has developed a complex of carotenoids, vitamins, and minerals to produce Visual Eyes.

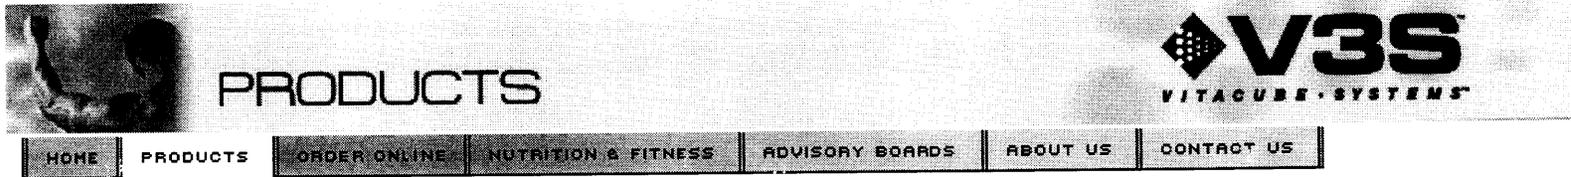

Carotenoids have been identified today as antioxidants, protecting cells from the damage caused by unstable oxygen molecules called free radicals. Lutein is the main carotenoid that has been associated with supporting macular and retinal health. Visual Eyes contains 6mg of Lutein. Certain foods contain Lutein, such as broccoli, but you would have to consume 18 to 20 pounds of broccoli per day to get the equivalent 6mg of Lutein. This dosage of Lutein is the amount that has shown tremendous results in supporting eye health. Lutein helps support clear vision by absorbing the sun's harmful ultraviolet rays and neutralizing free radicals in the retina.

Visual Eyes also contains a combination of other vitamins and minerals which further promote antioxidant effects and supply the proper nutrients to the eye, including Vitamin A, which is converted from a carotenoid, and Vitamin C, one of the body's premier antioxidants.

Specialty Line

WNB

After evaluating studies, V3S created WNB, a woman's supplement that helps create hormonal balance and actually works with a woman's body. Because of this balance of ingredients, WNB is not just for certain age groups or certain "times of the month" but can be used everyday to help support a woman's hormonal levels. In addition to Don Quai, often called Women's Herb by ancient Chinese medicine, WNB also contains Isoflavones, Vitamin B6, Calcium, and a whole host of other ingredients.

Don Quai has been used so religiously in Chinese medicine, it is only second to Ginseng in popularity. Don Quai is traditionally used for balancing the menstrual cycle, alleviating common symptoms of premenstrual syndrome, and reducing menopausal hot flashes. WNB was developed as a balanced formula by adding Vitamin B6, Isoflavones, Calcium, and herbs to help support hormonal levels. Keeping hormones from fluctuating may help regulate the menstrual cycle and further preserve overall better health.
