March 15, 2004

Dr Mark McClellan, Commissioner FDA
5600 Fischers La. Room 1061
Rockville, Md. 20852

Dear Dr McClellan,

I am writing this letter at the request of the Pro-life Obstetricians and Gynecologists.

Why is it that these people who wish to deny reproductive freedom to women also want to do all they can that will result in unwanted pregnancies?

They have dreamed up all sorts of reasons as to why women at risk for unintended pregnancy should not be able to procure the "morning after" pill in a timely manner. Most of the reasons given are their transparent effort to leave women with unwanted pregnancies.

I believe the bottom line is that the most important issue is to prevent unwanted pregnancies and all the protestations of these anti-choice groups are irrelevant when compared to that.

Sincerely,

Paul B. Jones MD, FACOG
