Dear Sirs

British Doctors' Study: Docket 77N-0094

In advance of a meeting on 30th April at which the FDA will discuss the use of aspirin for primary prevention with Bayer and its advisors, I enclose a summary of the British Doctors' Study. Please address all correspondence on this matter to me, with a copy to Sir Richard Peto, using the above address.

Please note that I have also enclosed the study report (BMJ 1988; 296: 313-6), but that there was no formal written protocol. A description of the conduct of the study is, however, included in the study paper.

Yours faithfully

Colin Baigent
Reader in Clinical Epidemiology
