Dear Dr. Moore:

Inverness Medical Nutritionals Group is launching a new dietary supplement and wishes to notify the Food and Drug Administration. The supplement, *Joint Complex (Omega-3 with Glucosamine)*, which consists of the active ingredients Glucosamine Hydrochloride 500 mg, Fish Oil Concentrate 333 mg (which provides EPA 100 mg and DHA 67 mg) bears the following structure / function claims on the label(s).

Display Panel (Bottle Label)

Promotes Joint Health *

Side Panel (Bottle Label)

Fish Oil concentrate provides important Omega-3 nutrients EPA/DHA to help maintain healthy joints. It also helps support a healthy heart and circulation. Glucosamine Hydrochloride assists in the formation of tendons, ligaments, skin, bones, nails, and muscles. *

*** These statements have not been evaluated by the Food and Drug administration. This product is not intended to diagnose, treat, cure, or prevent any disease.**

We certify that the information contained in this notice is complete and accurate, and we have substantiation that the above structure/function statements are truthful and not misleading.

Sincerely,

William J. Neumann
Vice President
Quality and Regulatory Affairs
