RE: Notification of Nutritional Support Statements

To whom it may concern:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of Ester-E®, a dietary supplement. Source Naturals® is the manufacturer of Ester-E®.

Statements being made in the labeling of Ester-E®

- 1) Ester-E is an advanced, natural, and highly bioactive form of vitamin E that occurs when natural *D-alpha* tocopherol combines with a phosphate molecule.
- 2) An initial animal study indicates that Ester-E's absorption may exceed that of the tocopherol and acetate forms.
- 3) Vitamin E is one of the body's chief antioxidants and the phosphate form, Ester-E, offers advanced antioxidant protection to body cells, helps maintain cardiovascular health, protects the liver from toxins, enhances circulation and supports healthy immune system function.

To the best of my knowledge and belief, and based upon information available at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals® possesses substantiation that the statements are truthful and not misleading.
