Re: Statements of Nutritional Support -- Notification

Dear Sir/Madam:

NEW VISION
INTERNATIONAL

This letter is submitted by New Vision International, Inc. (New Vision), 7762 East Gray Road, Suite 500, Scottsdale, AZ 85260, to notify the agency that pursuant to section 403(r)(6) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. § 343(r)(6), statements of nutritional support are being made for dietary ingredients contained in dietary supplements marketed by New Vision as follows:

1. Botanol® Dietary Supplement

- Ginseng root (provides nutritional support for physical and mental vitality).
- Grape seeds (OPC) (an antioxidant battling free radicals).
- Echinacea root (provides nutritional support for the immune system).
- Milk Thistle root (provides nutritional support for liver function).
- Nutritionally supports vitality and general well-being.

2. Essential Minerals™ Dietary Supplement

- Copper: Activates enzymes important to energy metabolism.

LET 798 54251

- Iron: Helps maintain red blood cells.
- Magnesium: Impacts enzyme systems affecting energy conversion in the body.
- Selenium: A natural antioxidant that protects normal cell function by battling free radicals.
- Zinc: Important for certain enzymatic activity.
- Our physical well-being is more directly dependent upon the minerals we take into our body than almost any other factor.
- Life-sustaining minerals are necessary for certain daily bodily functions. Although the body can function, however poorly, without vitamins, it will die without minerals. We naturally produce vitamins from our inherent mineral supply, so when that supply is depleted, the body suffers.

3. Imperial Energy™ Dietary Supplement

- All-natural Imperial Energy can help you feel your absolute best.
- One of this product's special properties is Radix Ginseng which nutritionally supports physical and mental vitality.
- The natural world pulses with energy just like a powerful wave. All-natural Imperial Energy can help restore REAL energy flow in the body and help you feel your absolute best.

4. Multi-Enzymes™ With Alfalfa & Barley Sprouts Dietary Supplement

- Enzymes are a part of the basis of all metabolic activity. They provide the driving force through which many of our body's biochemical reactions occur. Foods in their raw state contain the proper enzymes needed to digest them. When we cook or process our foods, we destroy some enzymes, giving our bodies the added burden of working over-time to digest those foods.
- Enzyme supplementation can help our well-being.
- The body has a remarkable ability for rejuvenation when properly nourished, and enzymatic action is related to this complex process.

5. Neutral C™ Dietary Supplement

- Echinacea has been added to the Neutral C formulation to gently support the body's immune system.
- Vitamin C is an antioxidant that battles free radicals.
- New Vision's Neutral C is also enhanced with carefully chosen ingredients, including Echinacea, which has been added to gently support the immune system.

6. Neutral C+™ CoEnzyme Q10 Dietary Supplement

- Vitamin C is an antioxidant that battles free radicals.
- New Vision's Neutral C+ CoEnzyme Q10 is designed as a formulation that includes the amino acids Lysine and Proline, along with the amazing break through nutrient CoEnzyme Q10. This ingredient is involved in the process that produces cellular energy.
- CoEnzyme Q10 should be considered by all concerned with maintaining or regaining optimum well-being.

7. OPC Grape Seed Extract™ Dietary Supplement

- Many doctors recognize the benefits of antioxidants in the battle against "free radicals". Free radicals are unstable molecules in your body that cause damage to healthy cells. Just one free radical can damage many cells, setting off a domino-like chain reaction of damage. Antioxidants can work to mitigate this by scavenging the free radicals before they can harm cells.
- OPC (Oligomeric ProanthoCyanidin) is the newest star in the world of antioxidants.
- Milk Thistle (provides nutritional support for proper liver function).
- Ginkgo Biloba (provides nutritional support for the brain and circulation function).

- Free radicals are unstable molecules that damage healthy cells, and are produced by everything from environmental toxins to natural metabolic functions. Just one free radical can damage many cells, setting off a domino-like chain reaction of damage similar to the rusting of machinery. Antioxidants can work to mitigate this by scavenging the free radicals before they can harm cells. The Environmental Protection Agency estimates that we are exposed to numerous toxic and sub-toxic compounds in our food, water, air and soil. These contribute to the need for antioxidants. OPC (Oligomeric Proantho-Cyanidin) is the newest star in the world of antioxidants. OPC is a special blend of water-soluble bioflavonoids called "proanthocyanidins" derived from grape seeds. Many doctors recognize the benefits of antioxidants. Now you can take this super-antioxidant, to battle free radicals.
 - Bilberry (provides nutritional support for vision).
 - OPC (Oligomeric Proantho-Cyanidin) is the newest star in the world of antioxidants. Antioxidants work to mitigate the effects of free radicals that damage cells.
8. Pyruvate+™ Weight Control Program Dietary Supplement
- Although not a "Magic Bullet" that makes the pounds melt away, when taken while following a low calorie diet, the ingredients in Pyruvate+ stimulate cellular mitochondria respiration, the cell's energy engine.
9. Slim Caps™ Dietary Supplement and Slim Caps™ Extra Dietary Supplement
- Like millions of Americans, if you are trying to lose unwanted body fat, you may need some nutritional supplementation in your diet. The combination of the all natural ingredients in Slim Caps provides a source of the nutritional supplementation dieters may need.
 - While many people fantasize about a "magic pill" that will just melt the pounds away, nothing so far has come close. However there is an all natural herbal pill that can provide you with the nutritional supplementation that you may need in your weight loss program -- New Vision's Slim Caps and Slim Caps Extra.

- The combination of the all-natural ingredients in Slim Caps and Slim Caps Extra provides a source of the nutritional supplementation dieters may need. The main difference between Slim Caps and Slim Caps Extra is the amount of Citrin™ each product contains. Slim Caps Extra contains twice the amount of this ingredient, along with an HCA derivative, Citrin K™. In addition a healthy portion of Ginseng was also added to this formula.

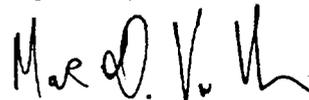

10. Super Aloe+™ Dietary Supplement

- Equisetum extract is a natural form of silica, which may be necessary for bone and connective tissue (collagen) formation, nails, skin and hair.
- Vitamin E is known for its rich antioxidant properties.
- Equisetum extract is a natural form of silica, which plays a role in bone and connective tissue (collagen) formation, nails, skin and hair.
- This formula is combined with a natural form of silica (which plays a role in bone and connective tissue (collagen) formation, nails, skin and hair), and vitamin E, creating an unequalled aloe vera product!

The disclaimer required by FFDC A § 403(r)(6)(C) accompanies each statement of nutritional support.

The undersigned certifies that the information contained in this notice is complete and accurate, and that New Vision has substantiation that each statement of nutritional support is truthful and not misleading.

Respectfully submitted,

Mark D. Van Vleet
Associate General Counsel
