Dear Dr. Kahl:

Pursuant to Section 6 of the Dietary Supplement Health and Education Act of 1994, MMS Professional Products, Inc. wishes to notify the Food and Drug Administration that it has within the past 30 days, commenced marketing a dietary supplement which bears a statement of nutritional support.

The dietary supplement for which the statement is made is Bilberry. The dietary ingredient that is the subject of the statement is Bilberry. The statement of nutritional support reads as follows:

"Supports healthy eye function. MMS Pro's Bilberry Fruit (*Vaccinium myrtillus*) is rich in powerful anti-oxidant agents known as bioflavonoids. These bioflavonoids, called anthocyanosides, are highly effective free-radical scavengers. These active constituents support visual adaptation to light and also help maintain normal nighttime vision. Anthocyanosides support the health of the eye and circulatory system by providing antioxidant activity, improving microcirculation and supporting healthy connective tissue formation."

This statement is accompanied by the required disclaimer which is prominently displayed in bold-faced type.

This statement of nutritional support is based on data which renders these statements substantiated, truthful and non-misleading.

Sincerely,

MMS PRO

Gordon M. Walker  
Regulatory Counsel
